London Country of Birth Profile

The aim of this briefing is to present a picture of people living in London and where they were born. This report will show the diverse makeup of London, with its cosmopolitan residents living together in a vibrant and multi-cultural world city.

This briefing is based on the 2001 Census statistics on country of birth. This report lists 147 different named areas, 127 are countries and 20 are aggregations of countries as defined by ONS. There remain almost 50,000 London residents born outside the UK for which we currently have no detailed information on country of birth. These represent less than 3 per cent of Londoners born outside the UK or Republic of Ireland.

This briefing presents a two page layout for each country of birth showing a range of characteristics such as age, sex, living arrangements, accommodation type, housing tenure, overcrowding, qualifications, health, economic activity, industry and occupation.

The different sections aim to answer a series of questions which are listed below;

Demography

- What are the breakdowns between male and female
- What are the age ranges for men and women
- What are Londoners' living arrangements

Housing and amenities

- What type of accommodation do people live in
- What type of housing tenure do they live in
- Do they live in overcrowded accommodation
- Does their home have central heating
- Do household members have access to a car

Health

- What is the state of peoples general health
- Do Londoners have limiting long term illnesses

Qualifications

- What kinds of qualification do they hold

Economic activity of those aged 16 to 74

- How many people work
- What type of work do they do
- How many don't work
- What are the reasons for not working
- How many students are aged 16-74
- What is the employment rate

Employment of those aged 16 to 74

- What types of occupations do people work in
- In which industries do they work

The intention is to give a summary of those born in different countries and living in London, and not to explain all the differences between people born in different countries. Comparisons are made between the people born in different countries and the London average, this provides a barometer of how one country of birth compares to London residents overall. To aid readers understand the information a selection of charts provide a visual interpretation of the data.

We have received a subsequent GLA commissioned table C0182, country of birth by sex and age for people in London. This table provides more information about small population groups in London and individual London boroughs. From this table we have found out that some of the ONS defined aggregations of countries can give misleading impressions.

ONS originally provided a figure in SCT021 (given in the table below) for people born in Montenegro and Serbia. Technically Kosovo is a province within Serbia yet most people classified as born in Montenegro and Serbia actually wrote Kosovo on their Census forms. The GLA have listed this grouping as Kosovo, Montenegro and Serbia. As the figures below confirm almost all those from Kosovo, Montenegro and Serbia are actually from Kosovo.

	Number of London residents born in	Percentage born
Montenegro and Serbia (SCT021)	13,088	
Kosovo (C0182)	12,690	97.0%
Serbia (C0182)	304	2.3%
Montenegro (C0115)	94	0.7%

When looking at the list of aggregated areas on the following page you may notice that some aggregated areas that are significantly smaller are listed as the leading country Monaco, France or Liechtenstein, Switzerland.

	Number of London residents born in	Percentage born
Monaco, France (SCT021)	38,206	
France (C0182)	38,130	99.8%
Monaco (C0115)	76	0.2%
Liechtenstein, Switzerland (SCT021)	5,393	
Switzerland(C0182)	5,379	99.7%
Liechtenstein (C0115)	14	0.3%

Country of birth question

The country of birth question in the 2001 Census was based on six tick boxes and a section for a self defined response. Five of the tick boxes related to England, Wales, Scotland, Northern Ireland and the Republic of Ireland. The sixth box was ticked for "Elsewhere" and the respondents were given the opportunity to write in a response. Almost 1.8 million (25 per cent) Londoners were born outside the UK and Republic of Ireland and their responses have been coded.

List of countries that have been aggregated

Cameroon and other areas
El Salvador, Guatemala, Honduras
Georgia Republic, Armenia, Azerbaijan
Kosovo, Montenegro, Serbia
Laos, Cambodia
Liechtenstein, Switzerland
Madagascar and Maldives
Monaco, France
Malta and Gozo
Occupied Territories (Gaza and West Bank)
Panama, Nicaragua, Costa Rica
Romania, Moldova
Russia, Mongolia
South Africa, Lesotho
St Christopher (St Kitts) - Nevis
St Vincent and the Grenadines
Suriname, Guyana, French Guiana
Turks and Caicos Islands and other areas
West Indies (not otherwise stated)
Western Samoa and other areas

For a glossary of terms used in this briefing see appendix 1.

For a list of which countries were commissioned as C0116, C0116a and C0116b see appendix 2.

For a list of all areas / countries for which data is currently available and which tables to look at see appendix 3.

The table used in this report is SCT021. A layout of the complete commissioned table is in appendix 4.

Appendix 1: Glossary

Accommodation Type
Accommodation type describes the type of accommodation occupied by an individual household, or if unoccupied, available for an individual household, for example the whole of a terraced house or a flat in a purpose built block of flats.

Cars and vans
The number of cars or vans owned, or available for use, by one or more members of a household. It includes company cars and vans available for private use. The count of cars or vans in an area relates only to households. Cars or vans used by residents of communal establishments are not counted.

