

Migration and Diversity in London

BSPS Day Seminar

City Hall

2nd May 2006

Senior Research and Statistical Analyst

Ethnic Demography

DMAG

Thanks to John Hollis for his help

Outline

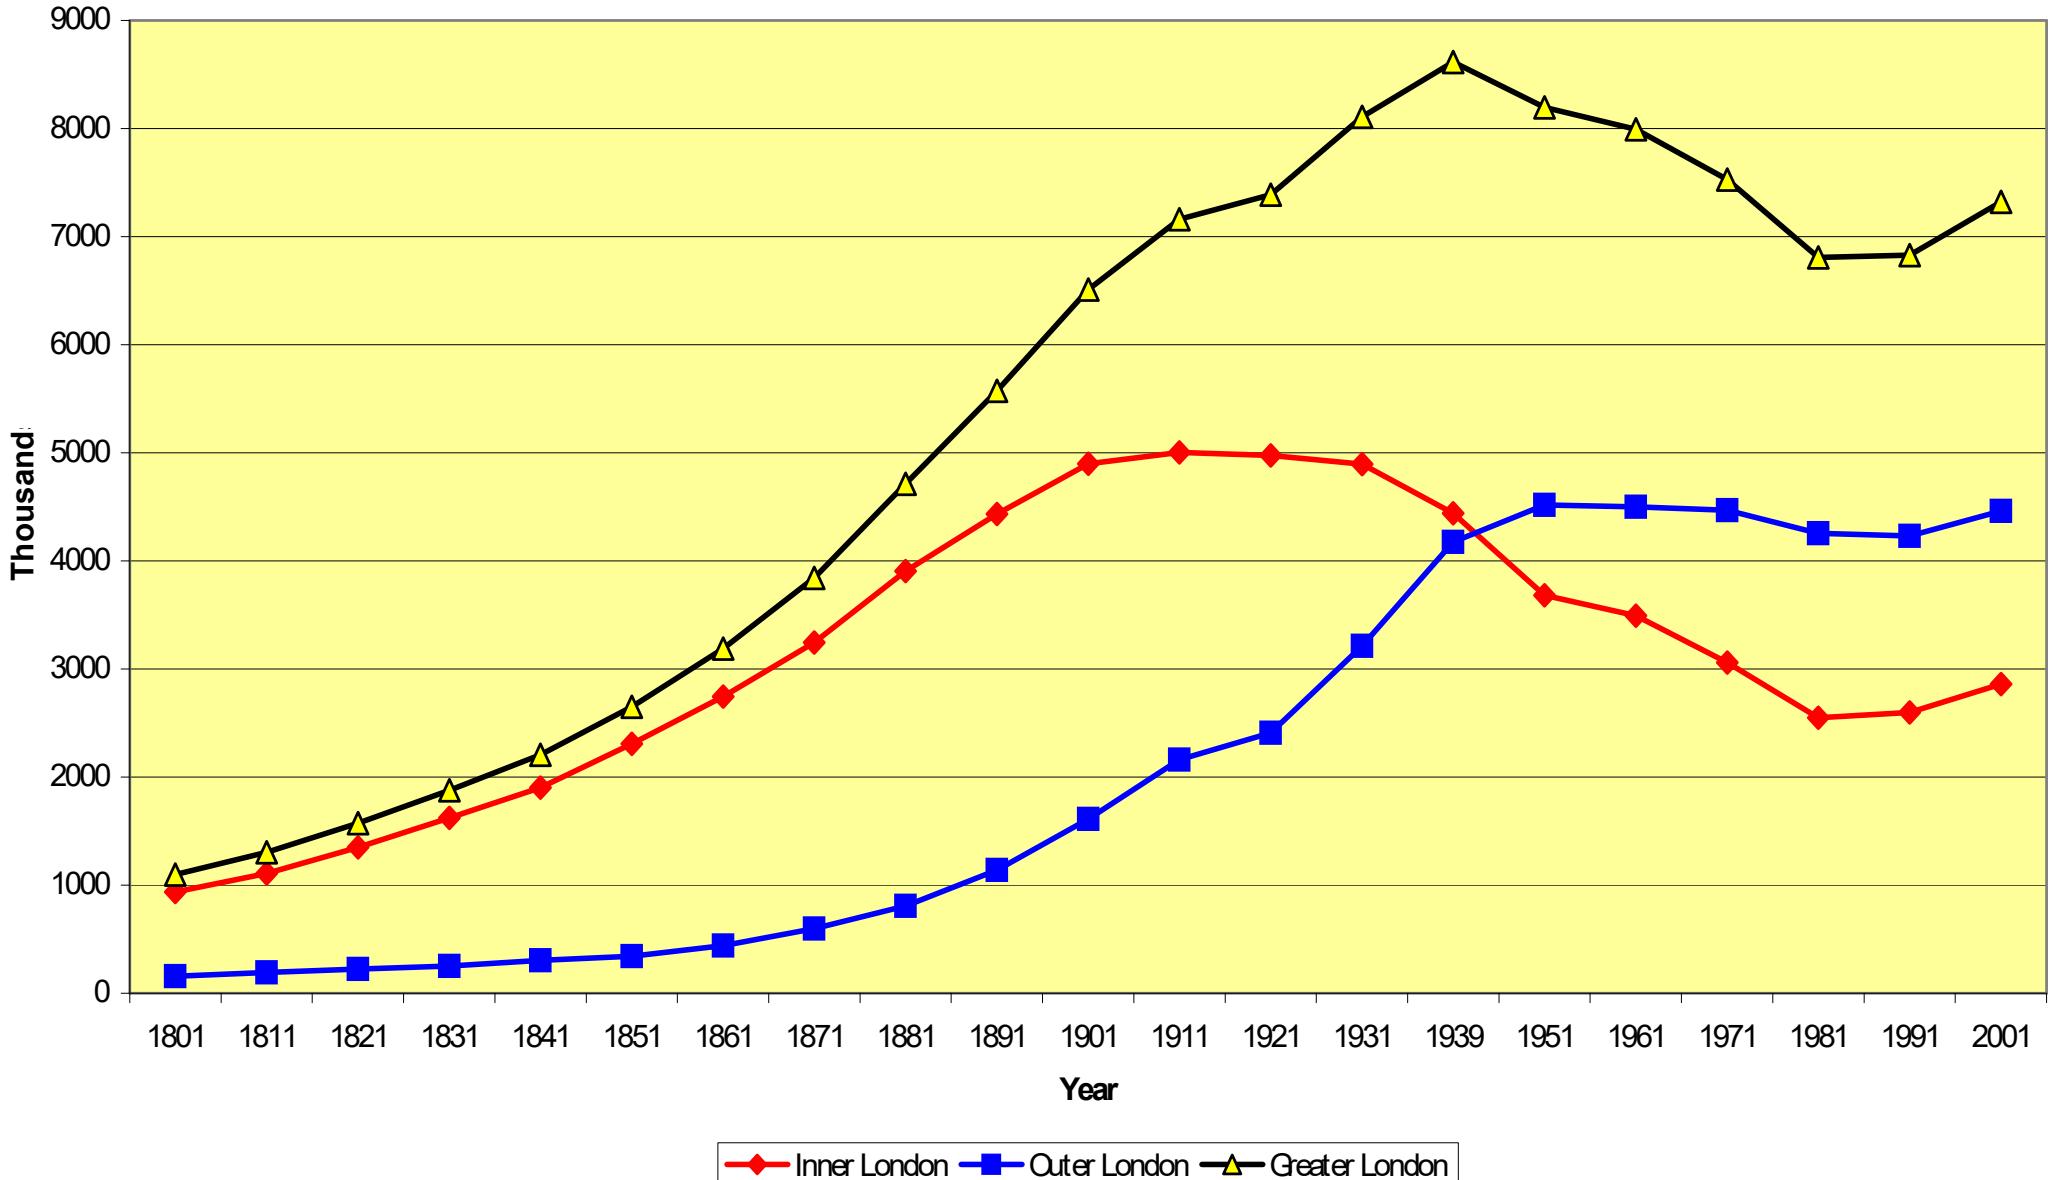

- London - yesterday, today and tomorrow
- Diversity in London
- Ethnic Segregation in London
- Ethnic Migration patterns, 2001 Census
- More Recent Change - Monitor

Context: London

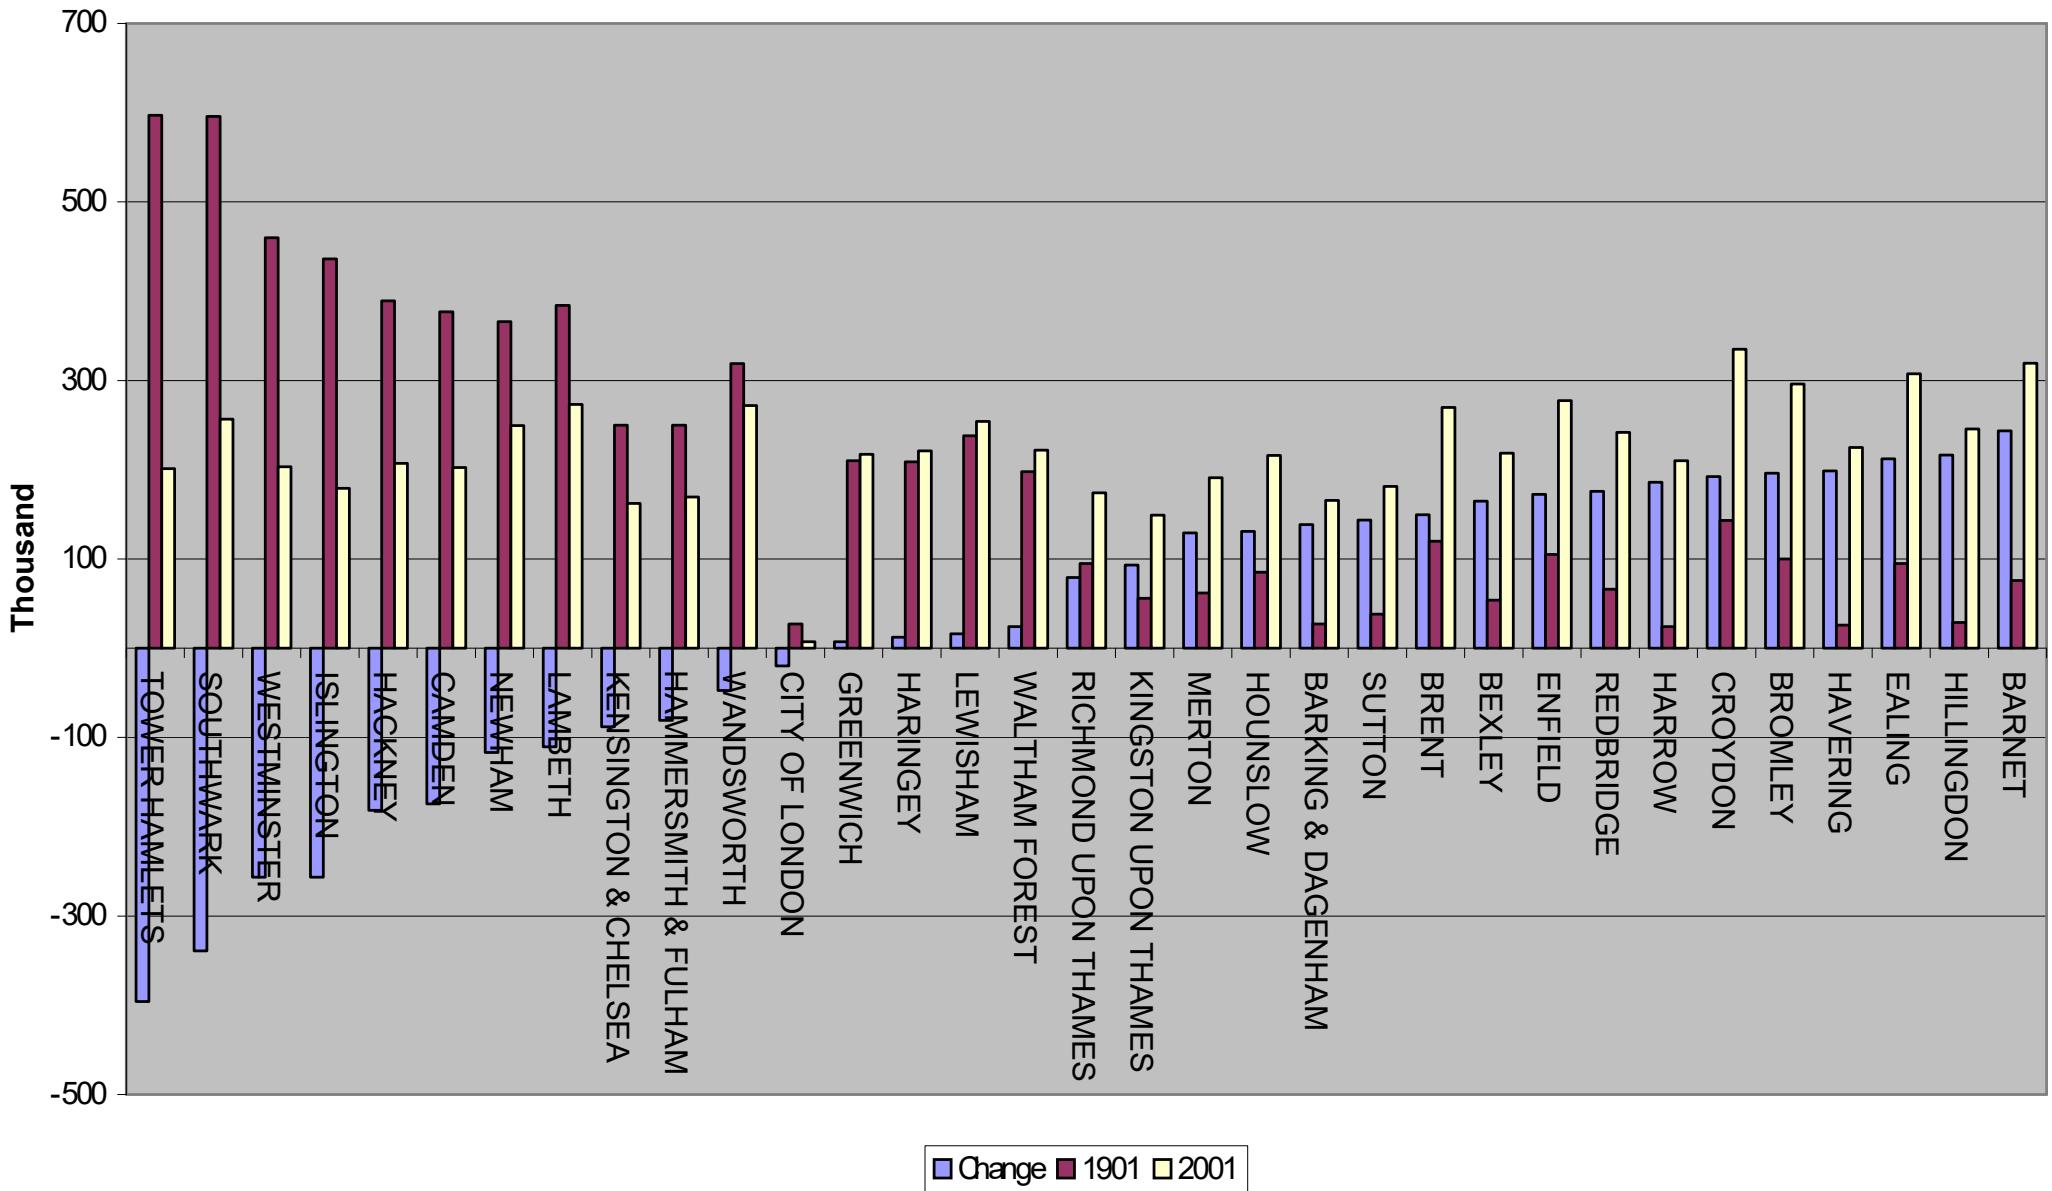

How is London central to this debate:

