

Report title

Statement of Assurance 2014/15 and the impact of the Fifth London Safety Plan (LSP5)

Meeting

Governance, Performance and Audit Committee

Date

14 September 2015

Report by

Head of Strategy and Inclusion

Document Number

FEP 2497

Public

Summary

The Authority is required to prepare an annual Statement of Assurance in accordance with the Fire and Rescue National Framework for England. This report presents the Authority's statement for 2014/15.

At the Governance, Performance and Audit Committee meeting in March 2015, Members requested that the Statement of Assurance should be presented separately to the Annual Governance Statement (which is also on the agenda for today's Committee meeting). Members also requested that the Statement should provide a full assessment, including ward and borough data where possible, in order to assess the full impact of LSP5. This data has been provided to accompany the statement.

Recommendations

That the Committee:

- 1) Notes the data, requested in March 2015, set out in the report; and
- 2) In light of performance, approves the Statement of Assurance 2014/15 on behalf of the Authority¹ to meet the requirements of the Accounts and Audit (England) Regulations and Fire and Rescue Service National Framework.

¹ GPAC's terms of reference: "on behalf of the Authority and as necessary (where the Authority itself is not to determine this matter), to approve the Authority's annual accounts and to determine all associated matters."

Introduction

1. The Authority is required to prepare an annual Statement of Assurance (SoA) in accordance with the Fire and Rescue National Framework for England. The Authority is required to "To *provide annual assurance on financial, governance and operational matters*". To provide assurance, *"fire and rescue authorities must publish an annual Statement of Assurance"*.
2. The Authority is also required to *"conduct a review at least once a year of the effectiveness of its systems of internal control"* and *"must approve an annual governance statement , prepared in accordance with proper practices in relation to internal control."*
3. At the meeting on 9 March 2015, the Committee agreed that officers *"... provide the 2014/15 Annual Governance Statement and Statement of Assurance separately, in order to allow a full assessment of the Fifth London Safety Plan (LSP5)." Accordingly, the Annual Governance Statement is presently separately on the agenda for today's Committee.*
4. Members also requested that the Statement of Assurance should provide a full assessment, *including ward and borough data where possible*, in order to assess the full impact of LSP5, including:
 - Attendance times - 1st, 2nd, 3rd, FRUs and Aerials
 - Fire fatalities
 - Fire injuries
 - Arson (all deliberate fires)
 - Fires in care homes and sheltered housing
 - Time spent by station staff on community safety
 - All fire safety inspections/audits – premises previously not visited
 - All fire safety inspections/audits – high risk
 - Emergency (999) calls
 - Call handling and turnout times
5. This data has been provided as requested in this report and is dealt with later in this report, and in the accompanying appendices. The Committee should note that borough/ward data is not available for emergency (999) calls or call handling times, and ward data is not available for the fire safety items, or turnout times.

Guidance on the Statement of Assurance

6. Guidance about the Statement of Assurance has been provided by the Department for Communities and Local Government¹ (May 2013) and this has been taken into account in producing the statement.
7. The government's guidance indicates what must, should and may be included in statements of assurance while allowing the flexibility for fire and rescue authorities to tailor the format and presentation. The table in Appendix 1 shows what is to be included and where it can be found in the statement for 2014/15.

The Statement

8. A Statement of Assurance for 2014/15 is attached as Appendix 2 to this report. This also includes an annex which sets out how the Authority meets the requirements of the National Framework, with details about where evidence can be found.

¹ *Guidance on statements of assurance for fire and rescue authorities in England* – Department for Communities and Local Government May 2013

9. The focus of the Statement submitted for approval is the year 1 April 2014 to 31 March 2015. This provides the first full year of data to consider the operational impacts of the LSP5. When considering the data, it should also be noted other factors such as the ongoing withdrawal of appliances for EFCC purposes, and the relocation of appliances to nearby stations as a consequence of the PFI programme continue to have an impact on response times.

Compliance with the National Framework

10. The Statement of Assurance includes information (in the annex) that shows how the Authority is compliant with the National Framework.
11. Section 25 of the Fire and Rescue Services Act 2004 requires the Secretary of State to report to Parliament every two years on:
- the extent to which fire and rescue authorities are acting in accordance with the National Framework (made under section 21 of the Fire and Rescue Services Act 2004); and
 - any steps taken by him for the purpose of securing that fire and rescue authorities act in accordance with the Framework.
12. The Secretary of State published his last section 25 report to Parliament in July 2014 (the previous report was in July 2012). The report simply said:

"In accordance with the above requirement, the Secretary of State is satisfied that fire and rescue authorities have been acting in accordance with the Framework, and has not taken any formal steps to secure compliance.

