# 1. INTRODUCTION

This quarterly report presents information about people seen rough sleeping by outreach teams in Haringey in July - September 2025.

Information in the report is derived from the 'Combined Homelessness and Information Network' (CHAIN), a database commissioned and funded by the Greater London Authority (GLA) and managed by Homeless Link. For more information see [www.homeless.org.uk/chain](http://www.homeless.org.uk/chain).

The data on which this report is based is also available in an accessible tabular format, aggregated to borough and Greater London level, in a separate CHAIN Quarterly Data Tables file. This can be downloaded from the GLA Datastore at <http://data.london.gov.uk/dataset/chain-reports>. A suite of interactive charts and maps based on the data can be accessed via the CHAIN Quarterly Data Visualisations Tool at <https://bit.ly/chain-quarterly-vis-tool>.

In the rough sleeping figures in this report people are grouped into three categories:

<b>New rough sleepers</b>	Those who had not been contacted by outreach teams rough sleeping before the period
<b>Living on the streets</b>	Those who have had a high number of contacts over 3 weeks or more which suggests they are living on the streets
<b>Intermittent rough sleepers</b>	People who were seen rough sleeping before the period began at some point, and contacted in the period - but not regularly enough to be 'living on the streets'

For more information about the methods used to derive statistics for this report, and definitions of different groups, please see the Methodology section.

## Changes to CHAIN quarterly report content for 2025/26

From 2025/26 Q1 onwards, we have discontinued the use of the LOS - RS205+ population subcategory, which had been part of the overall Living on the Streets (LOS) group. This subcategory had allowed people who were members of the RS205 entrenched rough sleepers cohort to be counted as Living on the Streets during the period even if they had only been seen bedded down once, where other individuals were required to meet the criteria of having five bedded down contacts recorded across at least three weeks. It was felt that more accurate analysis could be achieved by applying the same criteria to all people seen rough sleeping in the period, regardless of prior membership of other cohorts.

This change could have the effect of slightly reducing overall Living on the Streets totals as presented in the report, although it is anticipated that the impact will be minor. The change in methodology should be borne in mind when comparing Living on the Streets totals from before and after April 2025.

## 2. ROUGH SLEEPER POPULATION ANALYSIS

### Haringey: Headlines

Table 1: People seen rough sleeping in 2025-26 Q2, by new, living on the streets, and intermittent breakdown

Volumes	No. Rough Sleepers	Change from last period	Change on same period last year
<b>New Rough Sleepers (All)</b>	<b>71</b>	<b>-1</b>	<b>+6</b>
New RS with no second night out	56	+3	+5
New RS with a second night out but not living on the streets	11	-5	-3

### 3. SPATIAL DISTRIBUTION

#### Bedded down street contacts by area: Borough level

It is important to note that this represents volume of contacts rather than individuals, and some people may have been seen on multiple occasions within a given area.