- **Historical**
- **Current**
- **Future**

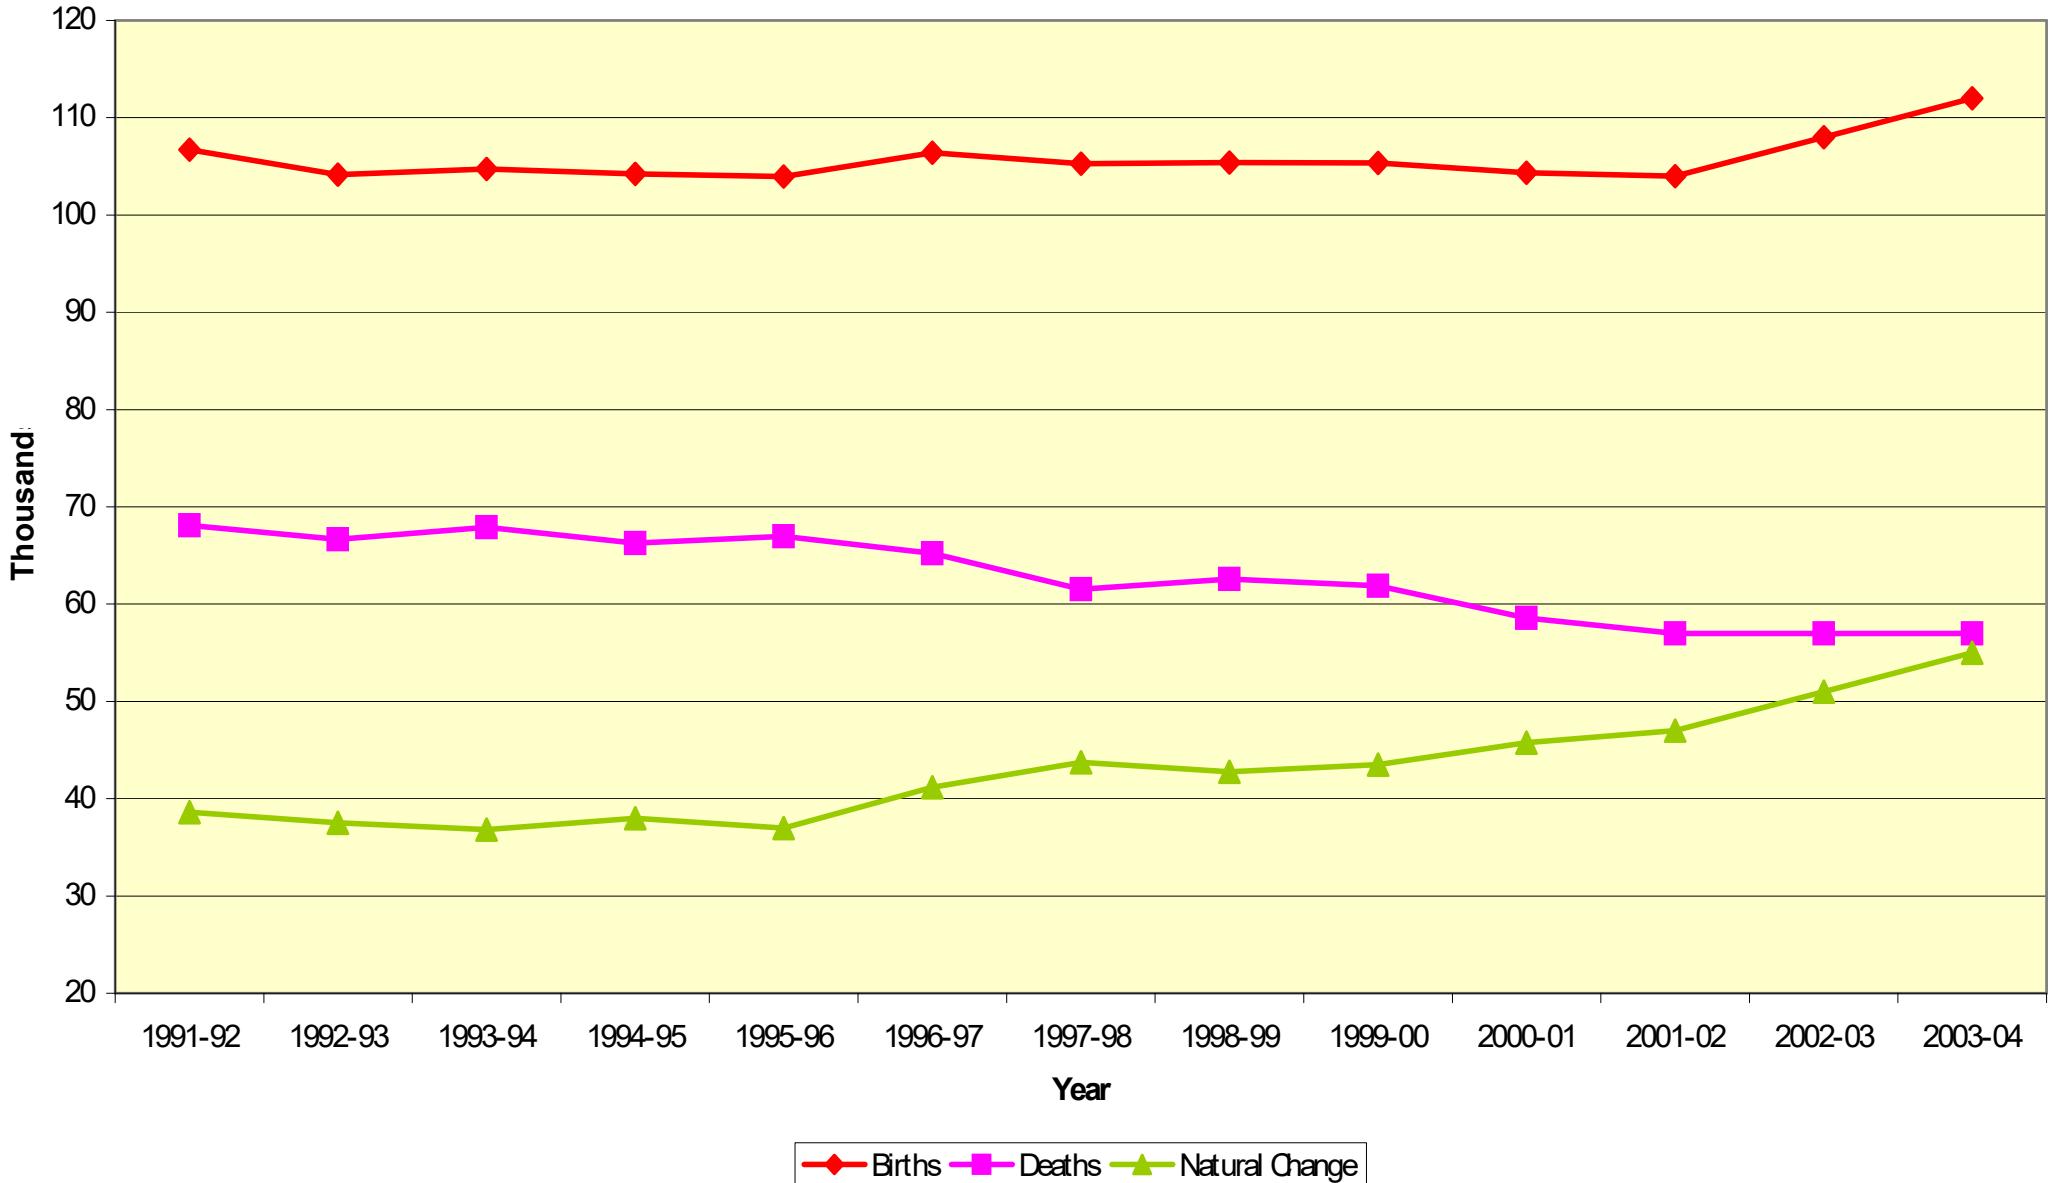

Population Trends: 1801-2001

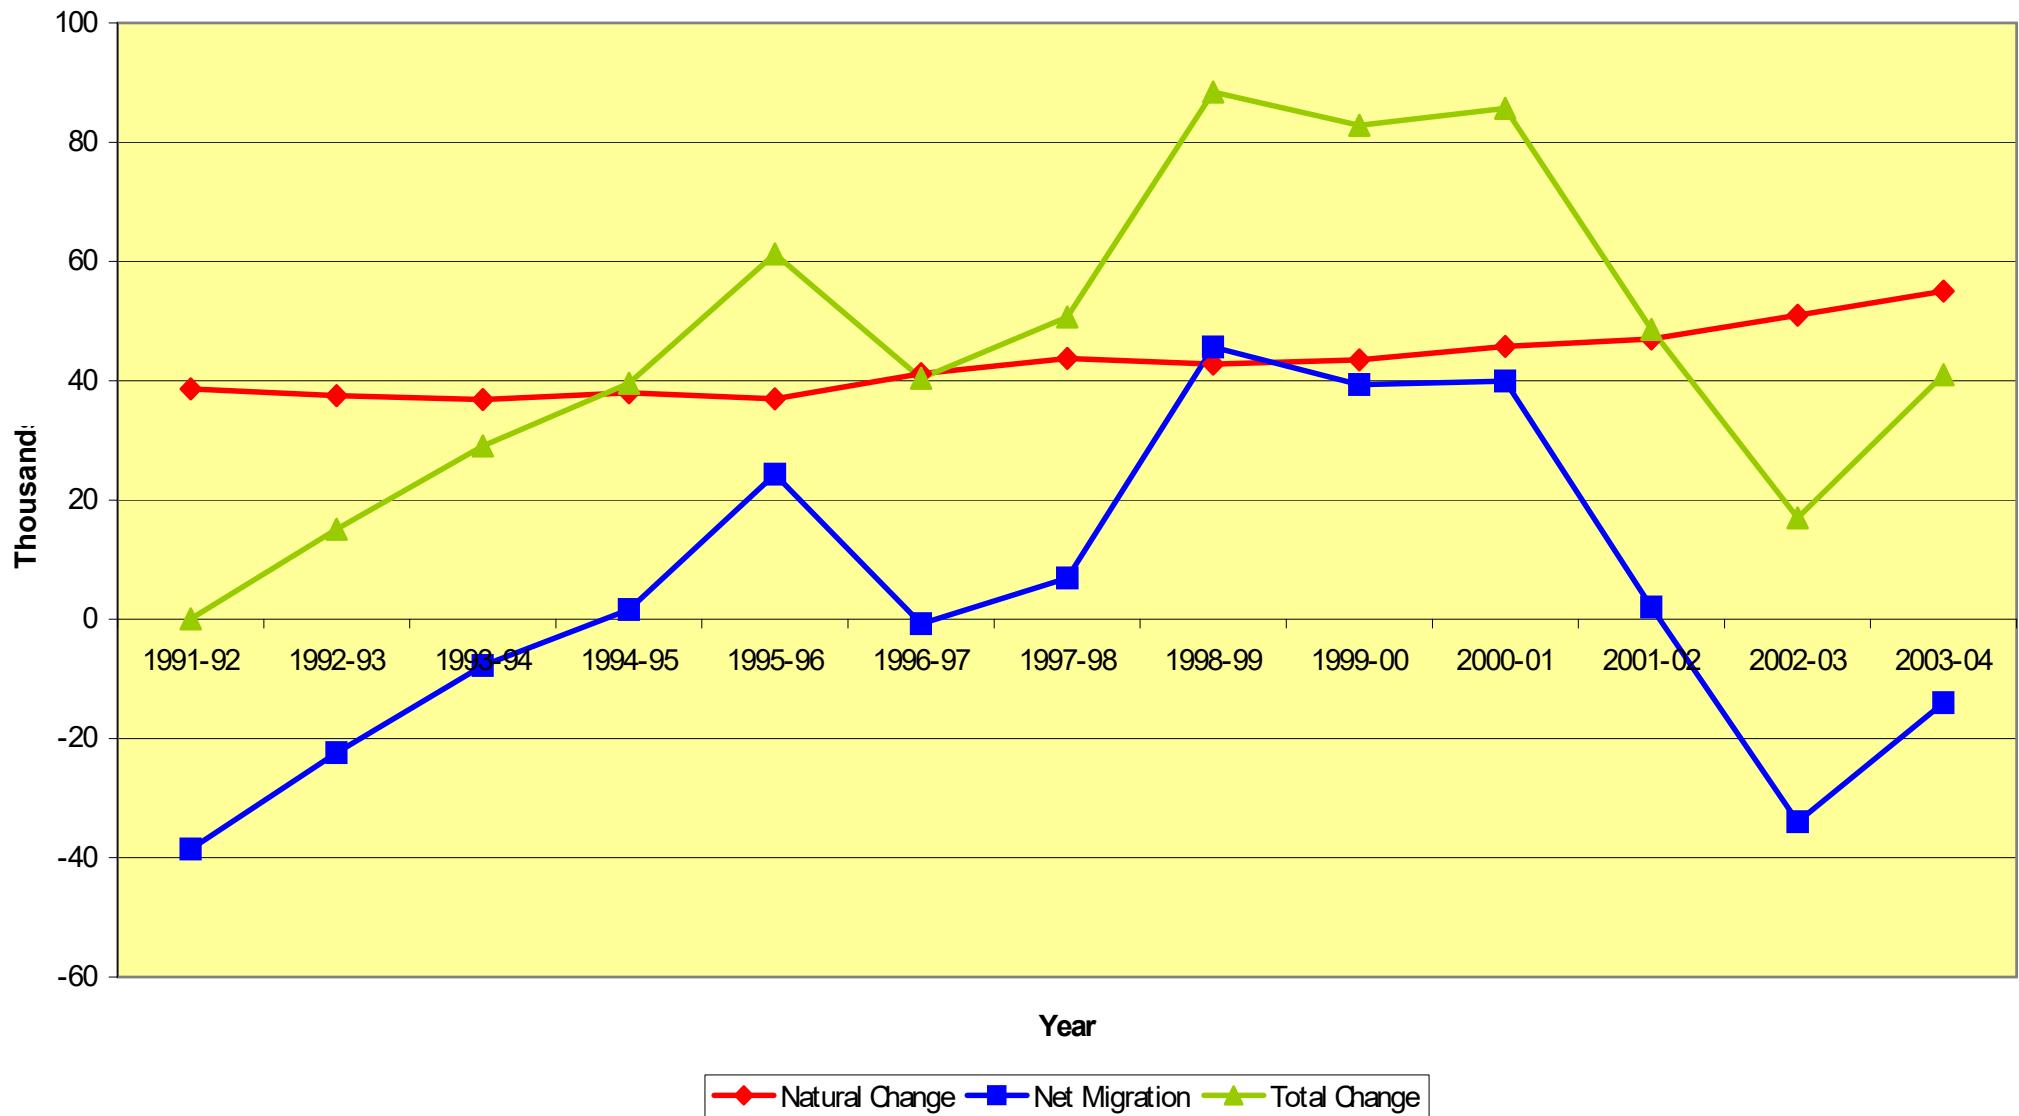

Boroughs: Population Change 1901-2001

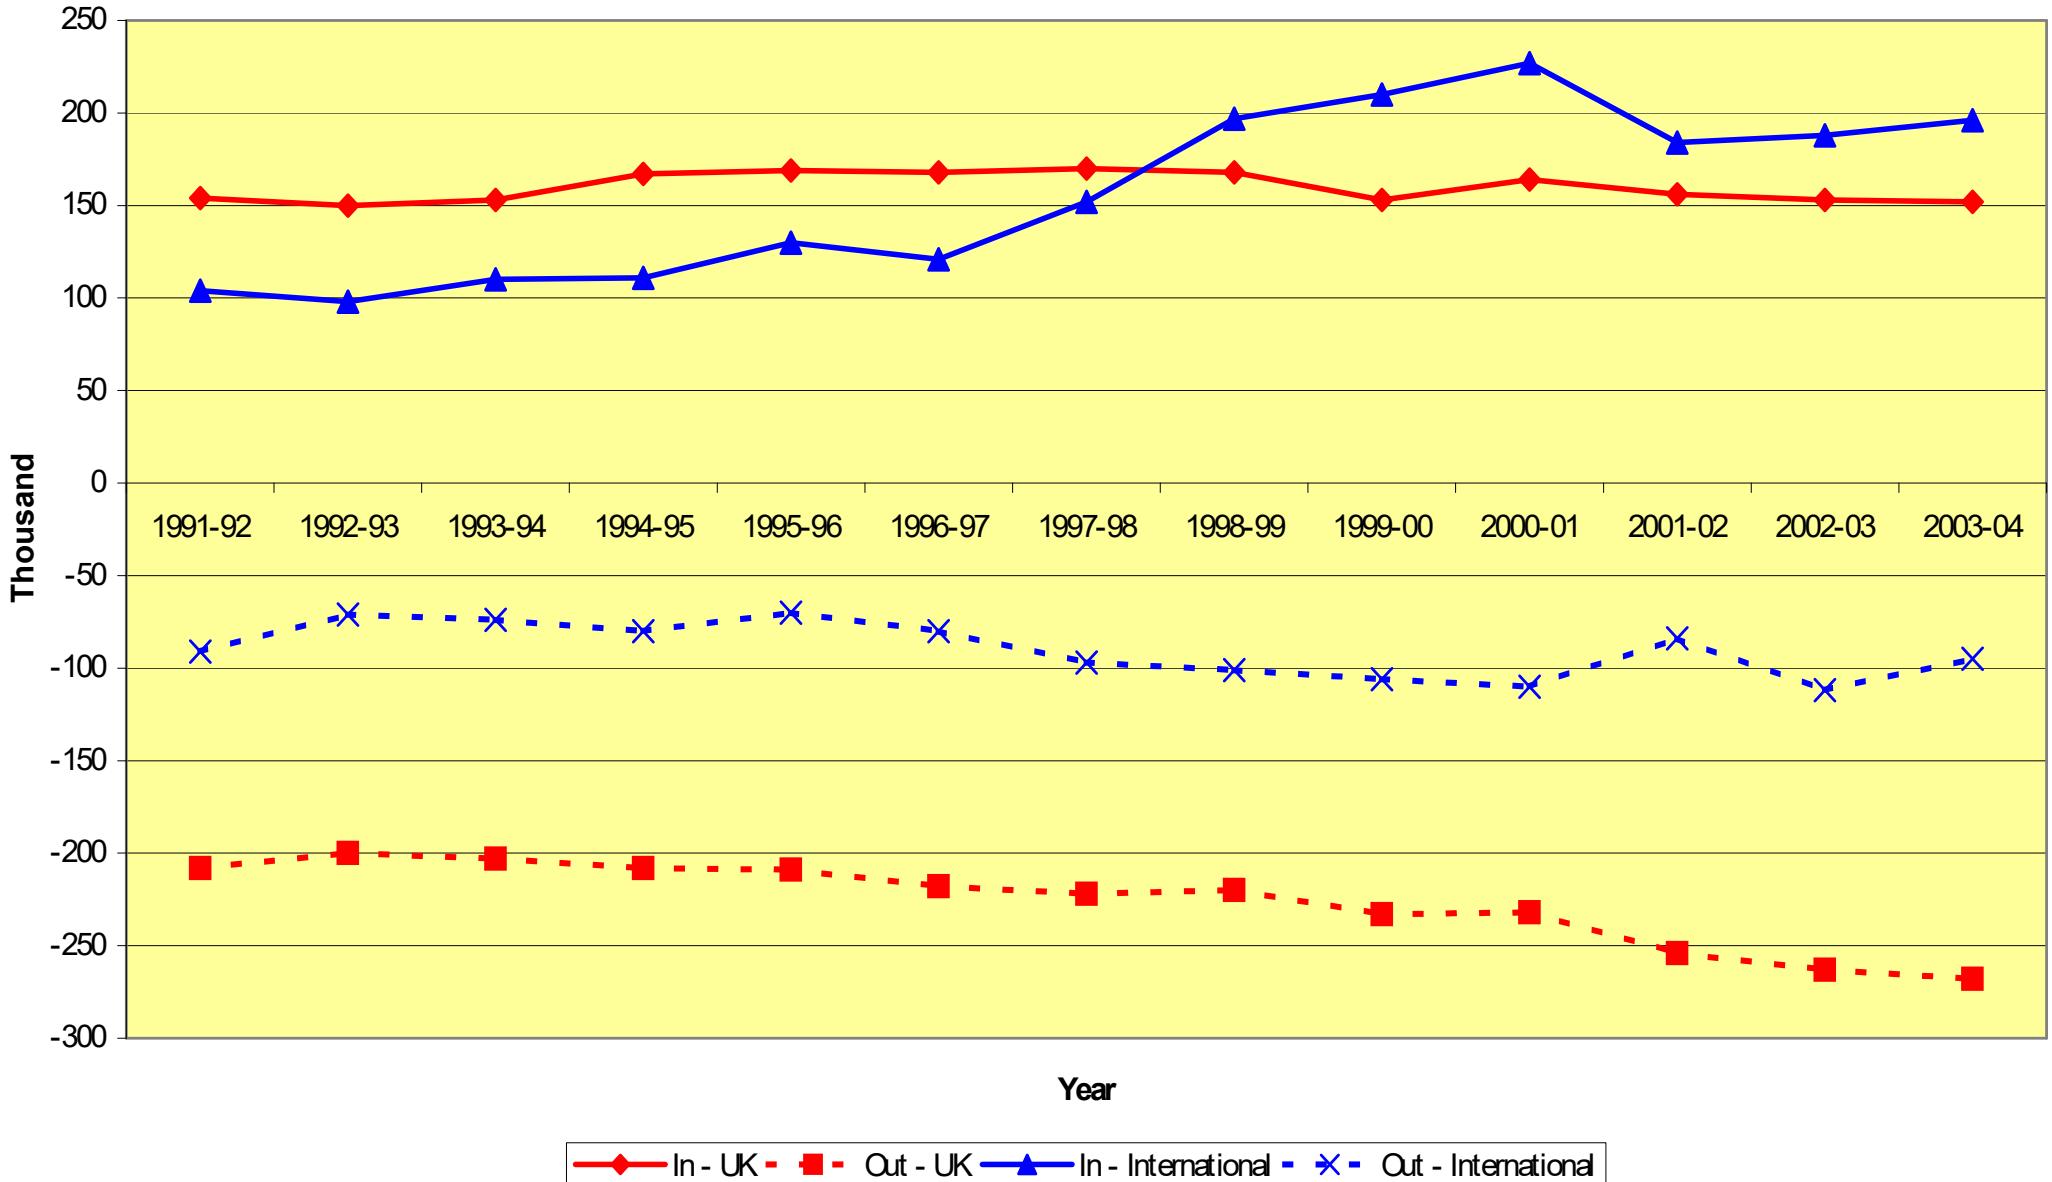

London: Natural Change: 1991-04

London: Population Change: 1991-04

