

README

London's population of young children

The zipped folder "Data_for_LPYC" contains the data underlying the charts in the report "London's population of young children – current and future".

Links to the original data sources are provided in the report. This folder only includes the data needed to create the charts - see the third column below.

The files highlighted below are very large and can be provided on request.

The R scripts noted in the second column are available on Github <https://github.com/Greater-London-Authority/LPYC.git>

The data files and svg versions of the charts are also accessible via this link.

For any queries or comments please contact Veronica Tuffrey
(Veronica.Tuffrey@london.gov.uk)
