**Update** 01-2011 February 2011

# 2010 Round Demographic Projections using the 2009 SHLAA

### **Background**

In August 2010 revised London Plan and SHLAA borough projections were published as *GLA Intelligence Updates 16–2010 and 17–2010*. These were part of the GLA 2009 round of demographic projections and incorporated the housing targets in the draft replacement *London Plan* (October 2009) and the 2009 Strategic Housing Land Availability Assessment (SHLAA). See:

http://www.london.gov.uk/shaping-london/london-plan/docs/strategic-housing-land-study-09.pdf

The projections in this *Update* have used the same SHLAA development data but have been created using a revised GLA borough level population projection model and revised borough household projection models which incorporate the relationships between population and household representatives as developed within the CLG 2008-based household projections published on the 26<sup>th</sup> November 2010 (see *GLA Intelligence Update 27-2010*).

In the preparation of the projections the population by age and gender has been linked to households using the borough-level relationship status and household representative rates as projected in the CLG 2008-based household projections. Allowance has also been made for those not living in private households by their age, gender and relationship status.

The GLA 2010 round of projections incorporate known births and deaths up to mid-2009 and follow the fertility and mortality rate assumptions made by ONS for the 2008-based national population projections for England (see *DMAG Update 14-2009*). However, as births since mid-2008, both nationally and in London, have been significantly higher than indicated by the ONS projections it was decided, first, to model birth totals for 2009-10 based on births in calendar year 2009, the latest available for boroughs, and, second, that the resulting fertility rates would be held constant between 2009-10 and 2013-14. After 2013-14 the rates follow the nationally projected decline in fertility but delayed by five years.

Between 2001 and 2009 the population totals follow the trend in the ONS mid-year estimates for London but the borough distribution is established by the population capacity of each borough as determined by the total number of households, based upon the known annual numbers of new homes. This means that the 2009 populations of some boroughs exceed the ONS estimates for mid-2009 while other boroughs fall below those estimates.

## **Housing Provision**

From 2009 the projections use the annual average borough housing capacities for 2009/11, 2011/16, 2016/21, 2021/26 and 2026/31 as determined by the SHLAA. These are equivalent to Table 4.15 in the SHLAA report (see link above). These capacities include conventional supply on identified large and small sites, non-self contained accommodation and dwellings returned from vacant.

Table 1: Annual Average Housing Capacities for London boroughs, by SHLAA phase

#### **Greater London Results**

Between 2011 and 2031 London's population is projected to increase by 940 thousand persons, equivalent to 12 per cent. Households are expected to increase by 579 thousand, or 18 per cent. The difference in the rates of change is mainly a reflection of the 4.8 per cent decline in average household size from 2.37 to 2.25. The population resident in communal establishments is also projected to increase by 12 thousand (12 per cent) as a result of the increasing population over the age of 75.

Although the household types in the CLG 2008-based projections differ markedly from those in the CLG 2006-based projections, the structure of household change is still dominated by the increases in one-person households (412 thousand). There is also a significant increase in lone parent families with one dependent child (45 thousand). These two household types account for 71 per cent and 8 per cent respectively of the total household growth between 2011 and 2031. The increase in the overall number of couple and lone parent families accounts for 28 percent of the overall household growth; however the only household type that is projected to decline in the next twenty years, by 14 thousand, is the archetypal family household formed by a couple with two dependent children.

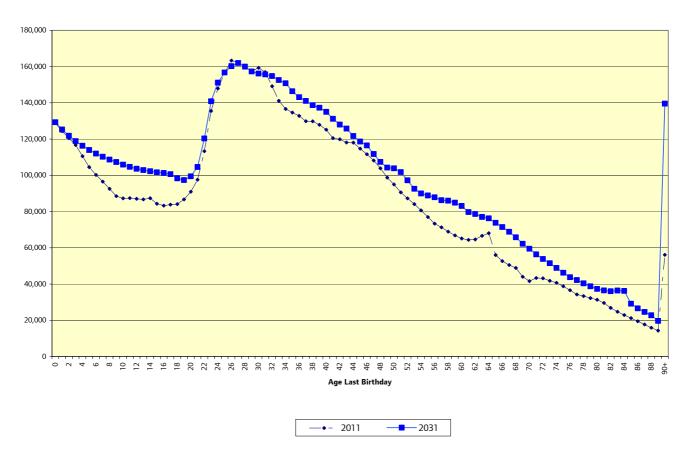

Table 2: Summary of Population and Household Projection for Greater London, (thousands, except average household size)

Chart 1: Population Age Structure 2011 and 2031, Greater London

Between 2011 and 2031 the growth in population is seen at all ages except for a small decline for persons aged between 26 and 31. The changes demonstrate a distinct ageing pattern, particularly with an increase of over 211 thousand persons between ages 45 and 64, as well as a significant increase in the child population, with 176 thousand more children of school age (4-15). The elderly population is projected to grow particularly fast. The over 65s are projected to increase by 38 per cent, or 350 thousand, to reach 1.27 million by 2031. The population of over 90s in 2031 will be two and a half times higher than in 2011, reaching 140 thousand.

Table 4: Projected Resident Labour Force aged 16-74, Greater London (thousands)

	2001	2006	2011	2016	2021	2026	2031
Persons	3,699.7	3,886.9	4,069.4	4,278.7	4,384.5	4,414.9	4,419.8
Males	2,038.8	2,103.8	2,173.5	2,257.7	2,293.0	2,304.9	2,302.1
Females	1,660.9	1,783.1	1,895.9	2,021.1	2,091.5	2,109.9	2,117.7
% Female	44.9	45.9	46.6	47.2	47.7	47.8	47.9

The resident labour force has been projected using the same borough level age-specific economic activity rates as in the GLA 2009 round of projections. These are based on borough 2001 Census rates and are improved until 2020 according to the ONS UK projections, after which the 2020 borough rates are held constant. Between 2011 and 2031 there is a 350 thousand increase in the resident labour force aged 16-74, equivalent to 9 per cent. The female contribution to the labour force rises by 222 thousand and is 63 per cent of the total growth.

#### **Availability of Data**

The projections are available in detail on the London Datastore:

http://data.london.gov.uk/datastore/package/gla-demographic-projections

The following tables for all years 2001 to 2031 are available:

Borough populations by single years of age and gender Borough economically active populations by age groups and gender Ward populations by five year age groups and gender

Details of borough household projections and ward populations by single years of age are available on request to:

#### demography@london.gov.uk

Projections of the ethnic group populations of boroughs are being prepared and will be available on the London Datastore following the publication of a *GLA Intelligence Update*.

Other borough and ward level projections are being prepared by the GLA. These will incorporate the same basic assumptions as the 2010 SHLAA projections but will use development data provided by the boroughs from their own latest housing trajectories.

It is likely that updated *London Plan* projections will be prepared once the Inspector's Report on the London Plan Examination in Public becomes available and its impact on the Plan assessed.

An *Intelligence Briefing* describing the new GLA demographic models will be published later in the year.