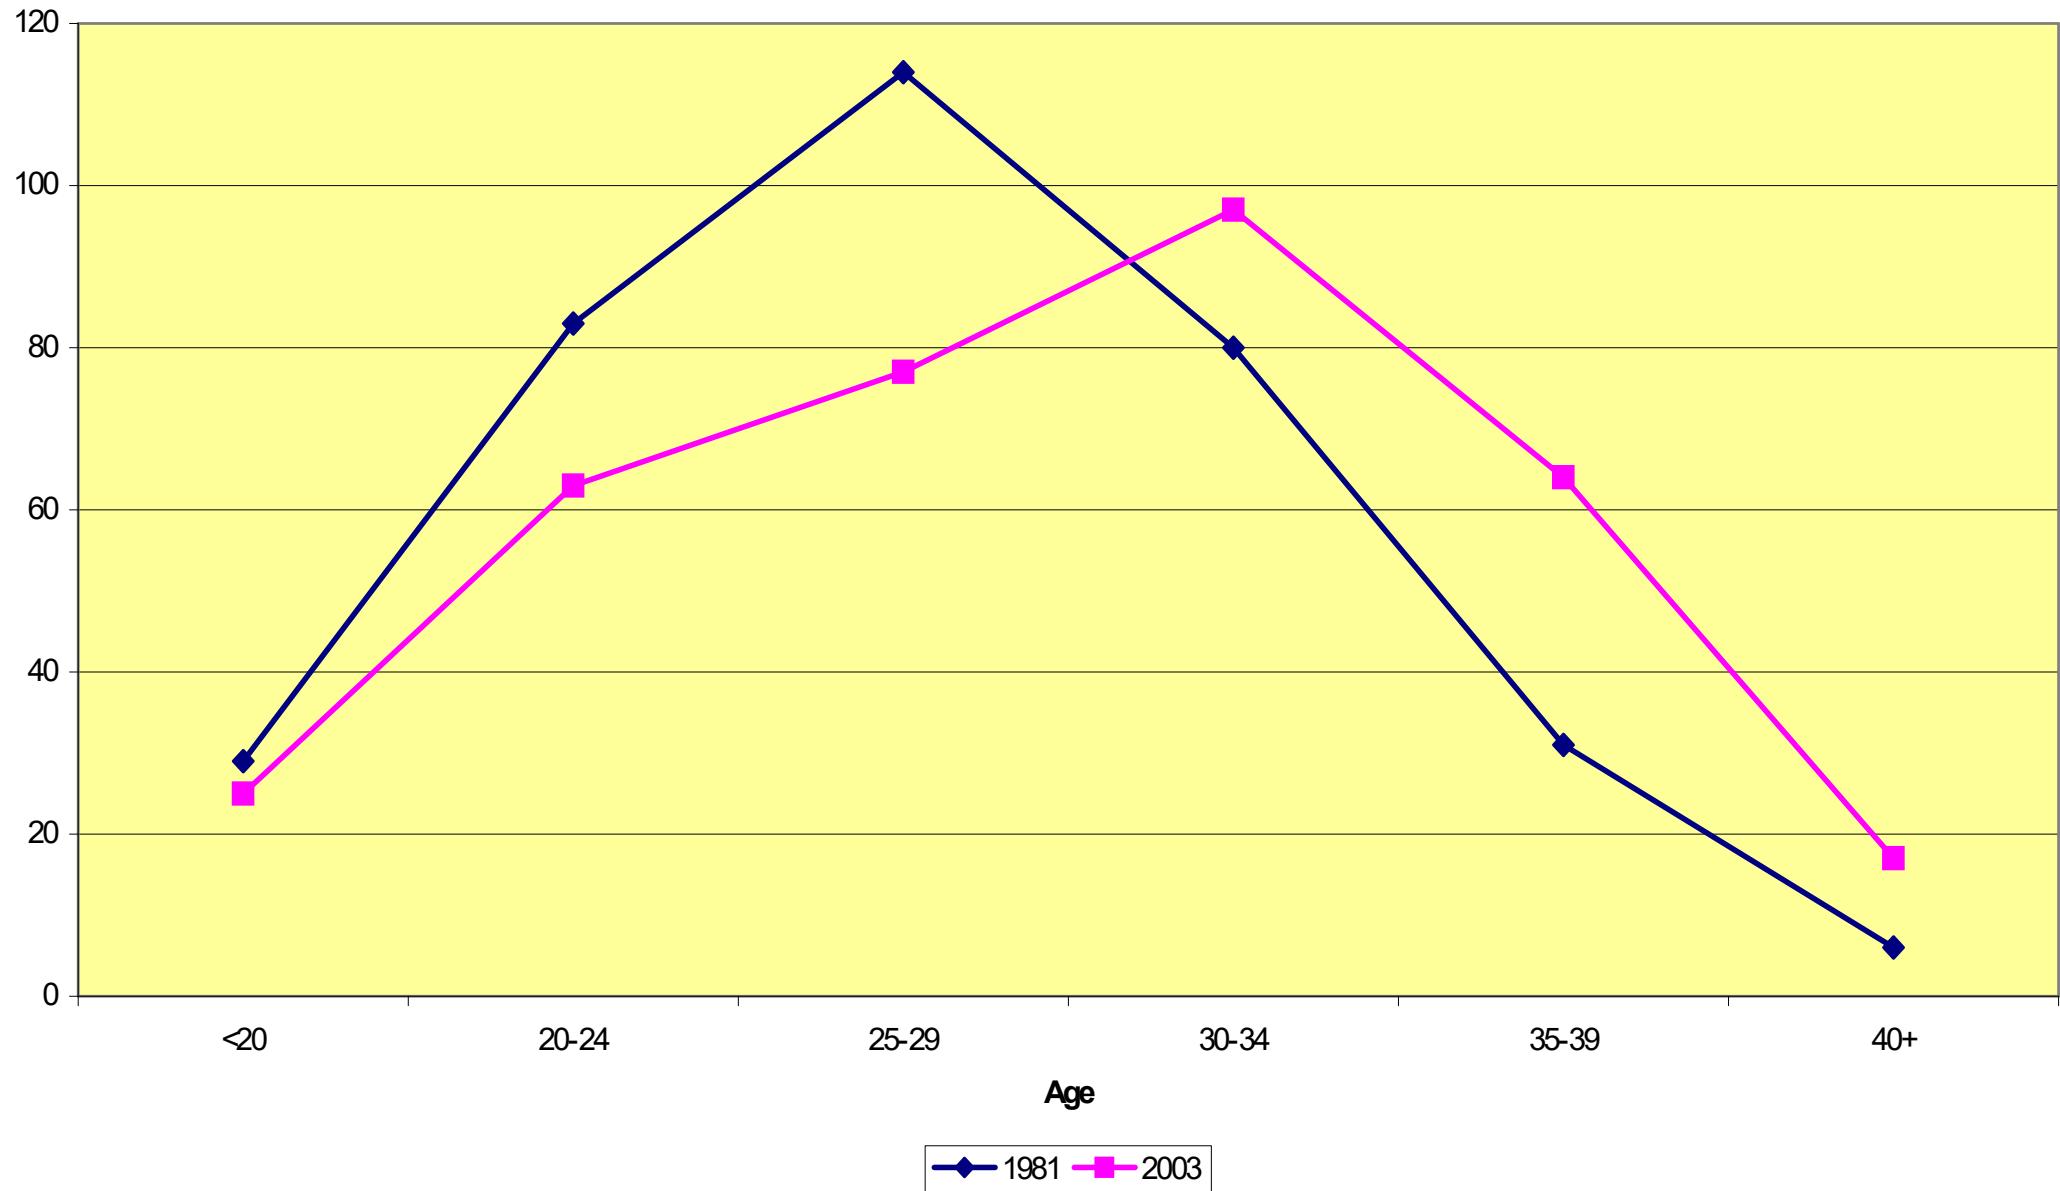

London: Migration Flows: 1991-04

Expectation of Life at Birth - years

	Males	Females
Ken & Chelsea	78.6	83.9
Harrow	78.1	83.0
Richmond	77.9	82.2
Barnet	77.7	81.8
London	75.9	80.8
Islington	73.7	79.3
Newham	73.5	78.9
Lambeth	73.4	79.4
Tower Hamlets	72.8	79.0

