## Introduction

This Briefing includes a range of maps for all wards in London illustrating the diversity of London's population. This shows a population more culturally diverse than that anywhere else in the country. It includes maps based on the percentages in the population in each of the ethnic groups and religions specified in the 2001 Census, alongside a table related to each map giving the wards in each borough with the highest and lowest values for the measure included in the map.

Maps based on country of birth are included giving details of the numbers of Londoners born in particular countries. This set of maps uses numbers and not percentages because, for many countries, the percentages are relatively small and the maps would not be particularly informative. The maps of numbers included here show where communities are and their relative sizes, as nearly all the country of birth maps are produced at the same scale. The only exceptions, where the numbers were too large, are Maps 21, 47 and 52 based on people born in the UK, India and the Republic of Ireland.

## Definitions

### *Ethnic group*

The question on ethnic group included in the 2001 Census was developed from the first ever question on ethnicity included in the 1991 Census. The categories used in 2001 were a compromise between totally new categories that would better reflect respondents' self-defined ethnicity and categories that would allow some statistical comparison with 1991 and therefore also give some measure of change over the decade.

The question asked people 'What is your ethnic group?' and gave a choice of tick boxes or write-in answers as below:

### **White**

- British
- Irish
- Any other White background, *please write in*

### **Mixed**

- White and Black Caribbean
- White and Black African
- White and Asian
- Any other Mixed background, *please write in*

### **Asian or Asian British**

- Indian
- Pakistani
- Bangladeshi
- Any other Asian background, *please write in*

### **Black or Black British**

- Caribbean
- African
- Any other Black background, please write in

### **Chinese or other ethnic group**

- Chinese
- Any other, please write in

### *Religion*

The new question on religion was the first voluntary question in a UK Census since 1851, when a voluntary question on religion was included, and, even though response was voluntary, around 93 per cent of respondents answered the question. The high response rate means that the statistics on religion are probably just as good as those derived from answers to the compulsory questions, such as ethnic group and country of birth.

Similar to the ethnic group question in wording, the question asked people 'What is your religion?' and gave a choice of tick boxes or write-in answers as below:

- None
- Christian (including Church of England, Catholic, Protestant and all other Christian denominations)
- Buddhist
- Hindu
- Jewish
- Muslim
- Sikh
- Any other religion, please write in

### *Country of birth*

Country of birth has been included in many previous Censuses and can be used to compare with previous decades. In this Briefing, though, we only look at data for 2001. Future Briefings are likely to look at change over time.

The question asked 'What is your country of birth?' and gives a number of tick boxes:

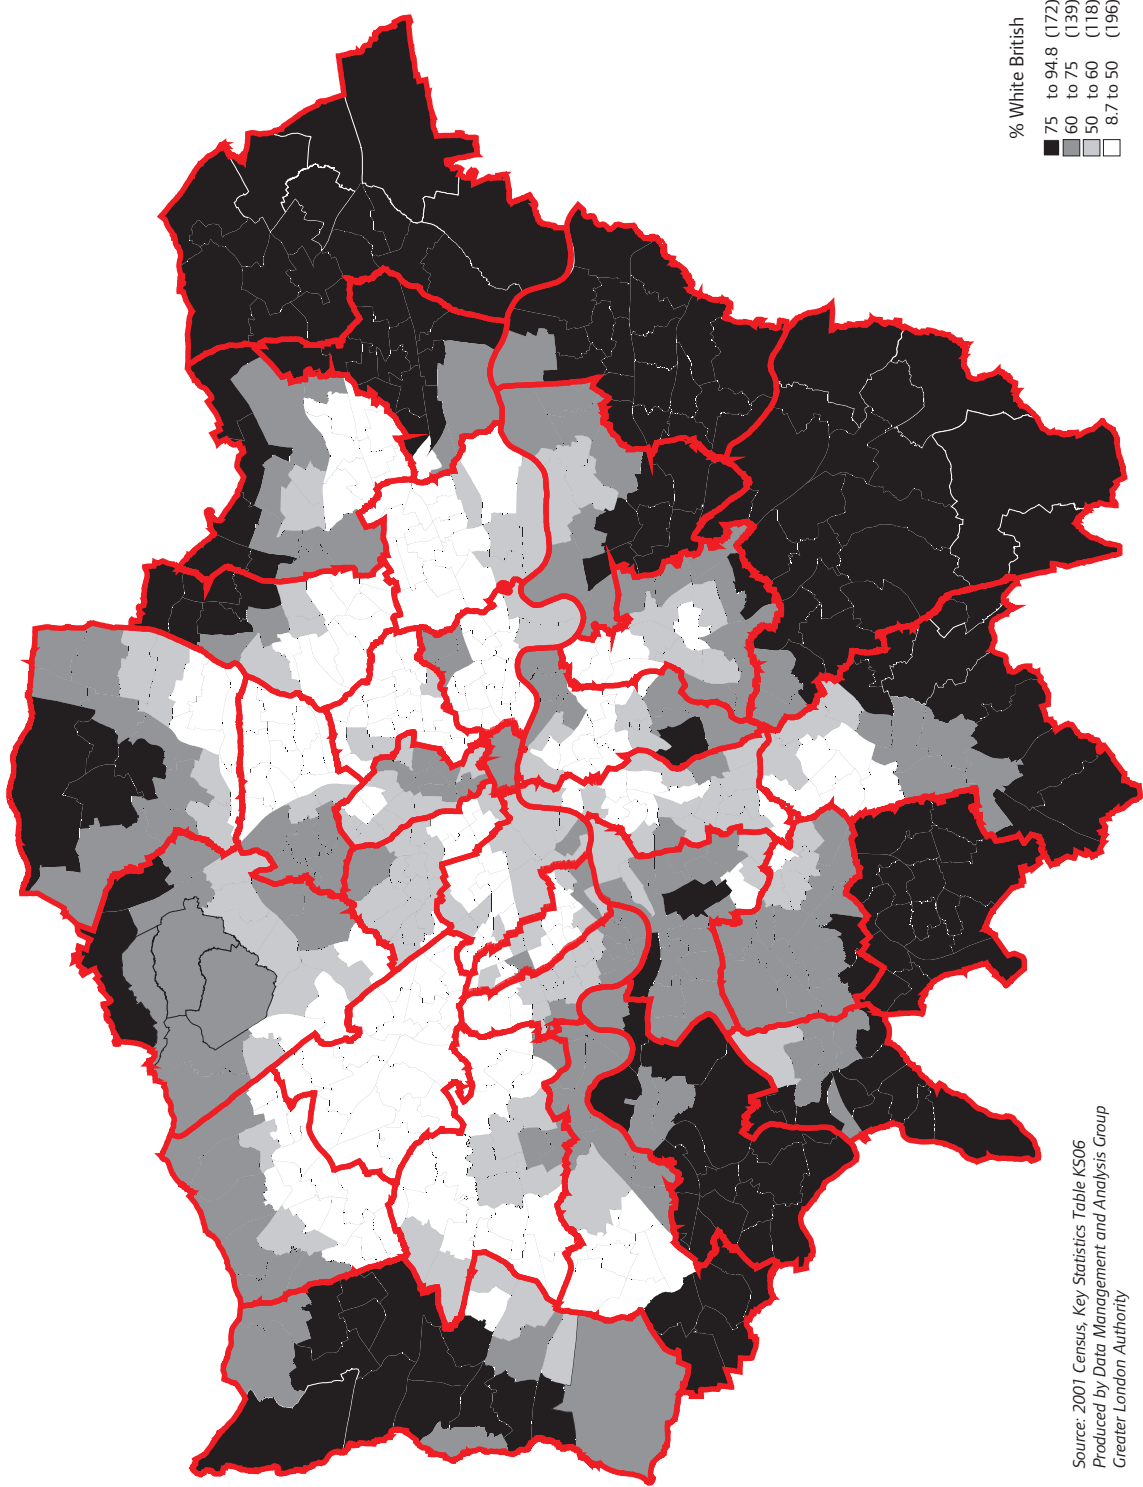

- England
- Wales
- Scotland
- Northern Ireland
- Republic of Ireland
- Elsewhere, please write in the present name of the country