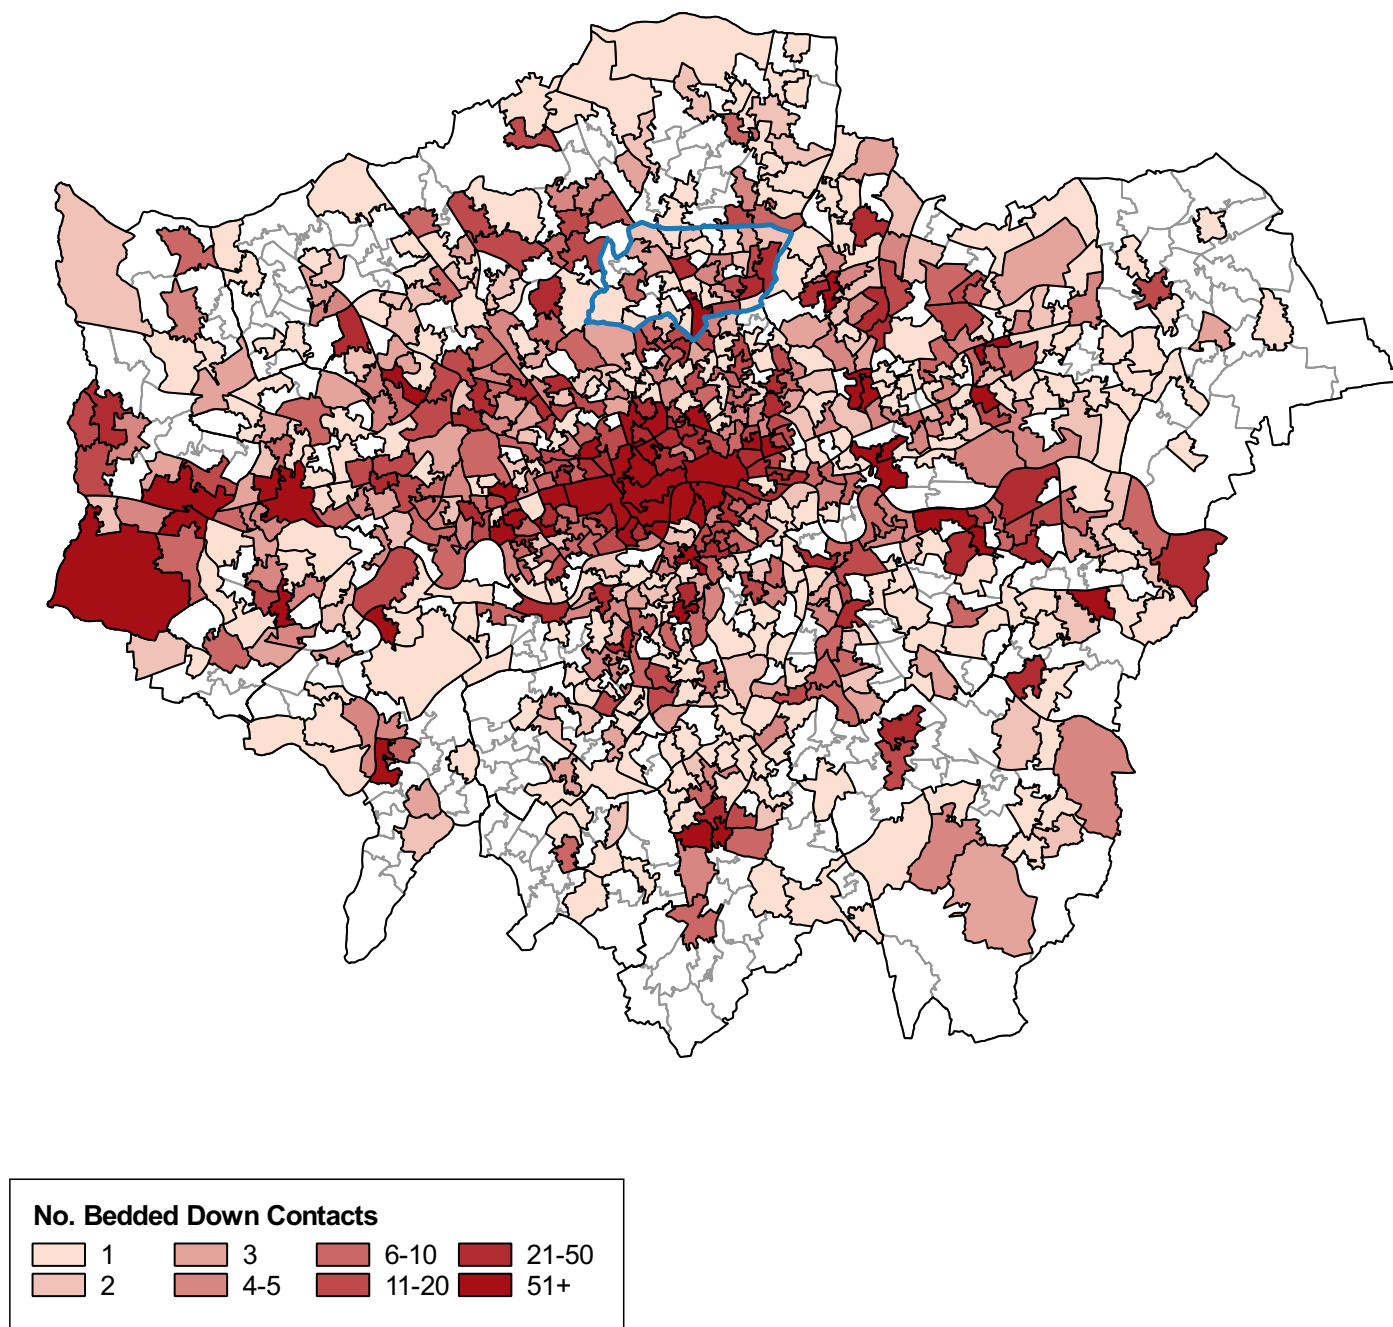

**Map 1: Number of bedded down street contacts recorded in each Lower Super Output Area in the borough during the period**

## Bedded down street contacts by area: Greater London level

It is important to note that this map represents volume of contacts rather than individuals, and some people may have been seen on multiple occasions within a given area. Recording of street contacts is to some extent influenced by outreach provision and practice, which can vary across local authority areas.

**Map 2: Number of bedded down street contacts recorded in each Middle Super Output Area across Greater London during the period, with Haringey highlighted for comparison**

36 - 45 years	51	35.4%
46 - 55 years	30	20.8%
Over 55 years	20	13.9%
Total	144	100.0%

## Ethnicity

**Chart 7: People seen rough sleeping in 2025-26 Q2, by ethnicity**

Base: 144 people seen rough sleeping during the period.

The previously employed category of 'Gypsy/Romany/Irish Traveller' was replaced with separate categories for 'White - Gypsy/Irish Traveller' and 'White - Roma' in April 2021. However, many people seen rough sleeping during the period may not have had their ethnicity information updated to reflect these new categories, so the original category is also included in the graph.