London: Age-specific fertility rates: 1981 & 2003

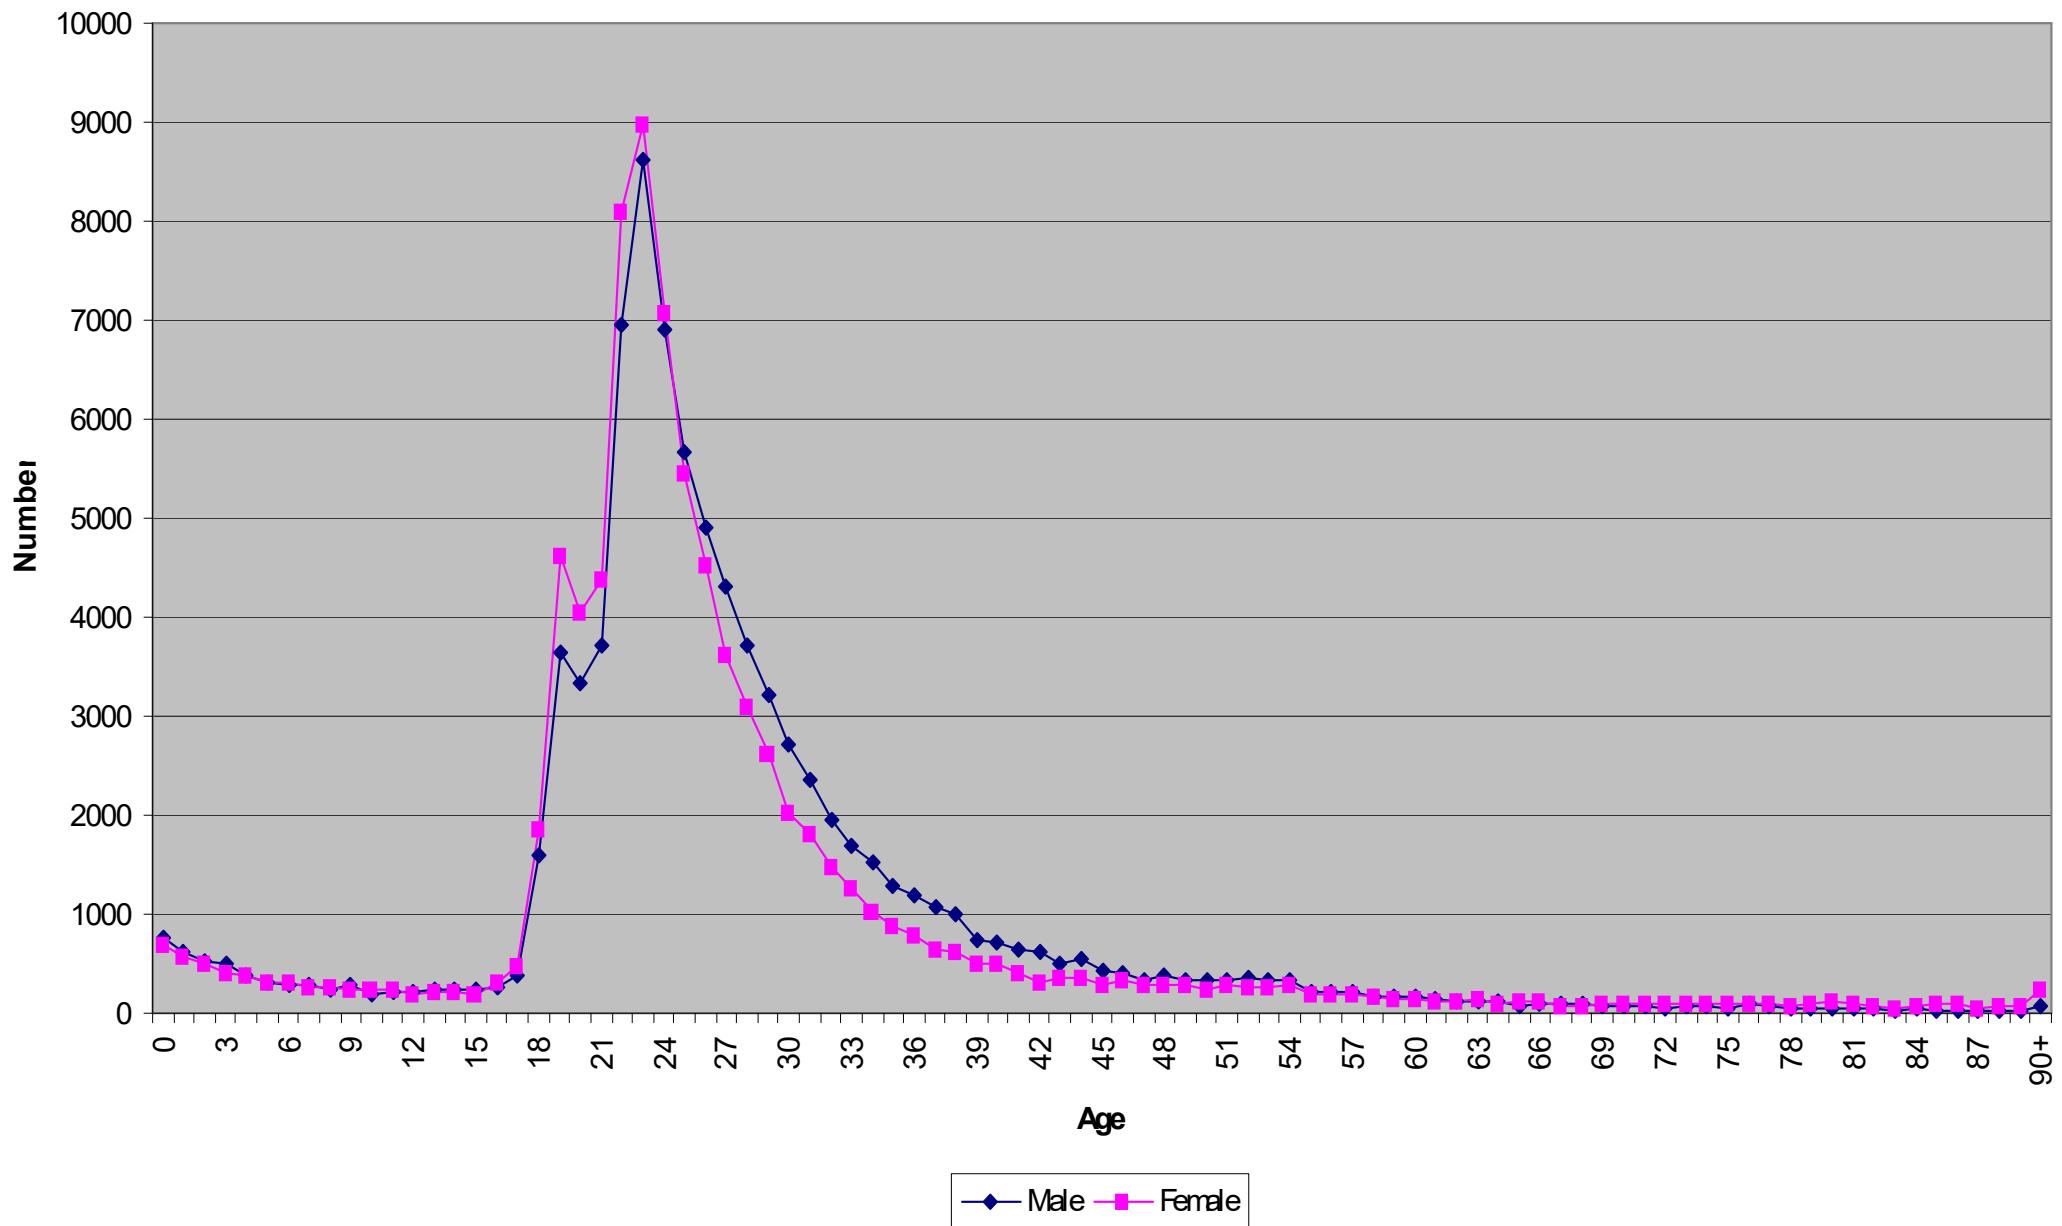

Boroughs: Total Fertility

• Newham	2.30 children per woman (through her life)
• Hackney	2.12
• Tower Hamlets	1.88
• Barking & Dagenham	1.88
• Wandsworth	1.35
• Camden	1.33
• K&C	1.28
• Westminster	1.27

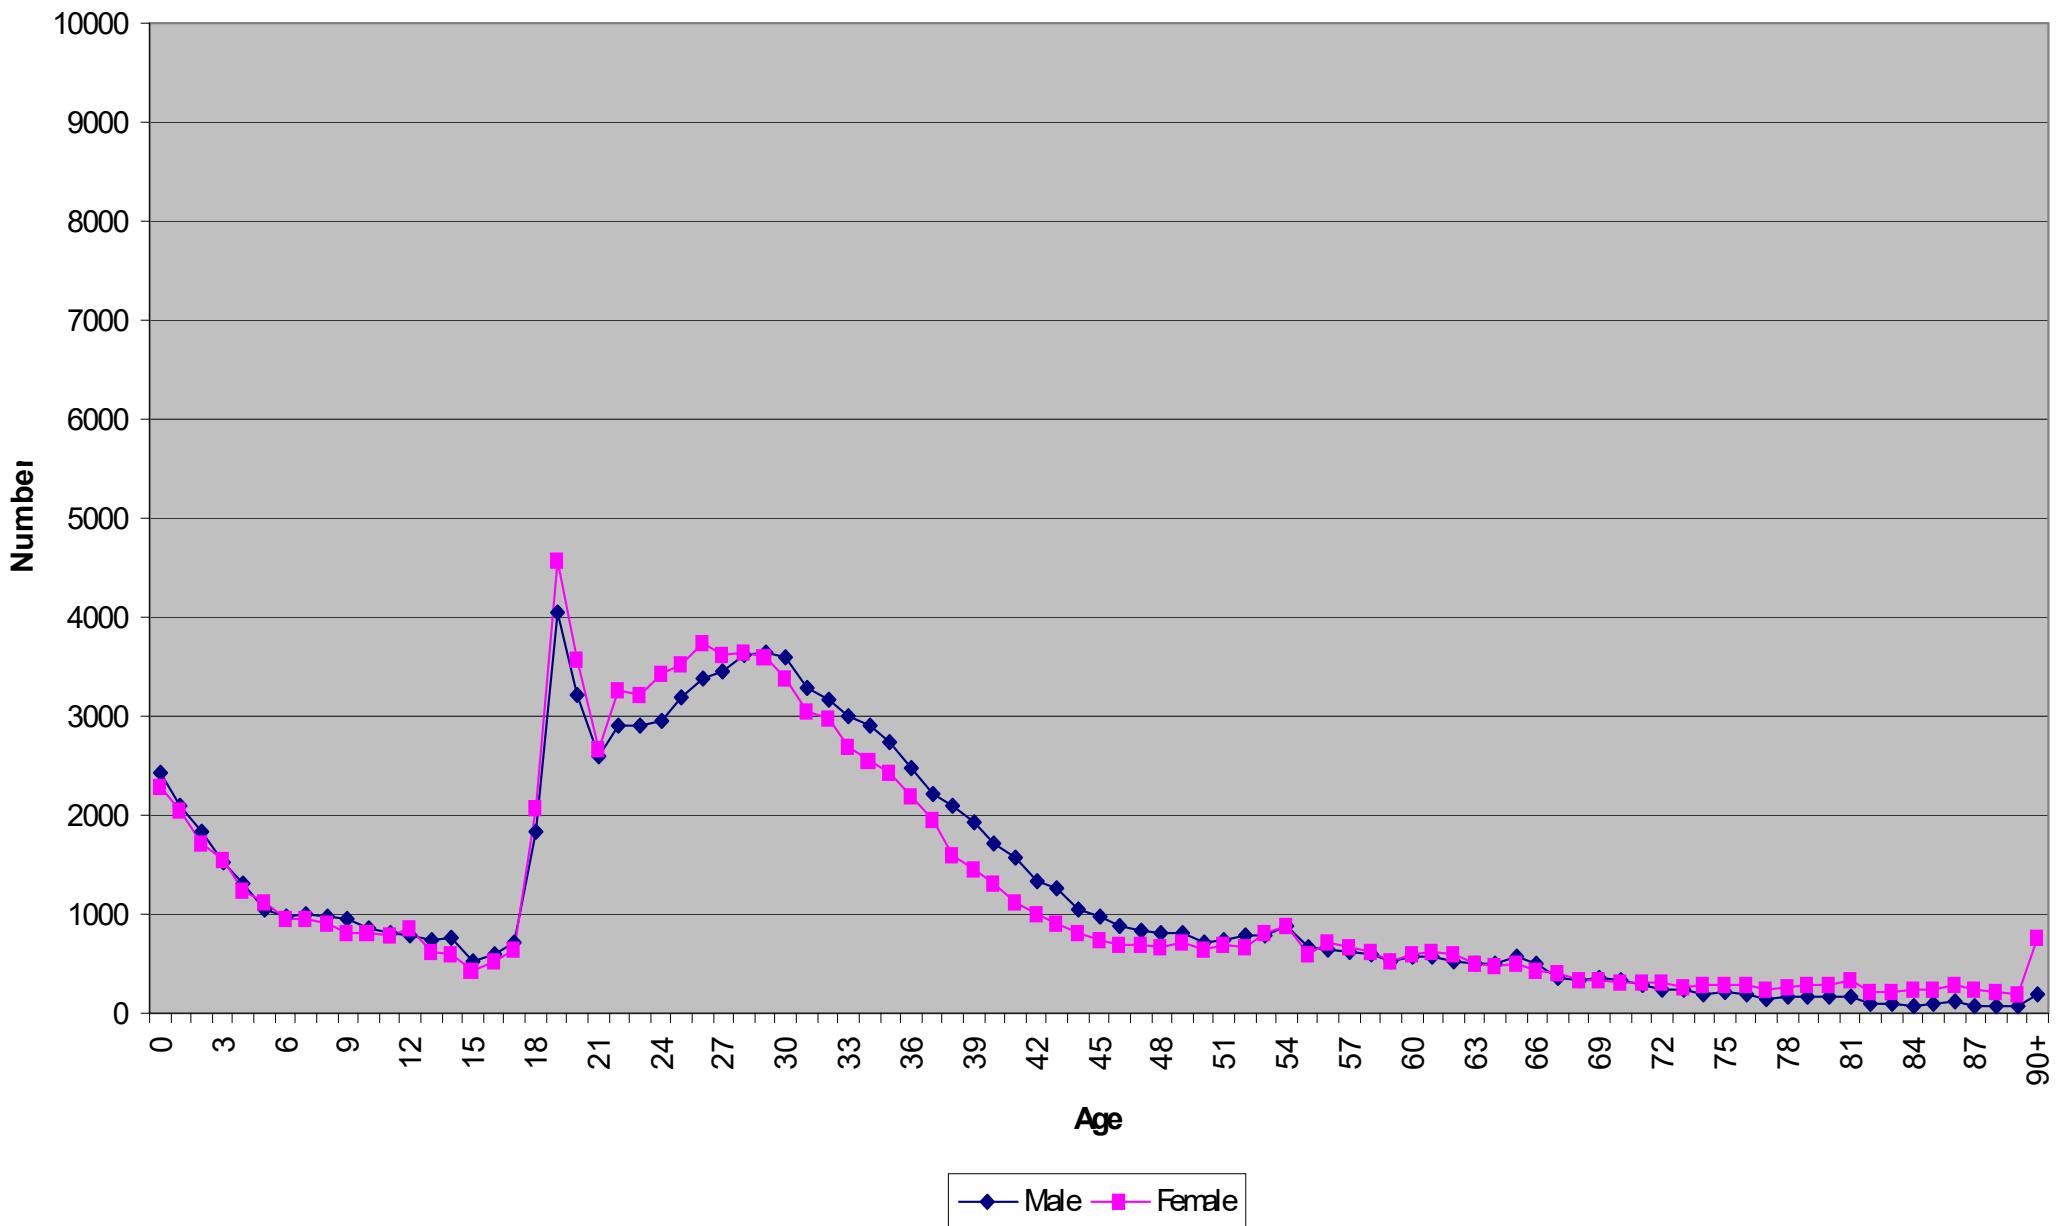

Mortality (2001)

