Introduction

This Briefing presents a ward level analysis of the Indices of Deprivation 2007 (ID2007) from the Department for Communities and Local Government as they relate to London. These Indices update the Indices of Deprivation 2004 and like them were produced to identify areas of need at a small area level. There are three Indices. The main one is the Index of Multiple Deprivation (IMD), which uses a complex series of statistical procedures to combine information on a range of aspects of deprivation into a single measure, and alongside this are two other indices, which concentrate on the proportion of particular population groups living in low-income households. Measures summarising the IMD at local authority level have been published by CLG, but no information has been published at ward level. A Briefing giving further details of the Indices at small area level for London is also published by the Greater London Authority (DMAG Briefing 2008-21).

What this Briefing does is to present at ward level for London, as far as is practicable and appropriate, summary measures of the small area Indices corresponding to those published by CLG at the Local Authority level and additional summary information which may be useful.

The Indices

The Index of Multiple Deprivation is based on the concept of measuring distinct dimensions of deprivation separately and then combining these to give an overall score. It is an area based measure, rather than an individual based measure, so it measures the extent of each type of deprivation within the area and then combines these to give a figure taking into account the extent of each type of deprivation. It does this by using statistical techniques to combine information on economic and social issues to produce scores for small areas across the whole of England. These are then used to rank the areas according to their relative level of deprivation.

Seven distinct dimensions or 'domains' of deprivation are included in the IMD2007, made up of 37 separate indicators. The domains are:

- Income deprivation
- Employment deprivation
- Health deprivation and disability
- Education, skills and training deprivation
- Barriers to housing and services
- Living environment deprivation
- Crime

These seven domains have been produced for each small area, and are then combined to produce a single score for each area in the country. These are then ranked to compare the areas across England.

Two further indices are created which are subsets of the income deprivation domain. These are the Income Deprivation Affecting Children Index (IDACI) and the Income Deprivation Affecting Older People Index (IDAOPI). Essentially these give the proportion

of the age group (under 16 and 60 and over respectively) in receipt of, or in a family in receipt of, certain means-tested benefits. These indices are also ranked across all small areas in England. The Indices are based mainly on data relating to 2005, although in some cases data relating to several years has been combined to improve robustness and in other cases the only reliable data at the small area level comes from the 2001 Census.

Geography

The purpose of the Indices is to measure multiple deprivation, or identify areas of need, at the small area level, so each of the three indices is produced for small areas known as Lower Layer Super Output Areas (SOAs). These are geographical areas devised, following the 2001 Census of Population, to be of a consistent size generated in a consistent way across the whole of England. Each area had a total population size of around 1,500 people. These areas are nested, as far as possible, within electoral wards (as they existed in 2002). There are exceptions to this, such as in the City of London, where ward populations are so small that this is not possible. The SOAs were created to be “fixed” geographical zones used for statistical purposes. Thus population sizes of SOAs are likely to have greater variation over time.

SOAs therefore have advantages over wards for identifying areas of need in that they are of a more consistent population size across the country and they are generally smaller than wards, particularly in urban areas. While it would be possible to construct the IMD at ward level, only the Social Disadvantage Research Centre at the University of Oxford (which constructed the Indices on behalf of CLG) can do so from first principles, as only they have access to the original, unrounded data.

LA level summary measures

The IMD is created for small areas because that is considered the best way to identify the areas of need. However, it is sometimes necessary to consider higher geographical levels for painting a picture of a wider area to make comparisons or for funding decisions. Most of these higher areas are fairly arbitrary in their geography and exist for administrative or political purposes. Summary measures of the IMD have been published by CLG for a selection of such areas, including local authority areas, so borough level figures have been produced for London. Borough level figures for the other two Indices are not published by CLG, but are published elsewhere by the Greater London Authority (see DMAG Briefing 2008-21). Six different measures of the IMD have been created for local authorities, each focusing on different, but equally valid aspects of multiple deprivation in the district. Therefore no single measure is favoured over another and all should be taken into account. The six measures are:

- *Average of SOA Scores* describes the overall position of people in the district by taking the population weighted average of the scores for each SOA within the district.
- *Average of SOA Ranks* again summarises the district as a whole, taking into account the population weighted ranks of both the deprived and less deprived SOAs.

- *Extent* depicts how widespread high levels of deprivation are in a district by considering the proportion of the district's population living in the most deprived SOAs in England.
- *Concentration* identifies districts' 'hot spots' of deprivation by looking at the (population weighted) average rank of the most deprived SOAs containing ten per cent of the district's population.
- *The Income Scale* gives the **number** of people in the district who are income deprived.
- *The Employment Scale* gives the **number** of people in the district who are employment deprived.