Each fire and rescue authority have:

- *Complied with the publication of their annual Statement of Assurance element;*
- *Complied with the publication of their updated Integrated Risk Management Plan element;*
- *Complied with the national resilience assurance elements."*

The Impacts of the LSP5

13. The Committee asked that data be presented alongside the SoA 2014/15 so that a "full assessment could be made of LSP5". The LSP5 was approved by the Authority on 12 September 2013, following a Mayoral Direction. Consequently, on 9 January 2014 the following operational changes were made:
- The closure of 10 fire stations
 - The number of fire engines (pumping appliances) reduced by 14 (net)
 - Five appliances were redeployed to different stations
 - The number of fire rescue units (specialist rescue vehicles) reduced from 16 to 14
 - The minimum crewing levels on fire rescue units reduced from five firefighters to four
14. Other changes at stations were implemented/introduced (before 9 January 2015) including:
- Alternate crewing introduced on the scientific support units at Poplar and Hammersmith.
 - Alternate crewing introduced on the two remaining incident response units at Wimbledon and Plaistow
 - On-demand mobilising for hose-laying and bulk foam units at the incident support centres.
15. LSP5 also contained proposals and initiatives which were not related to reductions in operational capacity. Many of these commitments were concerned with broader community and fire safety regulatory activity intended to promote safety outcomes. Progress against LSP5

commitments is reported regularly to the Strategy Committee and the last such report was in July 2015 (report FEP2482). It indicates very good progress against 38 ongoing actions of a wide ranging nature and is available [here](#).

16. When officers reported the Statement of Assurance for 2013/14 (SoA 2013/14), Members asked for a range of data at borough and ward level to help them assess the impacts of LSP5 on performance. At the Committee in March 2015, when considering the future reporting arrangements for the SoA and AGS, Members asked that a similar range of data be reported alongside the SoA 2014/15.
17. The difficulty with showing the impacts of LSP5 in 2014/15, is that 13 EFCC appliances continued to be temporarily removed from service during the year and that there were also station/appliances changes as a result of the station rebuilding programme. To provide the opportunity to assess the impacts of LSP5, this report includes data for four performance years, as follows:
 - 2011/12 – the base year for data in LSP5 and showing the position before any LSP5 or EFCC, or PFI changes
 - 2012/13 – the last full year based on pre-LSP5 deployments (i.e. 112 stations/169 appliances), with no temporary EFCC removals, or PFUI station closures.
 - 2013/14 – the performance year with 27 EFCC appliances temporarily removed (from August 2013), LSP5 changes implemented (from January 2014) and stations/appliances changes arising from the property PFI project (from various dates).
 - 2014/15 – the performance year with LSP5 changes fully implemented, but still with 13 EFCC appliances removed and station changes flowing from the property PFI project.
18. The data is in the following appendices:
 - **Appendix 3A** – Borough attendance time data for appliances
 - **Appendix 3B** – Borough data for incidents and fire casualties
 - **Appendix 3C** – Borough data for fire safety work.
 - **Appendix 4A** – Ward data for attendance times (similar to appendix 3A).
 - **Appendix 4B** – Ward data for incidents and fire casualties.
19. The borough and ward data in appendices 3 and 4 is also being published in an open machine readable format (CSV) on the London Datastore.

Methodological difficulties working at ward level

20. Ward level data is provided to help Members with an assessment of the impact of LSP5. During LSP5 consultation and in the two reports which dealt with the SoA 2013/14 (FEP2363 and [FEP2385](#)), officers explained the difficulties in interpreting ward level data, as follows:
 - **high level of variability in ward demand/ward response performance year-on-year.** In 2014/15, one third (34 per cent) of all wards had fewer than one incident a day (225 wards), and only three wards had one or more fires each week. In 2014/15, 57 per cent of incidents (54,302) were resolved by one appliance; 34 per cent of incidents (33,556) received two appliances, with just 9 per cent (8,498) needing three or more appliances. The small number of incidents means that ward response times, particularly where a second or third appliance are mobilised are subject to considerable variability year-on-year. Limitations upon the reliance and importance that can be placed upon ward level data remain. Some of the attendance time data shown for individual wards will reflect what happened on a single occasion. In other wards it will reflect the average of what happened across a range from 1 to more than 100 incidents.

