

General Guidance

OXS & OYS

The X & Y fields must be completed for all Heat Loads and Heat Supply Plants.

The X & Y values used for a site should match the X & Y values found in the address point for that building (using the OS Address Point database).

Where no address point is available the X & Y value must be within the boundary of the building.

DO NOT use an X & Y value from a post code, as these represent several addresses and will not position the site in its correct location.

For more detailed information please refer to the data collection methodology.

DH Networks

Any DH Networks entries must be accompanied by a shapefile or drawing of the actual network so it can be added to the Heat Map website.

These attached files should have the same name as the site they refer to.

If there are 2 sites with the same name, please further identify each file so the correct attachment can be matched to the site.

Major Heat Loads

OXS	OYS	Object ID	Name	Address	Postcode	Ownership	New Development	Typology	Heating supply	Fuel source	Fuel consumption from all assets excluding CHP (MWh/year)	Fuel consumption from CHP (MWh/year)	Gross internal floor area (m²)	Number of dwellings	Installed thermal capacity from all assets	CHP Installed power (MWe)	CHP Installed thermal capacity (MWe)	CO2 emissions (tCO2/year)	Year of Construction	Year of data collection	Start date	Completion date	Data Source	Confidentiality of data	
519875	179259		Acton Adult Training Centre	Stirling Road, Acton,	W3 8DJ	Local government	No	Education facilities		Natural gas	519.72		2,056					96.13		2008			NI 185	No

General Guidance

OXS & OYS

The X & Y fields must be completed for all Heat Loads and Heat Supply Plants. The X & Y values used for a site should match the X & Y values found in the address point for that building (using the OS Address Point database). Where no address point is available the X & Y value must be within the boundary of the building. DO NOT use an X & Y value from a post code, as these represent several addresses and will not position the site in its correct location.

For more detailed information please refer to the data collection methodology.

DH Networks

Any DH Networks entries must be accompanied by a shapefile or drawing of the actual network so it can be added to the Heat Map website. These attached files should have the same name as the site they refer to. If there are 2 sites with the same name, please further identify each file so the correct attachment can be matched to the site.