- **Standardised Mortality Rates**
 - Number of actual deaths in an area compared to number expected if national age/gender specific death rates applied
 - 100 is ‘average’
- London = 98 ie about 2% better ‘health’ than UK
 - Inner = 105
 - Outer = 95
- Lambeth & Wandsworth (110) Lewisham (114) Newham (115) Tower Hamlets (119) Islington &
- K&C (73) Harrow (79) Richmond (86) Barnet (89) Bromley (90)

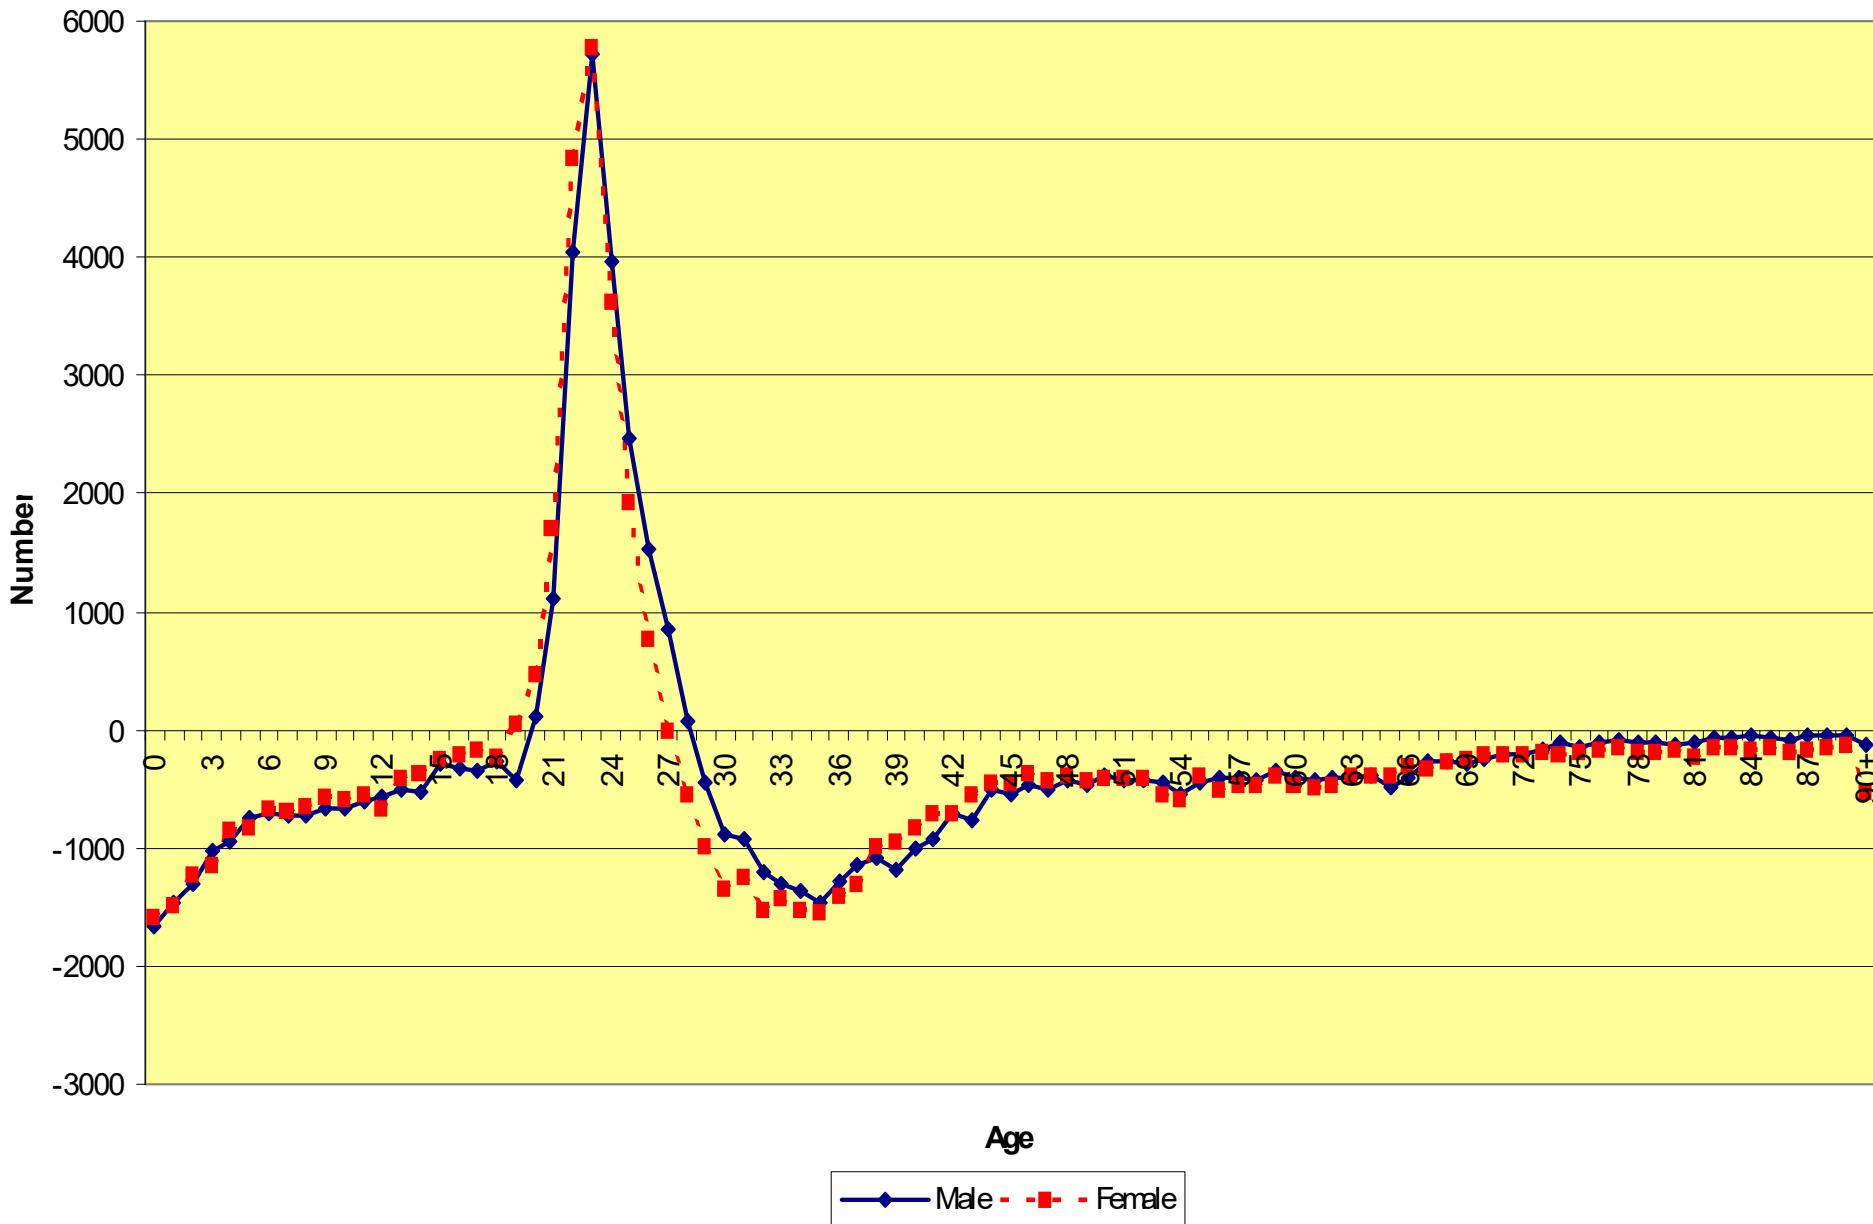

Migration from Rest UK to London by age/ gender 2000-01 (2001 Census)

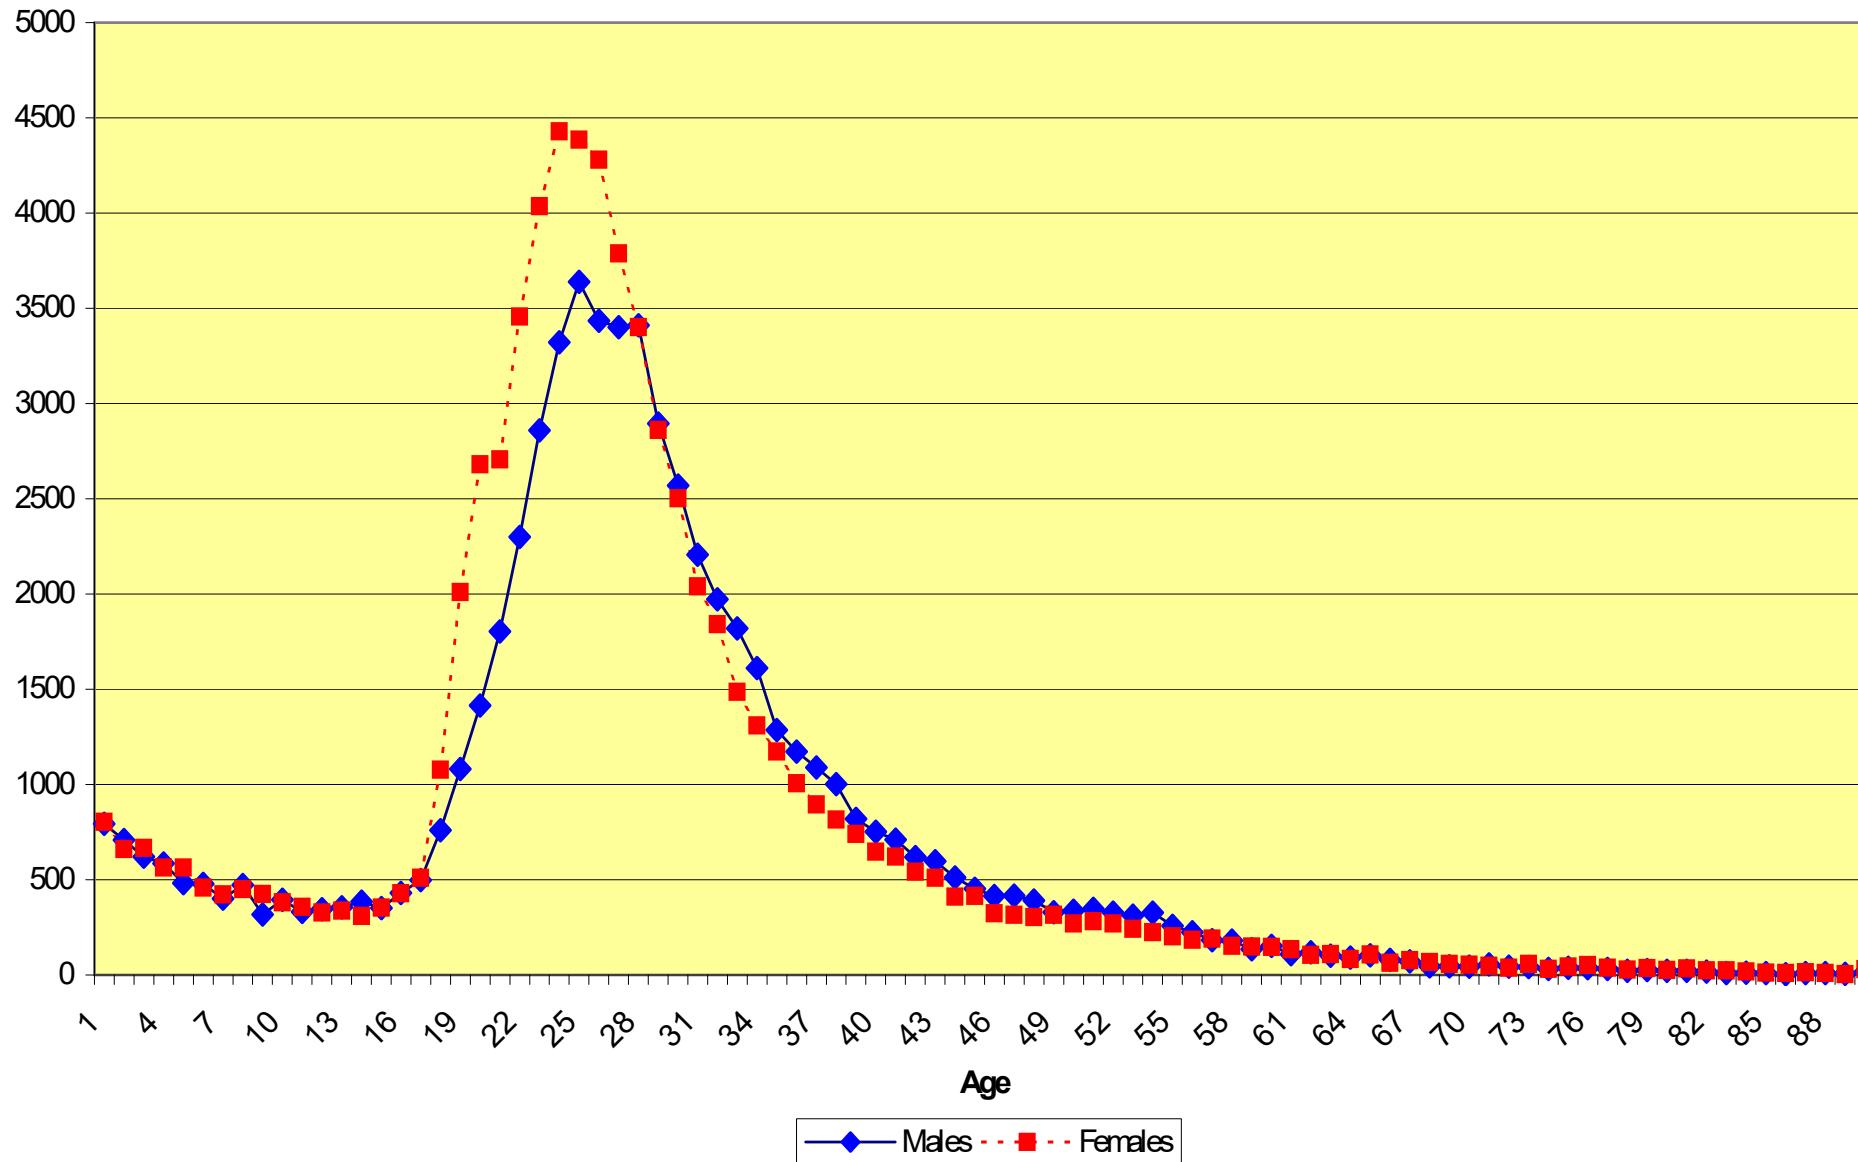

Migration from London to Rest of UK by age/ gender 2000-01 (2001 Census)