Central Heating
A household's accommodation is described as 'with central heating' if it has central heating in some or all rooms (whether used or not). Central heating includes gas, oil or solid fuel central heating, night storage heaters, warm air heating and under floor heating. The information is not available for unoccupied household spaces.

Cohabiting
Two people are described as cohabiting if they are living together as a couple but are not married to each other. This includes people living with a partner of the same sex. A cohabiting person might be married (to someone not resident in the household) but will not be shown as married or separated in the living arrangements tables.

Communal Establishment
A communal establishment is defined as an establishment providing managed residential accommodation. Managed means full-time or part-time supervision of the accommodation. In most cases (for example, prisons, large hospitals, hotels) communal establishments can be easily identified. However, difficulties can arise with small hotels, guesthouses and sheltered accommodation. Special rules apply in these cases: Small hotels and guesthouses are treated as communal establishments if they have the capacity to have 10 or more guests, excluding the owner/manager and his/her family. Sheltered housing is treated as a communal establishment if less than half the residents possess their own facilities for cooking. If half or more possess their own facilities for cooking (regardless of use) the whole establishment is treated as separate households. Communal establishments have been excluded from calculations unless otherwise stated.

Country of Birth
There are five tick box responses to the country of birth question: one each for the four parts of the UK and one for the Republic of Ireland. Where there is no applicable tick box, people were asked to write in the present name of their country of birth. The written responses are coded using the ONS Geography Classification of Countries. Countries are classified in output according to the geographical position rather than politics. For example, the Canary Islands are classified as North Africa rather than Western Europe even though they belong to Spain.

Economic Activity
The Economic Activity questions apply only to people aged 16 to 74. They relate to whether or not a person was working or looking for work in the week before Census. The concept of Economic Activity is compatible with the International Labour Organisation (ILO) definition of economic status.

Economically Active
All people who were working in the week before the Census are described as economically active. In addition, the category includes people who were not working but were looking for work and were available to start work within 2 weeks. Full-time students who are economically active are included but are identified separately in the classification. The economic activity questions are only asked of people aged 16 to 74.

Economically Inactive
Within the Economic Activity classification, a person is either Economically Active or Inactive. Specific categories of Economic Inactivity are: Retired, Student (excludes those students who were working or in some other way were economically active), Looking after family/ home, Permanently sick/ disabled and Other. A person who is looking for work but is not available to start work within 2 weeks is counted as Economically Inactive. Economic Activity questions are only asked of people aged 16 to 74.

Employed
Any person who did paid work in the week before the Census, whether as an employee or self-employed, is described as employed or in employment. 'Paid work' includes casual or temporary work, even if only for one hour; being on a government-sponsored training scheme; being away from a job/business ill, on maternity leave, on holiday or temporarily laid off; or doing paid or unpaid work for their own or family business.

Employee
The distinction between employee and self-employed is determined by the response to the question 'Do (did) you work as an employee or are (were) you self-employed?' It relates to the person's Main job in the week before the Census or, if not working in the week before the Census, their last Main job.

Employment Rate 16-74
Calculated as a percentage of those aged 16 to 74 working full-time, part-time and self employed minus economically active full-time students divided by the population aged 16-74 minus economically active and inactive students.

Full-time student
A full-time student is a person of any age who has indicated that they are a schoolchild or student in full-time education. Full-time students and schoolchildren who are economically active are identified separately in the economic activity tables. They are not included in the other categories of economically active such as 'employees' or 'unemployed'. In tables on occupation and industry, where students are not identified separately, they are included under the appropriate occupation or industry. The economic activity questions are only asked of people aged 16 to 74.

Full-time working
Working full-time is defined as working 31 hours or more a week.

GLA
Greater London Authority

General Health
A self-assessment of a person's general health over the 12 months before the Census.

Higher level qualifications includes level 4/5
Level 4/5: First degree, Higher degree, NVQ levels 4 and 5, HNC, HND, Qualified Teacher status, Qualified Medical Doctor, Qualified Dentist, Qualified Nurse, Midwife, Health Visitor

Industry
The industry in which a person works is determined by the response to the question asking for a description of the business of the person's employer (or own business if self-employed). The responses are coded to a modified version of the UK Standard Industrial Classification of Economic Activities 1992 – UK SIC (92).

Limiting long-term Illness
A self assessment of whether or not a person has a limiting long-term illness, health problem or disability which limits their daily activities or the work they can do, including problems that are due to old age.

Living arrangements
The living arrangements classification combines the responses to the question on legal marital status and whether people are, or are not, living as a couple. It applies only to people in households.

Living in a couple
Includes both living with a spouse and cohabiting.

Living rent free
Could include households that are living in accommodation other than private rented

Lone parent family
Usually, a Lone parent family is a father or mother with his or her child(ren) where the parent does not have a spouse or partner in the household and the child(ren) do not have a spouse, partner or child in the household. It also includes a lone grandparent with his or her grandchild(ren) where there are no children in the intervening generation in the household.

