

# 2021 Census: Training

Richard Cameron

PSUG 14 December 2022

# Introductory Training

(designed to run in parallel with univariate releases)

Final sessions of 2022 tomorrow

Three more sessions planned for January:

10, 18, 26 Jan.

# Further Training

We can run further sessions in February if there is demand – please let me know.

But our plan was to move on to accessing the multivariate data from tables and via the Table Builder. We now think the Table Builder won't be launched until March and since it's unlikely we'll get any advanced information on it, there will be a gap in February.

Views?

# Face to face training

The remainder of our training – the advanced and specialist courses should be delivered face to face, to audiences of 8 to 12 persons.

We need suitable venues – so please volunteer if you can host events of this size.