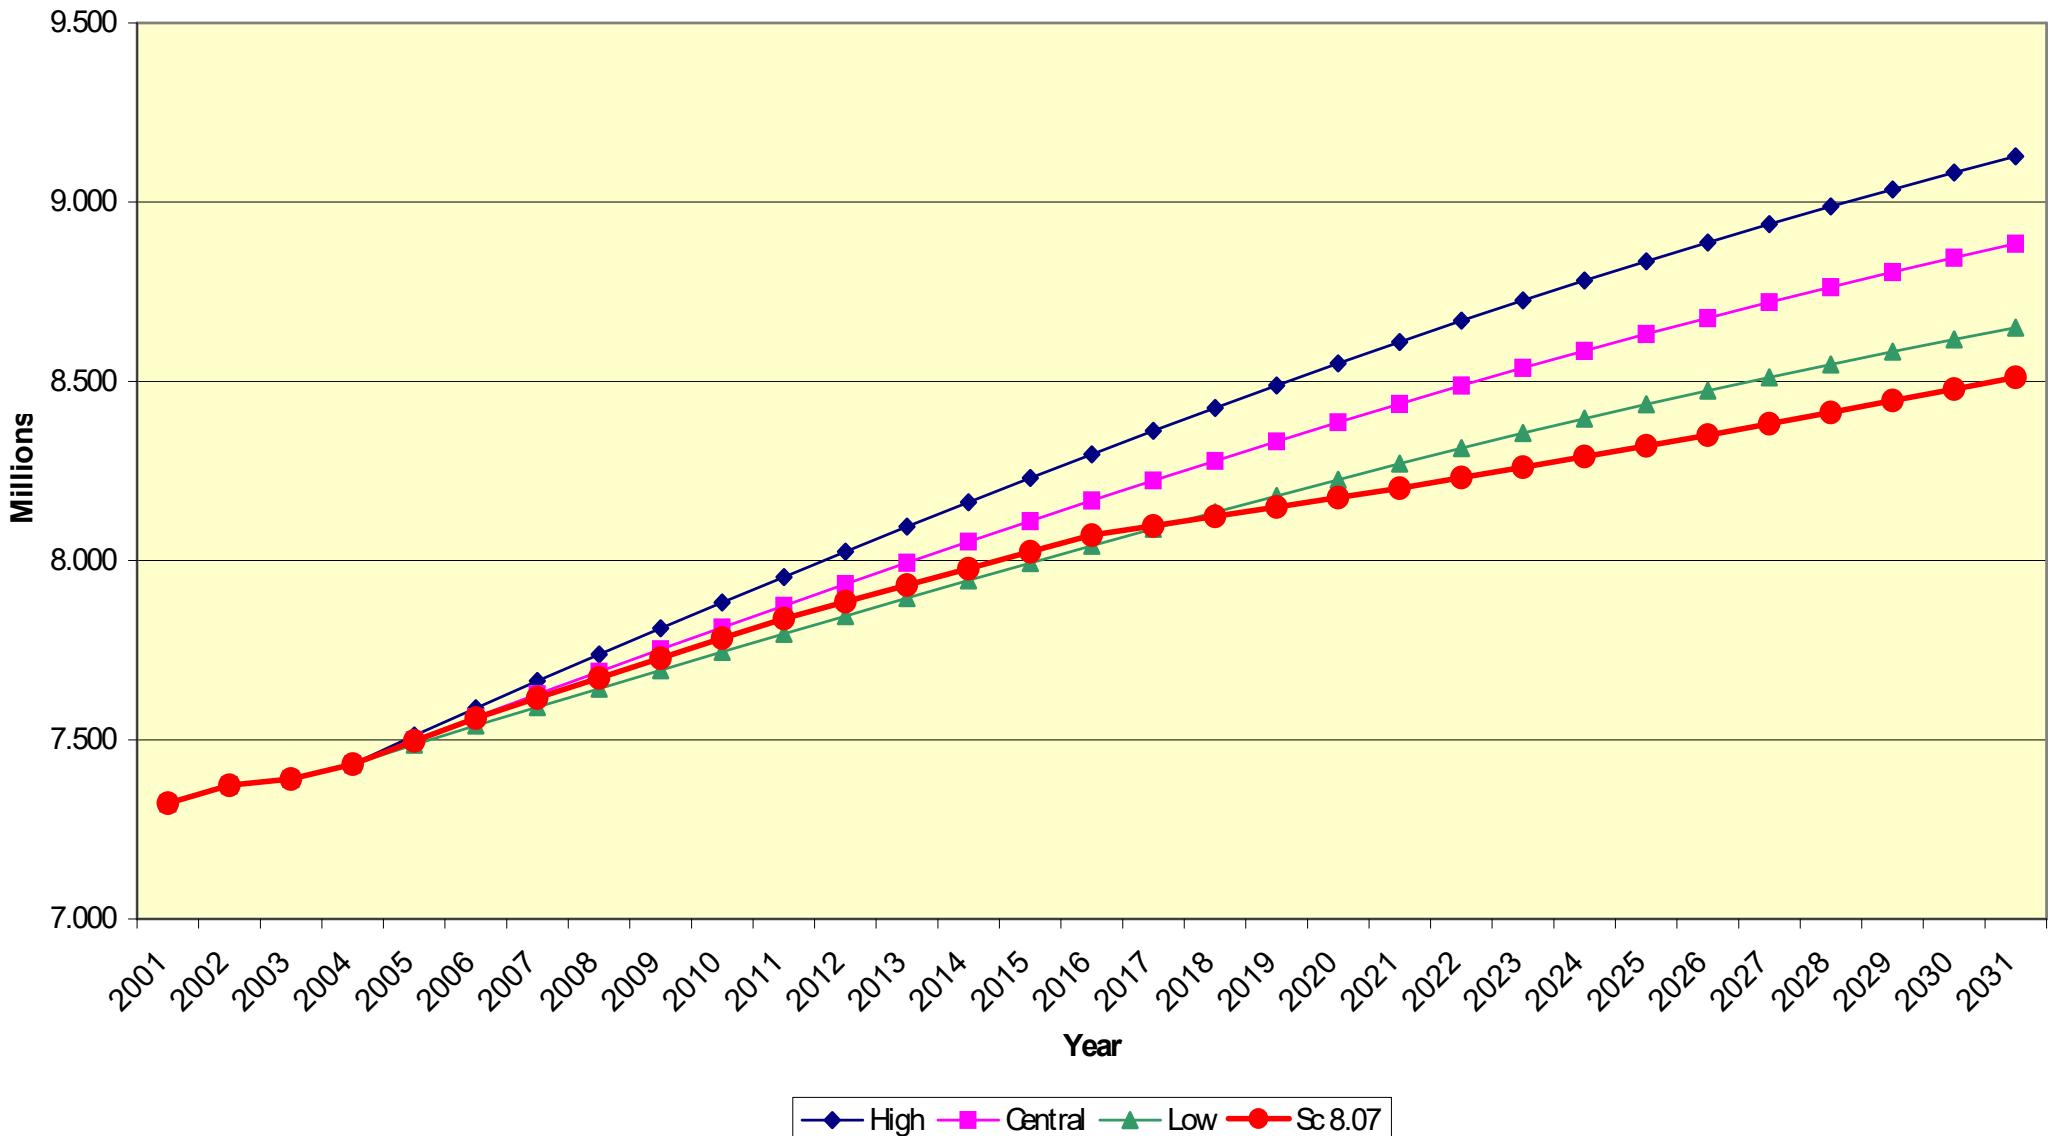

Net Migration from Rest UK to London by age/ gender 2000-01 (2001 Census)