**Table 8: People seen rough sleeping during 2025-26 Q2, by ethnicity**

Ethnicity	No.	%
Asian (incl. Chinese)	3	2.1%
Black	41	28.5%
Mixed	4	2.8%
White (incl. Gypsy/Irish Traveller/Roma)	68	47.2%
Arab/Other	13	9.0%
Refused	15	10.4%
<b>Total</b>	<b>144</b>	<b>100.0%</b>

## 6. SUPPORT NEEDS

Chart 8: People seen rough sleeping in 2025-26 Q2, by support needs

Base: 101 people seen rough sleeping during the period who were assessed for at least one of the three support needs. This excludes 43 people for whom none of the three needs were assessed.

Table 9: People seen rough sleeping in 2025-26 Q2, by support needs

Support need	No.	%
Alcohol	30	29.7%
Drugs	36	35.6%
Mental health	52	51.5%
More than one of alcohol, drugs and mental health	31	30.7%
No alcohol, drugs or mental health support needs	28	27.7%
Total (excl. not assessed)	101	
Total (incl. not assessed)	144	

Base for percentages is people seen rough sleeping during the period who were assessed for at least one of the three support needs.

## 7. INSTITUTIONAL & ARMED FORCES HISTORY

The chart below indicates the proportions of people seen rough sleeping in Haringey during the period who had experience of spending time in prison or in local authority care as a young person, or of serving in the armed forces. This information indicates whether individuals have ever spent time in one of these settings, and does not necessarily imply that this was recent. It can include time spent in one of these settings in any country, and does not necessarily imply that it was in the UK.

**Chart 9: People seen rough sleeping in 2025-26 Q2, by experience of armed forces, care or prison**

Base: 89 people seen rough sleeping during the period who were assessed for at least one of the three support needs. This excludes 55 people for whom none of the three needs were assessed.

**Table 10: People seen rough sleeping in 2025-26 Q2, by institutional and armed forces history**

Type of history	No.	%
Armed forces	4	4.5%
Armed forces - UK nationals	1	1.1%
Care	8	9.0%
Prison	23	25.8%
No armed forces, care or prison history	61	68.5%
Total (excl. not assessed)	89	
Total (incl. not assessed)	144	

Base for percentages is people seen rough sleeping during the period who were assessed for at least one of the three histories.

## 8. ACCOMMODATION OUTCOMES

Bookings into accommodation achieved by outreach teams and other borough based support services during the period. People included in these figures will have been seen rough sleeping at some point in their history, but not necessarily during the reporting period.

**Table 11: Accommodation outcomes achieved during 2025-26 Q2, compared to 2025-26 Q1, by number of people**

An individual may have been booked into accommodation more than once during the period.

## 9. METHODOLOGY

CHAIN quarterly reports employ the methodology of assigning people seen rough sleeping during the period to categories, based on the following factors:

- Whether they were seen rough sleeping for the first time during the period
- How many times they were seen rough sleeping during the period
- Number of days elapsed between first and last time they were seen rough sleeping during the period

A further explanation of the individual categories follows.

### **New rough sleepers**

People who were seen rough sleeping for the first time during the period. The total number of new rough sleepers is broken down into those who were seen just once and did not have a second night out, those who were seen on several occasions, but as yet have not been on the streets long enough to count as 'living on the streets', and those new to the streets who remained there long enough to fulfil the criteria for 'living on the streets' (outlined below).

### **Living on the streets (LOS)**

With the designation 'living on the streets' we refer to people who have stayed on the streets after arriving, and are entrenched or at risk of becoming so. In determining who is counted as living on the streets we have used a combination of time on the streets (three or more weeks between the earliest and latest bedded down contact) and number of bedded down contacts (five or more contacts) during the period we are reporting on. If a person is seen bedded down six times, but only during one week, he or she does not count. If a person has four bedded down contacts, but spread over two months, he or she would also not count. To be counted, an individual must have both elements.

The reporting period covers three months. However, to ensure that we do not miss those whose rough sleeping crosses over reporting periods, we look back for the three weeks immediately before the start of the three month reporting period. For an individual in these circumstances, if they are not seen again, he or she will not be reported living on the streets in the next period.

The LOS total will include some who were new to the streets in the period, but whose stay extended beyond three weeks and who were seen bedded down at least five times - these are transferred from the new rough sleeper figures (shown in red in both section one and two of the report).

It is important to note that an individual who is included in the LOS total will not necessarily have been living on the streets for the entirety of the quarter in question, but they were living on the streets for a significant period during the quarter. The LOS total will also include some who are no longer on the streets, having gone into accommodation (or disappeared). They will not appear in the subsequent LOS total. An individual will only count as LOS during a period in which they meet the above criteria.

## **Intermittent rough sleepers**

Intermittent rough sleepers are those people who are not new in this period, and have not been seen rough sleeping enough to be deemed living on the streets. This group includes those who sleep rough periodically for very short periods. It also will include those who return to the streets for a longer period (but, in this period, less than the 'living on the streets' definition). Those that go on to be living on the streets will appear in that category in the next period.