Lower level qualifications include level 1 to 3
Level 1: 1+ 'O' level passes, 1+ CSE/GCSE any grades, NVQ level 1, Foundation GNVQ
Level 2: 5+ 'O' level passes, 5+ CSEs (grade 1). 5+ GCSEs (grades A-C), School Certificate, 1+'A' levels/ AS levels, NVQ level 2, Intermediate GNVQ
Level 3: 2+ 'A' levels, 4+ AS levels, Higher School certificate, NVQ level 3, Advanced GNVQ

Occupancy rating
This provides a measure of under occupancy and over crowding. It relates the actual number of rooms to the number of rooms 'required' by the members of the household (based on a relationship between them and their ages). The room requirement is calculated as follows:
- a one person household is assumed to require three rooms (two common rooms and a bedroom) - where there are two or more residents it is assumed that they require a minimum of two common rooms plus one bedroom for:

i. each couple (as determined by the relationship question)
ii. each lone parent
iii. any other person aged 16 or over
iv. each pair aged 10 to 15 of the same sex
v. each pair formed from a remaining person aged 10 to 15 with a child aged under 10 of the same sex
vi. each pair of children aged under 10 remaining
vii. each remaining person (either aged 10 to 15 or under 10).

Occupation
A person's occupation is coded from the response to the question asking for the full title of the Main job and the description of what is done in that job. It is coded to the 2000 edition of the Standard Occupational Classification (SOC).

ONS
Office for National Statistics

Other Social rented
Includes rented from Registered Social Landlord, Housing Association, Housing Co-operative, Charitable Trust and non-profit housing company.

Owned
This includes accommodation that is either owned outright, owned with a mortgage or loan, or shared ownership (paying part rent and part mortgage).

Part-time working
Working part-time is defined as working 30 hours or less a week.

Permanently sick/disabled
This is a sub-category of 'economically inactive'. There is no direct connection with limiting long-term illness.

Population base
The 2001 Census has been conducted on a resident basis. This means the statistics relate to where people usually live, as opposed to where they are on Census night. Students and schoolchildren studying away from the family home are counted as resident at their term-time address. As in 1981 and 1991, residents absent from home on Census night were required to be included on the Census form at their usual/resident address. Wholly absent households were legally required to complete a Census form on their return. No information is provided on people present, but not usually resident (Persons Present Population Base 1991).

Private rented
This includes accommodation that is rented from a private landlord or letting agency, employer of a household member, relative or friend of a household member, or other non social rented.

Self-employed
The distinction between employee and self-employed is determined by the response to the question 'Do (did) you work as an employee or are (were) you self-employed?' It relates to the person's Main job in the week before Census or, if not working in the week before Census, their last Main job.

Tenure
The tenure of a household is derived from the response to the question asking whether the household owns or rents its accommodation and, if rented, from the response to the question asking who is the landlord.

Unemployed
A person is defined as unemployed if he or she is not in employment, is available to start work in the next 2 weeks and has either looked for work in the last 4 weeks or is waiting to start a new job. This is consistent with the International Labour Office (ILO) standard classification.

Appendix 2: List of Countries by Commissioned Table

C0116

Afghanistan	Israel	Somalia
Albania	Italy	Sri Lanka
Algeria	Ivory Coast	Sudan
Angola	Jamaica	Swaziland
Argentina	Japan	Sweden
Australia	Jordan	Syrian Arab Republic

1. The occupancy rating provides a measure of under-occupancy and overcrowding. For example, a value of -1 implies that there is one room too few and that there is overcrowding in the household. The occupancy rating assumes that every household, including one person households, requires a minimum of two common (excluding bathrooms)
2. Car or van availability includes any company car or van if available for private use.
3. The term 'no qualifications' describes people without any academic, vocational or professional qualifications. The term 'lower level' qualifications is used to describe qualifications equivalent to levels 1 to 3 of the National Key Learning Targets (i.e. GCSE's, 'O' levels, 'A' levels, NVQ levels 1-3). The term 'higher level' refers to qualifications of level 4 and above (i.e. first degrees, higher degrees, NVQ levels 4 and 5, HND, HNC and certain professional qualifications.
4. The terms used to describe tenure are defined as:
Other social rented includes rented from Registered Social Landlord, Housing Association, Housing Co-operative and Charitable Trust.
Private rented: renting from a private landlord or letting agency, employer of a household member, or relative or friend of a household member or other person.
5. 'Other' industry includes other community, social and personal service activities, private households with employed persons and extra-territorial organisations and bodies.
6. In the NS-SeC classification, all full-time students are recorded in the 'full-time students' category regardless of whether they are economically active or not.
7. 'Not classifiable for other reasons' includes people who have not been coded and those who cannot be allocated to a NS-SeC category.
8. For long-term unemployed, year last worked is 1999 or earlier.
