Dear Adam,

RE: 1A & 1C Eynsham Drive – Environmental Assessments Addenda

Following our review of the proposed scheme changes we can confirm that the following assessments will require addenda to the previously submitted reports:

- Energy Statement: to cover changes in unit mix and resultant energy and CO2 emissions performance;
- Air Quality Assessment: to cover changes in the building air quality neutral assessment.

The following assessments do not require addenda as the changes made would not have a significant material impact:

- Acoustic Assessment;
- Daylight, Sunlight and Overshadowing Assessment;
- Ecological Appraisal;
- Proposed Scheme Daylight and Sunlight Assessment;
- Sustainability Statement; and,
- Wind Microclimate Assessment.

Kind regards,

LINDSEY MALCOLM