- **changes to wards in three boroughs:** For SoA 2013/14, members were advised in that any future ward analysis would be more difficult (in terms of the ability to compare the modelled position with the present) by the fact that the number and composition of over 60 wards in London has changed. Since reporting ward data for SoA 2013/14, these ward changes have been implemented in Brigade systems, as follows:
 - Hackney – 18 wards before; 21 wards now; only three wards appear unchanged, the rest have changed in size and nine have new names.
 - Kensington and Chelsea – 18 wards before; 18 wards now; all wards appear to change in some way – all have changed in size and five have new names.
 - Tower Hamlets – 17 wards before; 20 wards now; only two wards appear unchanged, the rest have changed in size and 11 have new names.

LSP5 ward modelling was undertaken on the basis of old ward boundaries, so it is no longer possible to compare modelled projected attendance times for first and second appliance. The comparisons provided in this report will be on the basis of actual, not modelled, performance.

- **Temporary changes due to station rebuild programmes:** 122 wards in 2014/15 were directly affected by temporary changes which were in place due to the station rebuild (property PFI) programme. Those wards where stations were closed for all or part of the year, had a temporary impact on attendance times in 2014/15. During 2014/15, seven stations were closed at various points during the year².
- **Temporary removal of EFCC appliances:** 252 wards in 2014/15 were impacted by the temporary removal of fire appliances to support emergency fire cover (EFCC) arrangements. As outlined in reports on the SoA 2013/14, the extent of this impact is variable. Clearly the wards that the removed appliances normally sit in are most affected, with a ripple effect beyond that ward, to others, of a variable nature. During 2014/15, the thirteen EFCC appliances were removed from: Chelsea, Ealing, Erith, Forest Hill, Holloway, Old Kent Road, Plaistow, Poplar, Romford, Shoreditch, Stratford, Wandsworth and Willesden.

21. The impacts described above are shown in appendices 3 and 4 with the positive and negative impacts shown for each borough/ward by a red or green dot respectively. For appendix 3, the appliances removed as part of LSP5 and EFCC temporary removals are indicated (based on the stations located (or formerly located for closed stations) in that borough).

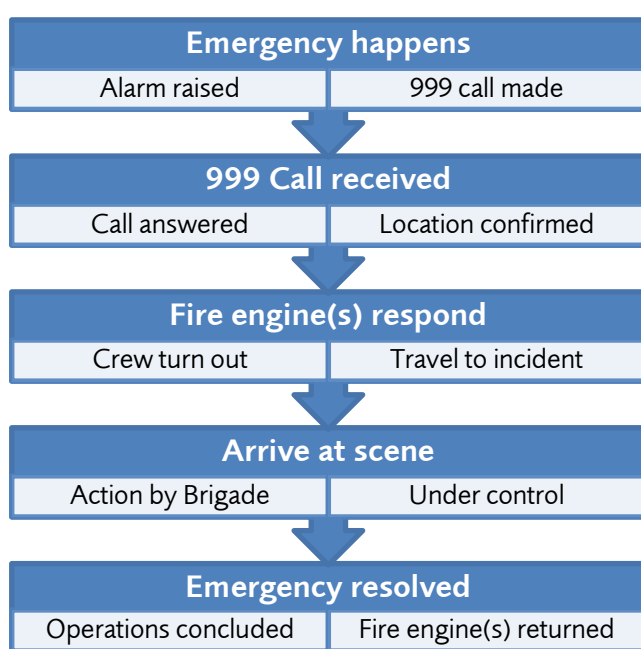

Outcomes – calls received and incidents attended

22. In 2014/15, the number of calls received by the Brigade and incidents attended has continued to fall. Comparing 2011/12 and 2014/15 (four years):
- emergency calls received – down by 18 per cent or 38,300 fewer
 - all incidents attended – down by 18 per cent or 20,800 fewer
 - primary (more serious) fires – down by 15 per cent or some 2,000 fewer
 - secondary (smaller) fires – down by 37 per cent or some 5,300 fewer
 - shut in lift releases – down by 37 per cent or 2,800 fewer
 - false alarms due automatic fire alarm (AFA) – down by 15 per cent or some 6,100 fewer

² Dagenham (from 25 November 2014), Dockhead (from 24 March 2015), Leytonstone (from 3 December 2014), Old Kent Road (to 24 March 2015), Plaistow (all 2014/15), Purley (from 27 February 2015), and Shadwell (from 12 January 2015).

Outcomes – attendance time impacts

23. Members will be aware that the Authority counts the speed of arrival of appliances to emergency incidents (attendance times) from the point the appliance is mobilised by Control to its arrival at the incident address. This is consistent with how other fire and rescue service measure attendance times. This time, therefore, includes crew-turnout from the first station and travel to the incident address. It does not include the time taken by Control to answer the 999 call nor the time taken to identify the location and nature of the incident, determine the resources that need to despatch and to despatch those resources.
24. The Authority has published detailed information about attendance time performance in the publication "*Fire Facts, Incident Response Times, 2005-2013*" in June 2014 (available on the LFB web site [here](#) and London DataStore [here](#)). The Fire Facts document reviews all aspects of the Brigade's attendance at emergency incidents stepping through the different stages of the attendance process as shown below.

