Q9 How important do you think each of the following are in terms of adapting to the effects of climate change for London?

-Summary

Base: All respondents

		Q9 Summary		
		Managing flood risk in homes and communities by raising flood defences and improving drainage	Managing drought risk by making homes and communities more water efficient	Reducing heat-wave risks by increasing green space for cooling and making sure that new buildings are designed to withstand higher temperatures

Q11 For each of the following please tell me whether you have done it/do it already, would be prepared to do it or would not be prepared to do it.

-Summary

Base: All respondents

	Q11 Summary					
	Be conscious of water use - turning off taps when brushing your teeth, take a shower instead of a bath etc	Install water saving appliances such as water efficient dishwashers and dual flush loos	Get a water butt to capture rainwater for outdoor use, or use water permeable materials for patios and parking areas	Sign up to the Environment Agency's Free Floodline Warning Direct service so I get a warning if my property could be flooded	Close my curtains or blinds on sunny days when out of the house to keep rooms cool	Open windows on hot days on both sides of my home to get air flowing through for cooling
