Project London's Cultural Spaces: 2018-2022
Date 13.01.2023

Fashion design

Definition: Buildings which provide space for jewellery design, making and manufacturing services.

119 jewellery design spaces have been recorded in 2022, a slight drop from 126 in 2018 caused by the closure of 10 spaces, 1 relocation outside London, and 4 new spaces. The decline rate, at -6%, is slightly lower than the creative manufacturing sector average of -7%, with broadly similar rate of closures (9% vs 12%) and openings (3% vs 5%). The vast majority of jewellers are located in Hatton Garden, the historic centre of London's jewellery industry — although apart from the Forge, new openings have favoured other areas of Inner London.