25. For the SoA 2013/14, Members asked for "a full picture of attendance times, including call handling and turnout times") and that data is available in the Fire Facts document (at Section 6) described as the *incident response time* (i.e. time from answering the 999 call to arrival of appliances at the incident address). For SoA 2014/15, Members asked for call handling and crew turn out performance, and the overall 'incident response time' is provided to include these. Crew turn-out performance is also provided at borough level.

26. The Authority has set different targets for the separate parts of the incident response time because this enables both officers and members to focus on the different aspects of performance. On consideration of report FEP2165, the Governance, Performance and Audit Committee (amongst other things) noted that the Authority's approach to counting performance against the first and second appliance targets (from mobilisations to arrival at scene) was not unusual and was consistent with calculations used by other metropolitan brigades. The targets in 2014/15 are shown in the table below:

	LI 15i	LI 15iii	LI 14i/ii	Total 'incident response' time
<i>mm:ss</i>	Call answered - target	Call handling - target	Appliance attendance -targets	
First appliance	00:01.4	01:40	06:00	07:41.4
Second appliance			08:00	09:41.4

Note: The target for the 'call answer' and 'call handling' is in respect of the incident, whereas the 'appliance attendance' is for individual appliances mobilised.

Call handling

27. Members asked for data on call handling and this is not available for borough or ward because an incident location is only available for an attended incident. The number of calls handled by Control is provided later in this report (see para 48). The performance of Control in handling calls (i.e. answering calls, and mobilising resources) is set out below:

	2011/12	2012/13	2013/14	2014/15
Average time to answers a 999 call (LI 15i)	2.15s	1.45s	1.69s	1.93s
Calls answered within 7 seconds (LI 15ii)	92.8%	94.7%	93.7%	92.5%
Average time to deal with a 999 call (LI 15iii)*	01m:51s	01m:50s	01m:53s	01m:54s

* from time call is answered to mobilisation of initial resources

London-wide and borough attendance time impacts (appendix 3A)

Pumping appliances

28. London-wide and borough attendance times for four years are set out in appendix 3A. The London-wide performance for first, second and third appliances is summarised in the below. In the narrative below, comparison is made with 2012/13 which was the last full year before any deployment changes were made.

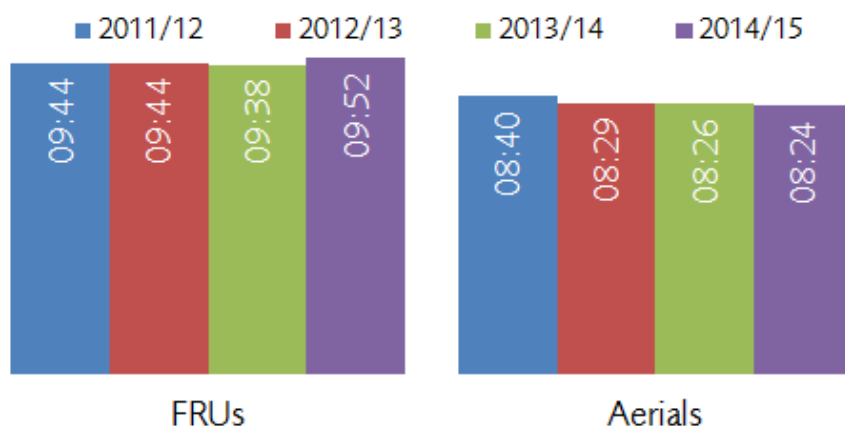

29. Performance for **first appliance** (at 05:32) is some 13 seconds slower than in 2012/13. In LSP5, six boroughs (Barnet, Bromley, Enfield, Harrow, Hillingdon and Hounslow) were likely to perform outside of the first appliance target following the LSP5 changes. In 2014/15, there were six boroughs that performed outside the target although Harrow and Hounslow remained within target with Barking and Dagenham and Havering falling outside the target. This performance in these two borough was directly attributable to the temporary closure of Dagenham fire station in November 2014 to facilitate rebuilding as part of the property PFI project and removal (for all 2014/15) of the second appliance at Romford for EFCC purposes.
30. London-wide, **second appliance response times** (at 05:32) were 25 seconds slower in 2014/5 than in 2012/13. This reflects the absence of 13 EFCC appliances during the year. The 13 EFCC appliances are all from two appliance stations, and second appliance response performance will be impacted by the number and distribution of second appliances. In LSP5, one borough (Kingston) was likely to perform outside of the second appliance response time target following implementation of the station closures/pump removals. In the event, and because of the impact of EFCC appliance removals, two additional boroughs performed outside target (Havering and Hillingdon, alongside Kingston). Like first appliance, the performance in Havering is attributable to the closure of Dagenham station for rebuilding work, and the removal of the second appliance from Romford for EFCC purposes. In Hillingdon, the impact is from the LSP5 removal of the second appliance at Hayes.