Ward level summary measures

There has been a demand within the GLA and from partner agencies for a ward level analysis based on 2007 scores and this Briefing attempts to address that need. No attempt has been made to produce actual IMD scores but instead this Briefing presents an analysis at ward level summarising individual SOA scores within wards to replicate, as far as possible, the local authority level measures published by CLG and gives alternative and additional measures, including a ward level version of the IDACI and IDAOPI.

The ward level summary measures replicating those at LA level produced here are:

- *Average of SOA Scores*
- *Average of SOA Ranks*
- *Extent*
- *The Income Scale*
- *The Employment Scale*

The calculations for these are as close as possible to those for the LA level measures and full detail of the calculations is given below.

The *Average of SOA Scores* measure describes the ward as a whole and is a population weighted average for the ward. This is calculated by first multiplying the IMD score for each SOA by the population estimate for that SOA. These figures are then summed across all SOAs within the ward and the result is divided by the total population for that ward (the sum of the SOA population estimates). This measure takes into account the full range of scores within the ward and the number of people affected by the level of deprivation in each SOA.

The *Average of SOA Ranks* measure again takes into account the full range of deprivation across each ward, but using the ranks of SOAs rather than the scores. Again it is calculated using the population figures to take account of variation in SOA sizes, so it is a population weighted average of SOA ranks within each ward, but with the ranks reversed, so that the most deprived SOA is ranked 32482 and the least deprived is ranked 1, so that a higher figure represents higher levels of deprivation.

The *Extent* measure aims to show how widespread significant levels of deprivation are within each ward. Thus, it counts the people in the most deprived SOAs only. It counts the total population for any SOA ranked in the top ten per cent in England, and then, in order to avoid a crude cut-off, it also includes a portion of the population in the next 19 per cent on a graduated scale, so that 95 per cent of the population count for SOAs with a rank between the tenth and eleventh percentiles is included, 90 per cent of the population count for SOAs with a rank between the eleventh and twelfth percentiles etc down to five per cent of the population count for SOAs with a rank between the twenty-eighth and twenty-ninth percentiles. None of the population in areas ranked lower than this is included on this measure.

The *Income Scale* measure gives a count of the actual number of people living in households in income deprivation. It is calculated by multiplying the income score for each SOA by the population for that SOA. These are then summed across SOAs within each ward to give the income score for the ward.

The *Employment Scale* measure gives a count of the actual number of people experiencing employment deprivation. It is calculated by multiplying the employment score for each SOA by the working age population for that SOA. These are then summed across SOAs within each ward to give the income score for the ward.

The LA level *Concentration* measure cannot be sensibly reproduced at ward level, since it is based on ten per cent of the area's population, which is in most cases less than a single SOA. Instead, a summary measure *Highest ranked SOA in ward* has been included. This effectively answers the same question of "how deprived are the most deprived people in the area?"

Additionally, this Briefing includes the total number of SOAs in each ward and gives a count of how many SOAs are included among the more deprived areas in England. Four such counts are given – the five per cent most deprived, ten per cent, 20 per cent and 50 per cent, or above average.

While the process described above is relatively straightforward, there is an issue around the population figures for some SOAs, particularly relating to prisoners. The population figures used for the ID2007 are based on the ONS estimates of population at SOA level and are consistent with the mid year estimates for 2005 but are adjusted for the prison population, which is excluded from the population base of the Indices. Overall the figure for the number of prisoners in London in 2005 used in producing these estimates is substantially lower than in the 2001 Census, at less than 1,500, compared with over 2,500 in the Census. Additionally for particular prisons, the SOA, and even the ward, to which the figures are assigned has changed. Quite how this affects the results is difficult to assess. More detail on population denominator issues is given in DMAG Briefing 2008-21.

Results – the ward level summary measures of IMD 2007

The full results for all wards are given by borough in the Appendix, showing the scores and ranks on each summary measure. A rank of 1 denotes most deprived out of a total of 628 wards in London, with the City of London grouped into four areas, only the first of which is named. The other descriptive measures described above, such as number of SOAs in the most deprived categories are also given, as are the IDACI and IDAOPI scores and ranks. The top and bottom wards on each summary measure and maps showing the distribution are given in this section.

Table 1 Most deprived London wards on Extent measure

Ward name	Borough	Extent	Rank of extent (within London) 1=most deprived
Northumberland Park	Haringey	1.00	1
Bromley-by-Bow	Tower Hamlets	1.00	1

Church Street	Westminster	0.91	19
Dalston	Hackney	0.91	20
Bethnal Green North	Tower Hamlets	0.91	21

Source: GLA Calculations based on the Department for Communities and Local Government, Indices of Deprivation 2007

These 21 wards all have an Extent measure over 90 per cent. There are two London wards which have all SOAs within the ten per cent most deprived SOAs nationally and therefore an Extent measure of 1.00 or 100 per cent. 180 wards out of 449 have no SOAs in the top 29 per cent nationally and therefore 0.00 Extent score.