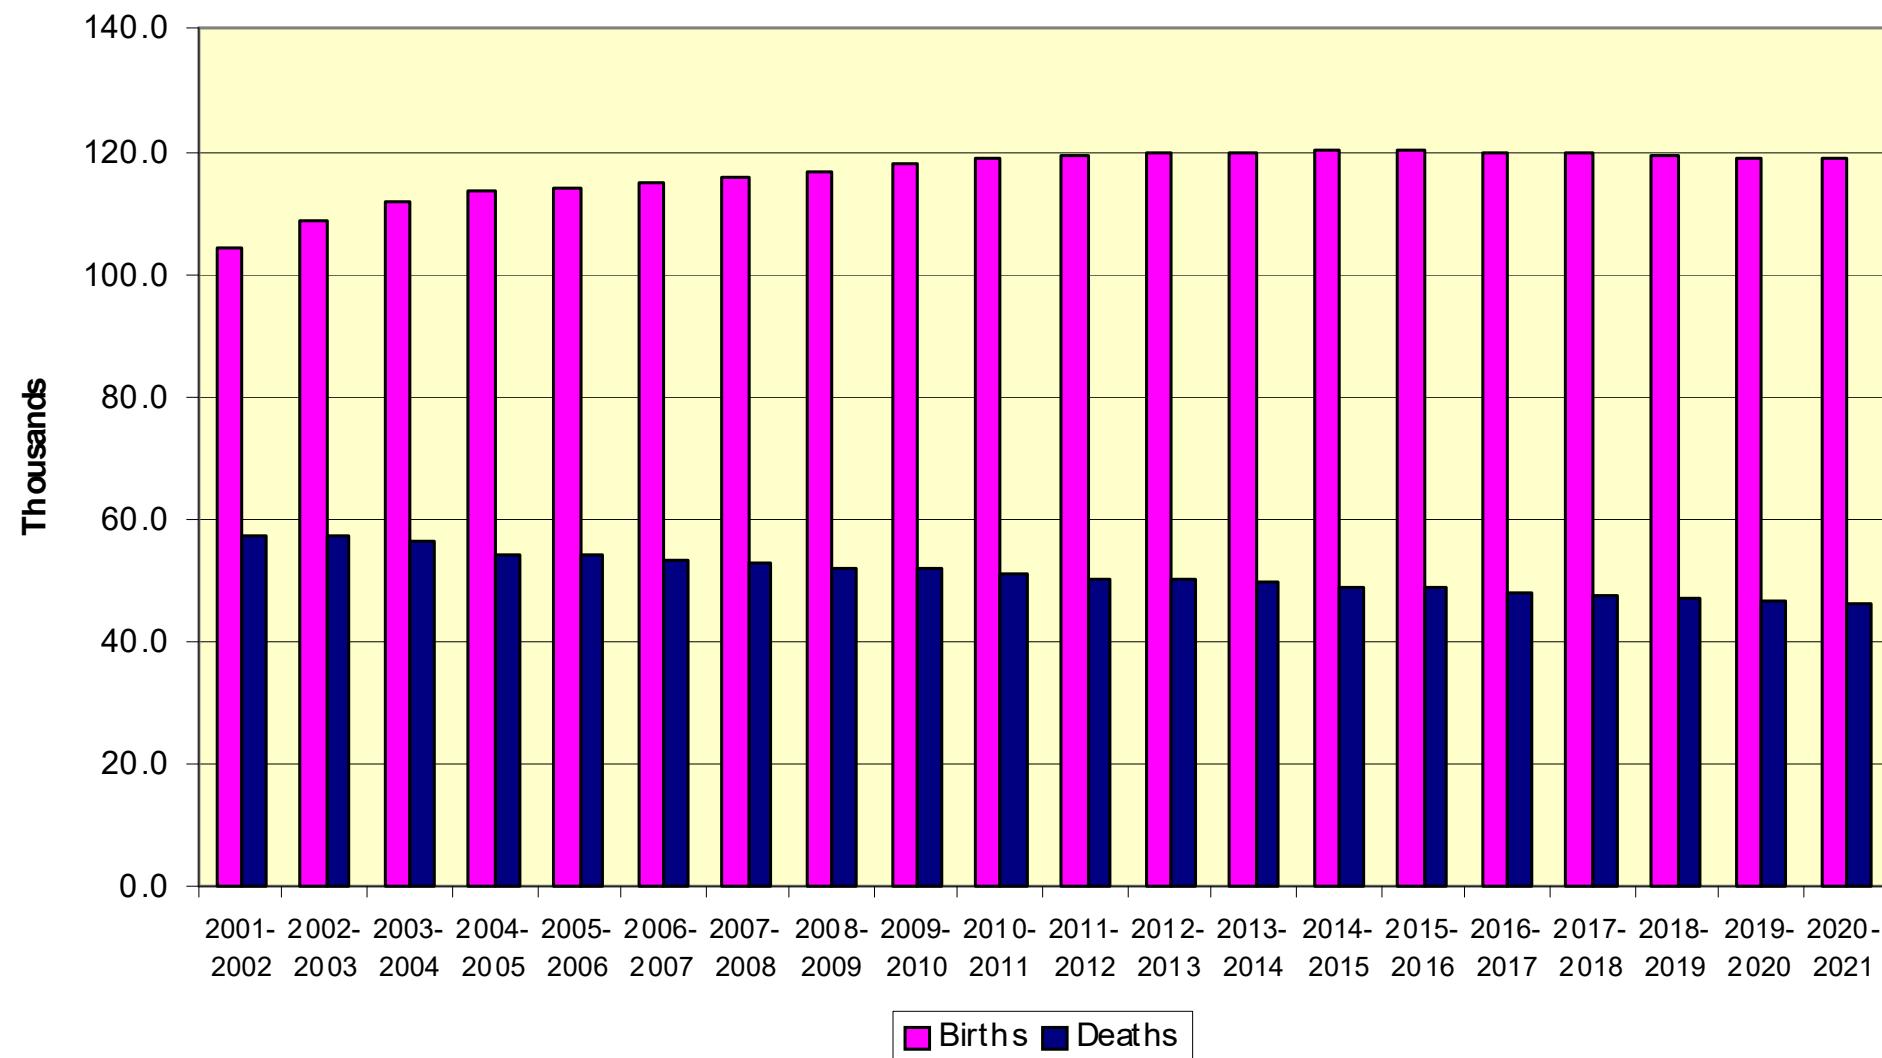

Migration: Rest of World to London: 2001 Census

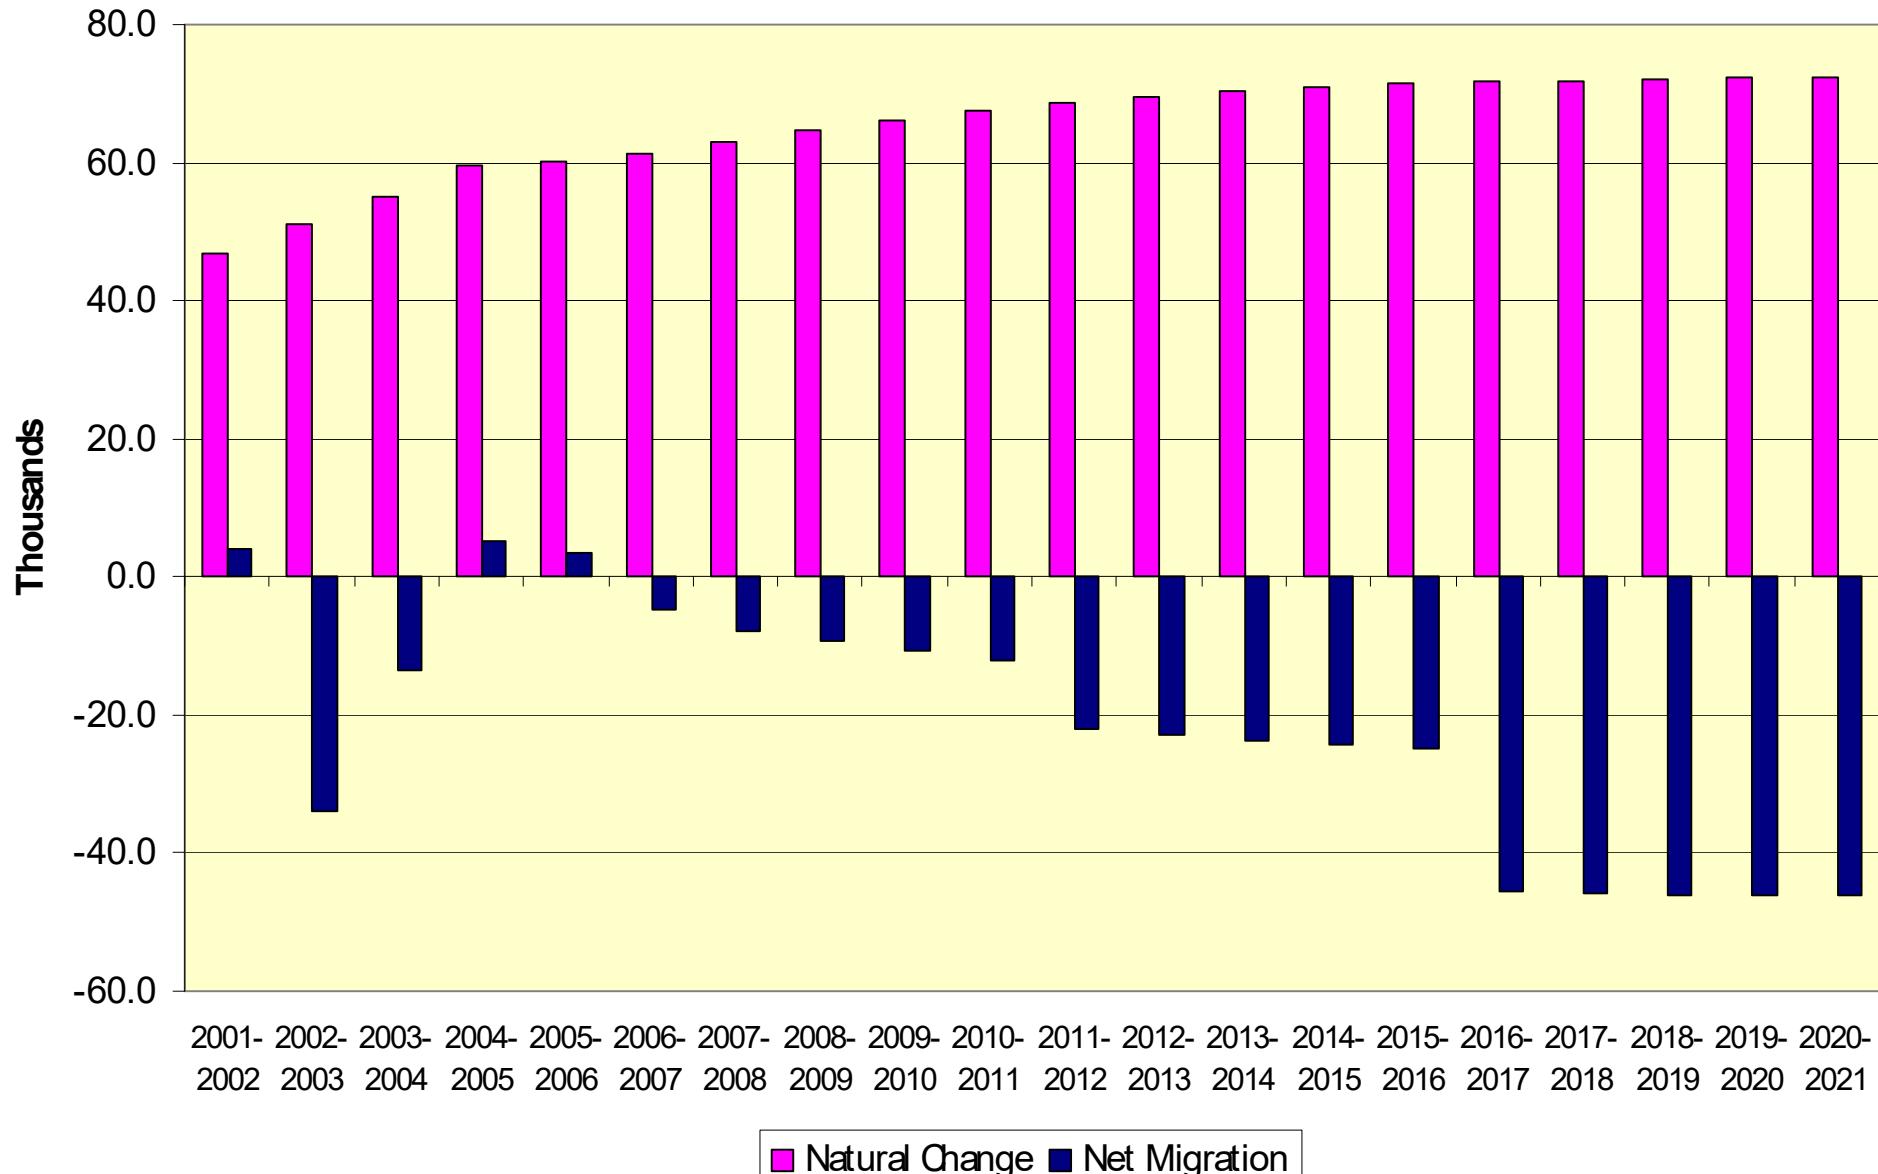

Variant Projections for London

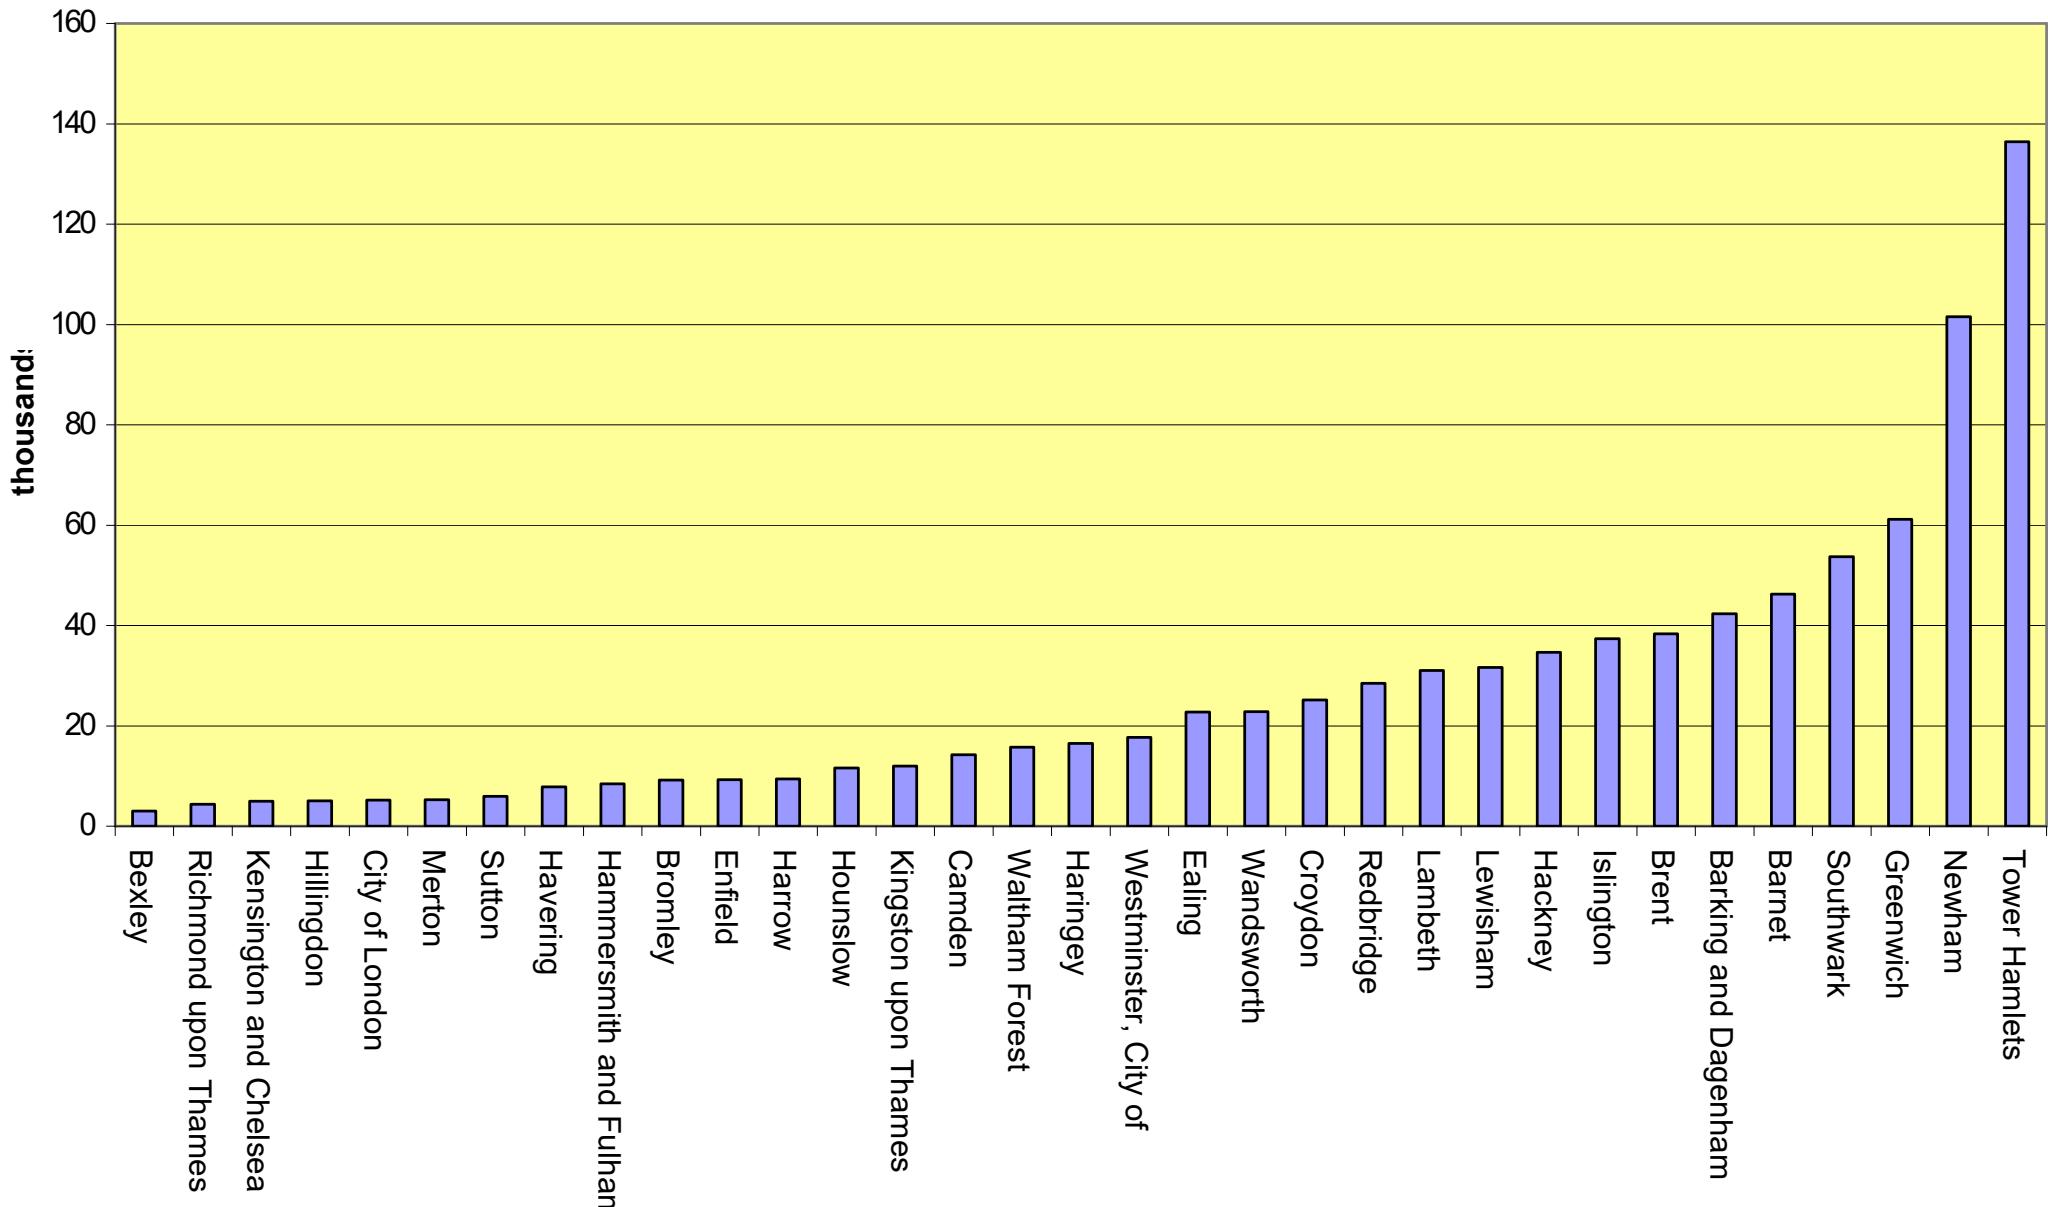

Scenario 8.07: Births and Deaths

Scenario 8.07: Components of change

Projected Population Change: 2001-21

Diversity in London

London in the national* context

14% of total population

44% of total BME population

LONDON

32 Boroughs & the City

649 Wards

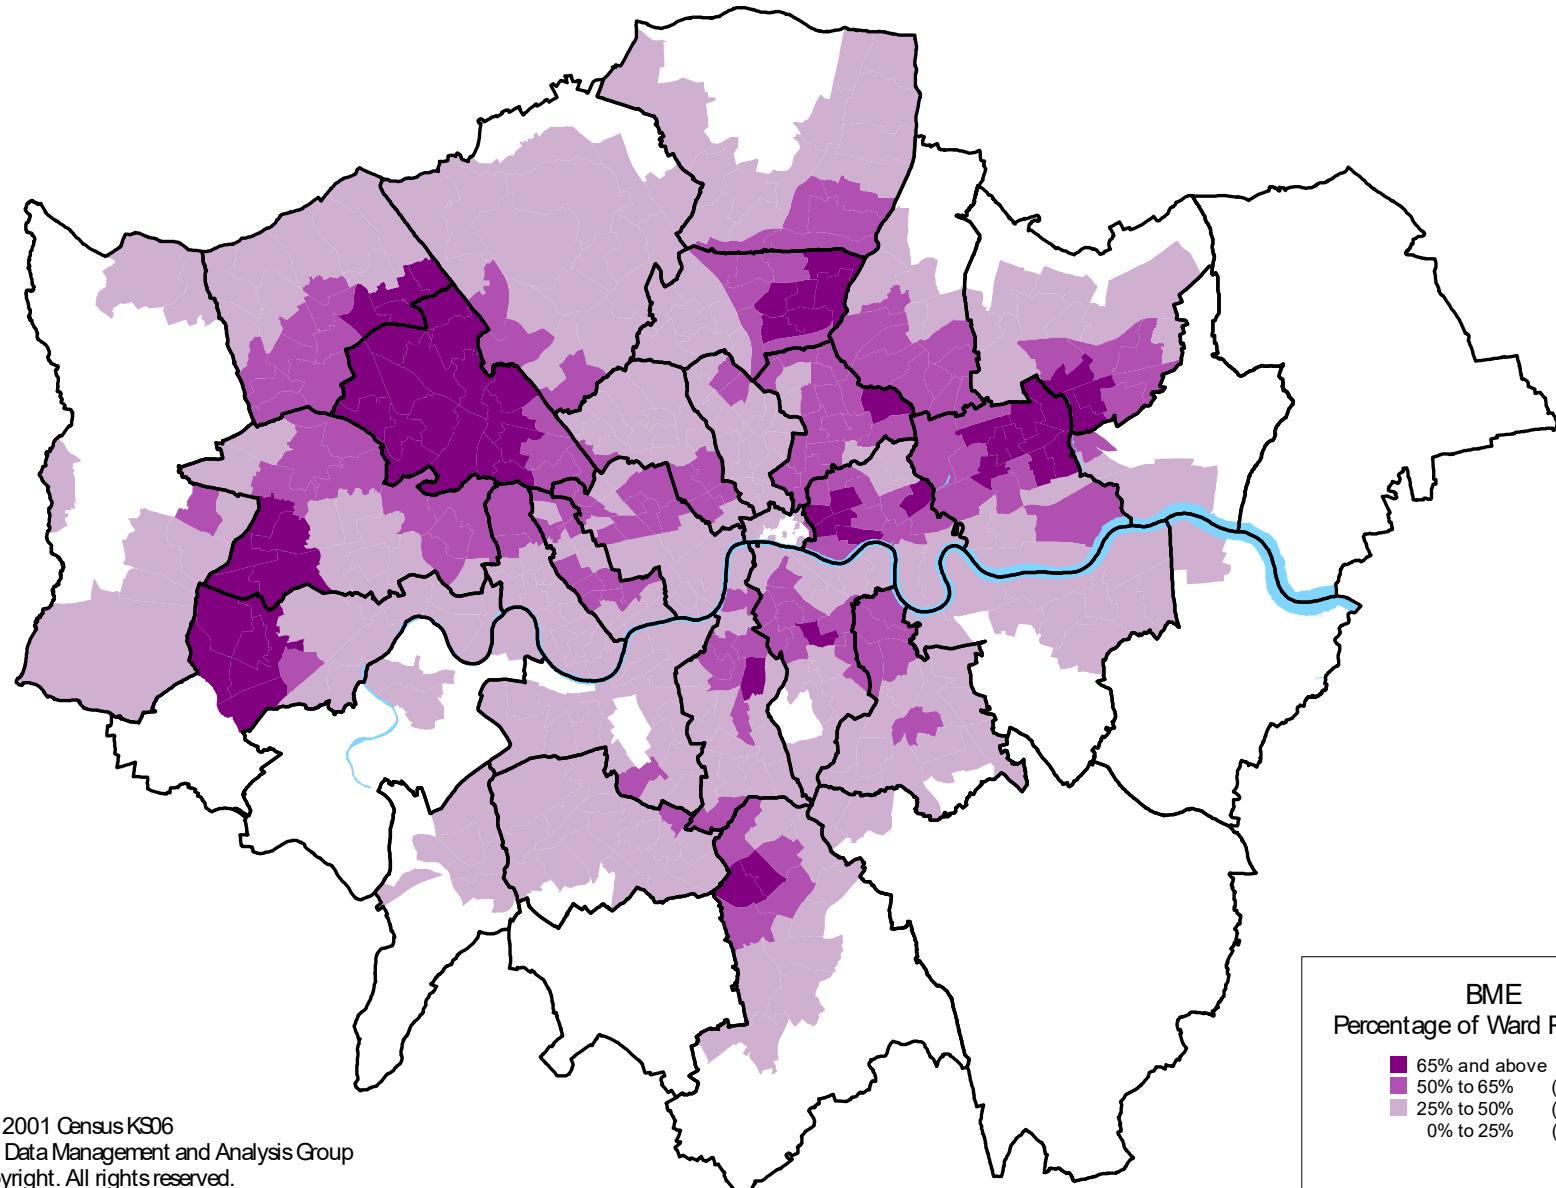

23% of Londoners aged <18

42% of total migrant population

An example of change

Diversity Indices

Aim: *To quantify and measure the ethnic diversity of London*

- Allow for national comparisons
- At borough and ward levels
- More statistically sophisticated

Simpson's Diversity Index

Richness & Equitability

Diversity Index Formula

$$D = \frac{1}{\sum \{(P_i)^2\}}$$

D = Simpson's Diversity Index

P = population in ethnic group i as a proportion of total population

Worked example 1

	Ethnic groups					Total
	White	Mixed	Asian	Black	Chinese and Other	
Population	5,103,203	226,111	866,693	782,849	193,235	7,172,091
P (i)	0.7115	0.0315	0.1208	0.1092	0.0269	
P (i) ²	0.5063	0.0010	0.0146	0.0119	0.0007	
$\sum P(i)^2$	0.5063 + 0.0010 + 0.0146 + 0.0119 + 0.0007					0.5345

$$D = \frac{1}{0.5345} = 1.871$$

Worked example 2

	Ethnic groups					Total
	White	Mixed	Asian	Black	Chinese and Other	
Population	100	100	100	100	100	500
P (i)	0.200	0.200	0.200	0.200	0.200	
$P(i)^2$	0.040	0.040	0.040	0.040	0.040	
$\sum P(i)^2$	$0.0400 + 0.0400 + 0.0400 + 0.0400 + 0.0400$					0.200
$D = \frac{1}{\sum P(i)^2}$	5.0					

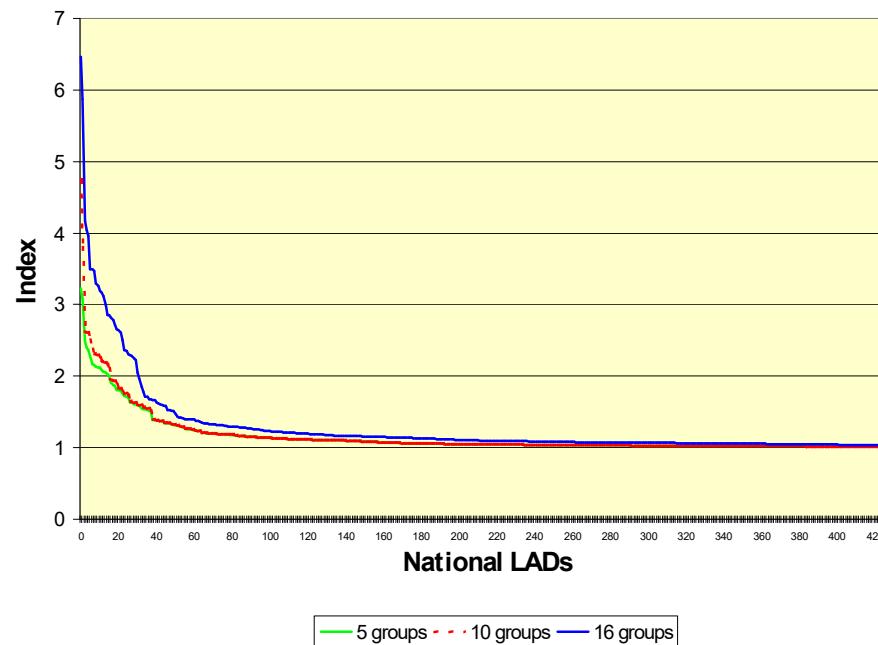

Methodology

- » Application to 3 aggregates of 2001 Census ethnic groups (16, 5 & 10)
- » All LADs in England & Wales
- » All wards in England & Wales
- » Rankings of Diversity Index

Results 1

	5 groups	10 groups	16 groups
England and Wales	1.196	1.198	1.303
Greater London	1.871	1.931	2.660

Simpson's Diversity Indices: Ranked

National Ethnic Diversity Rankings, Top 20

E&W = 1.303

London = 2.660

Rank	Local Authority	Simpson's Index
1	Brent	6.463
2	Newham	5.871
3	Hackney	4.174
4	Ealing	4.044
5	Haringey	3.958
6	Lambeth	3.497
7	Westminster	3.469
8	Tower Hamlets	3.296
9	Harrow	3.264
10	Southwark	3.194

12	Kensington and Chelsea	3.118
13	Waltham Forest	2.992
14	Islington	2.857
15	Hounslow	2.857
16	Lewisham	2.823
17	Redbridge	2.782
18	Hammersmith and Fulham	2.716
19	Slough UA	2.648
20	Barnet	2.614

Mapping London's Diversity Indices

Very high

Index value is greater than the mean plus 1.5 standard deviations

High

Index value is between the mean plus half and 1.5 standard deviations

Average

Index value is the mean plus or minus half the standard deviation

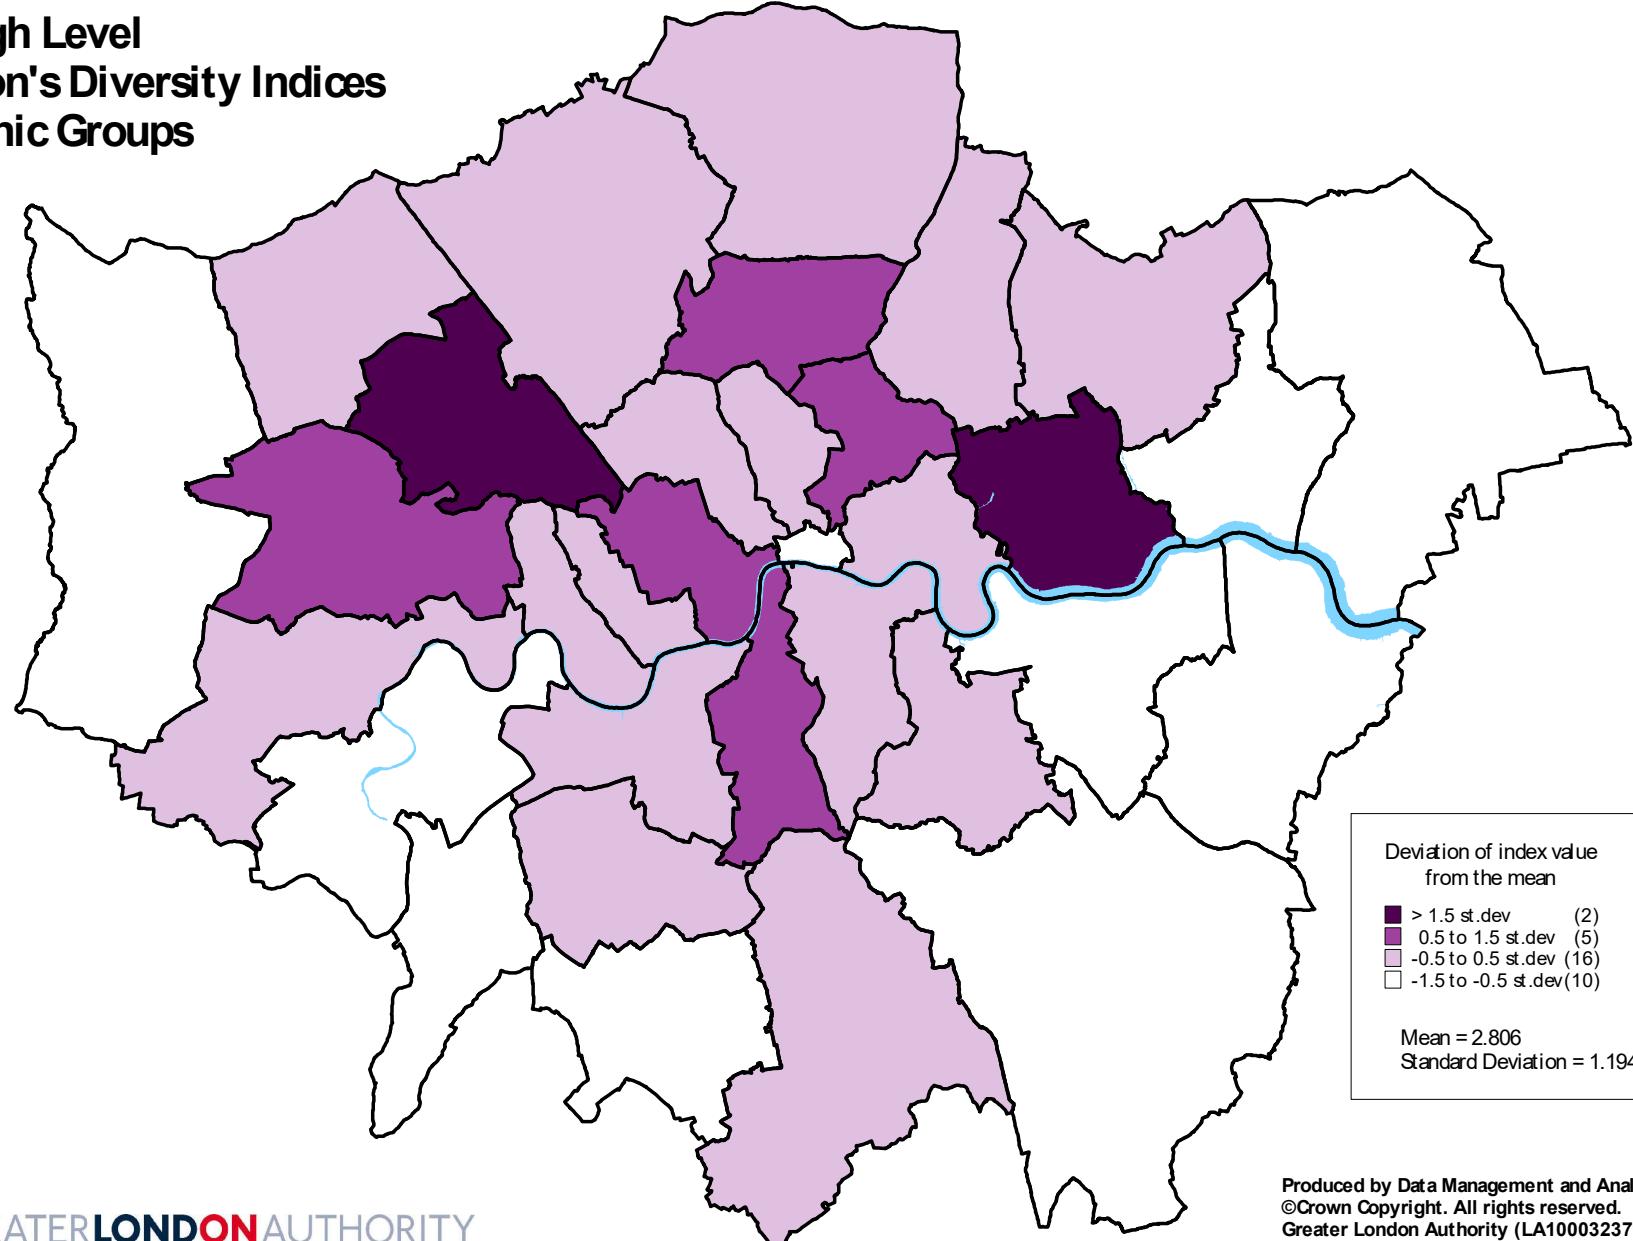