Access to further information

Further information on both the detail of how the indices are constructed and more regional analysis can be found in the full report of the ID2007, The English Indices of Deprivation 2007 published by Communities and Local Government, March 2008. This, together with a summary can be found on the CLG website at:

<http://www.communities.gov.uk/communities/neighbourhoodrenewal/deprivation/deprivation07/>.

The report of the ID2004 can be found at:

<http://www.communities.gov.uk/archived/general-content/communities/indicesofdeprivation/216309/>.

The 2007 data for the whole of England can be downloaded from the CLG website (address given above) in Excel format. At the time writing, the data is available in separate files covering:

- the domains and IMD for SOAs
- the IDACI and IDAOPI
- the sub domains
- the LA level scores
- the County level scores
- the population denominators

Some of the individual indicators are available, but most have not yet been published at the time of publication of this Briefing.

A separate DMAG Briefing (2008-21) giving an analysis of the published data for small areas and for local authorities within London is also available. Contact DMAGinfo@london.gov.uk for a copy.

A spreadsheet giving the full ward level figures found in the Appendix is also available. Contact Rachel.Leeser@london.gov.uk for a copy.

Copies of this Briefing and further information relating to the Indices of Deprivation 2007 and other deprivation indices can also be found on the Social Exclusion section of the GLA Extranet. This is a password protected site. To apply for access, a form to be completed and submitted on-line can be found at:
<https://extranet.london.gov.uk/enquiry-form.jsp>

Regular Briefings from the GLA Data Management and Analysis Group (DMAG)

Recent DMAG Briefings 2008:

2008-01	Census Information Note 2008-1	Eileen Howes
2008-02	PayCheck 2007	Lovedeep Vaid
2008-03	GLA 2007 Round Ethnic Group Projections	Baljit Bains
2008-04	Council Tax Analysis	Elizabeth Williams
2008-05	A Profile of Londoners by Country of Birth	Lorna Spence
2008-06	Claimant Count Model 2008: Technical Note	Lorna Spence
2008-07	GLA 2007 Round Demographic Projections	John Hollis
2008-08	Greater London Authority Constituency Profiles	Elizabeth Williams & Caroline Hall
2008-09	Family Resources Survey 2005/06: Results for London	Lovedeep Vaid
2008-10	London Borough Migration 2001-06	John Hollis
2008-11	Social Exclusion Data Team Workplan 2008/09	Social Exclusion Data Team
2008-12	Demography Team Workplan 2008/09	John Hollis
2008-13	Education Team Workplan 2008/09	David Ewens
2008-14	Census Team Workplan 2008/09	Eileen Howes
2008-16	GIS Team Workplan 2008/09	Gareth Baker
2008-17	Lone Parents on Income Support by Ethnic Group	Lovedeep Vaid
2008-20	SASPAC Workplan 2008/09	Alan Lewis

Recent DMAG Briefings 2007:

2007-16	Key Facts for Diverse Communities: Ethnicity and Faith	Baljit Bains
2007-17	A profile of Londoners by housing tenure	Lorna Spence
2007-18	Londoners and the Labour Market: key facts	Lorna Spence
2007-19	Benefit Claimants in London 2006	Lovedeep Vaid
2007-20	Worker Registration Scheme	Elizabeth Williams
2007-21	Economic Activity Rates in London	Richard Cameron & Giorgio Finella
2007-22	ONS Model-based Income Estimates: 2004/05	Lovedeep Vaid
2007-23	Background to DMAG Poverty Profiles	Lovedeep Vaid
2007-24	Counting the Population: GLA Submission to the Treasury Sub-Committee	John Hollis
2007-25	Census Information Note 2007-2	Giorgio Finella

A full list of DMAG Briefings is available to internal customers through the GLA Intranet; otherwise please contact dmag.info@london.gov.uk A CD containing PDF versions of the Briefings, or hard copies, can be provided.

Contact details for the Data Management and Analysis Group

Rob Lewis (020 7983 4652) is **Head of the Data Management and Analysis Group**. rob.lewis@london.gov.uk

John Hollis (020 7983 4604) is the **Demographic Consultant** responsible for the work of the **Demography, Education and Social Exclusion Teams**, and particularly for demographic modelling. john.hollis@london.gov.uk

Eileen Howes (020 7983 4657) is responsible for the work of the **Census, SASPAC and General Statistics Teams** and particularly for census analysis. eileen.howes@london.gov.uk

Gareth Baker (020 7983 4965) is the **GIS Manager** with responsibility for leading work on GI including strategy, the development of data holdings, analysis and dissemination. gareth.baker@london.gov.uk