Low

Index value is between the mean and minus half and minus 1.5 standard deviations

Very Low

Index value is less than the mean minus 1.5 standard deviations

Patterns of Ethnic Segregation in London

Media Debate – ‘Ghetto’

The ‘new geography’ of ethnicity in Britain

Dr Michael Poulsen

“Sleepwalking our way to segregation”

Trevor Phillips

Post 7/7

Need for London specific analysis at a more appropriate geography.

What we did

- Take Poulsen's criteria and applied at the ward level nationally for 2001.
- Comparison between 1991 and 2001 for London
- Three criteria for segregation are:
 - 1) Where the host population (White) forms less than a third of the total population of the ward this is referred to as a ***mixed enclave***.

If this condition is satisfied then:

- 2) The population of the ward from an ethnic group other than White must have one dominant ethnic community that comprises more than two thirds of the population of that ward. This is known as a ***polarised enclave***.

If this condition is satisfied then:

- 3) The dominant ethnic community is present in that ward such that over 30 per cent of the community living in the local authority district are present in this ward. This is an ***extreme polarised enclave***, more commonly referred to as a ‘ghetto’.

Results 1

- 20 wards in London that fulfil the first criteria where over two-thirds of the population is from an ethnic group other than White.
- No wards go on to fulfil the second of the three criteria.
- Two wards outside London, in Latimer in Leicester and Whitefield in Pendle fulfil the first two of the three criteria as ‘polarised enclaves’.

Results 2

- No wards in England or Wales fulfil all three criteria therefore there are no ‘extreme polarised enclaves’, commonly referred to as ghettos.
- This is the case in both 1991 and 2001 in London

Results 3

- Since 1991 there has been an increase in the number of wards which have ethnic minority populations of over 66.6 per cent, from seven in 1991 to 20 in 2001.
- Segregation has declined over the decade since in 1991 there was one London ward that fulfilled the first two criteria of segregation, Southall Broadway. In 2001 there were no London wards that fulfilled both criteria.

Results 4

- Two wards, Southall Broadway and Spitalfields & Banglatown, with high proportions of ethnic minority communities in 1991 saw a decline in the proportions of these communities in 2001.
- Evidence of dispersal is present in these analyses, eg Little Ilford in Newham

Table 1: Wards in England and Wales ranked by highest proportion of population from an ethnic group other than White

Rank	Ward	LAD	EGOTW	% 88.1	Indian 54.2	Pakistani 11.2	Bangladeshi 0.7	Asian 10.3	Other 2.8	Black		Black		Chinese 0.2	Other 3.4