London-wide, average **third appliance response times** (at 08:30) in 2014/15 was 35 seconds slower than in 2012/13. As expected, this performance is slightly slower compared to earlier years before LSP5 implementation and EFCC removals. The London-wide performance is well within the benchmark of 10 minutes used during LSP5 consultation. Three boroughs (Bexley, Hillingdon and Redbridge) in 2014/15 fell outside the benchmark. The temporary closure of Dagenham station for rebuilding and removal of the second appliance from Romford for EFCC purposes, will be impacting on third appliance performance in Redbridge.

31. Consistent with the data supplied in January 2015 for the SoA 2013/14, details of **overall incident response times** are available for pumping appliances by borough and times for the first appliance are set out in appendix 3A. These data show the overall time between answering the 999 call in Control and arrival of the first appliance at the incident scene. Whilst the travel time to the incident scene will be impacted by the LSP5 changes to stations and appliances, no other aspect of the process (i.e. call answer, call handling and crew turnout) would be impacted.
32. Members requested data on **crew turnout** performance and this is available (for pumping appliances) by borough in appendix 3A. The crew turn-out time is included within overall attendance times (which are measured from the time of mobilisation to arrival at the incident address). Crew turnout performance has shown an improvement over the four years highlighted in this report. Overall crew turnout time has improved by 5 seconds from 01:20 in 2011/12 to 01:15 in 2014/15. Crew turnout would not be impacted by the LSP5 changes.

Special appliances

33. Members requested data for special appliance response times – Fire Rescue Units (FRUs) and aerial appliances. The data for four years is shown in the chart below.

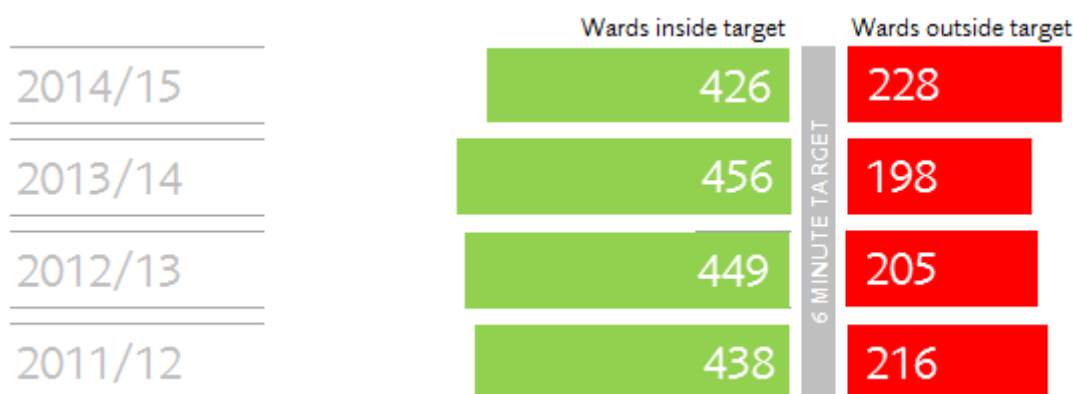

34. London-wide, average **aerial appliance response times** were 08:24 in 2014/15. This is slightly faster than in 2012/13 (08:29). Members will know that there were no changes made to the number or deployment of aerial appliances as a result of LSP5.
35. London-wide, average **fire rescue unit response times** were 09:52 in 2014/15, and this is slightly slower than in 2012/13 (09:44). Members will know that FRUs were removed, in line with the agreed LSP5, from Hornchurch in Havering, and Millwall in Tower Hamlets. The biggest change in performance was in Havering, where the response time for an FRU to incidents in the borough increased from 09:32 in 2012/13 to 13:53 in 2014/15. In Tower Hamlets, times were slower at 09:10 in 2014/15; up from 07:14 in 2012/13. Aside from the times in Havering, the longest FRU arrival times are in Barnet, Hillingdon, Bromley and Kingston which were not affected by LSP5 FRU changes.

Ward attendance time impacts (appendix 4A)

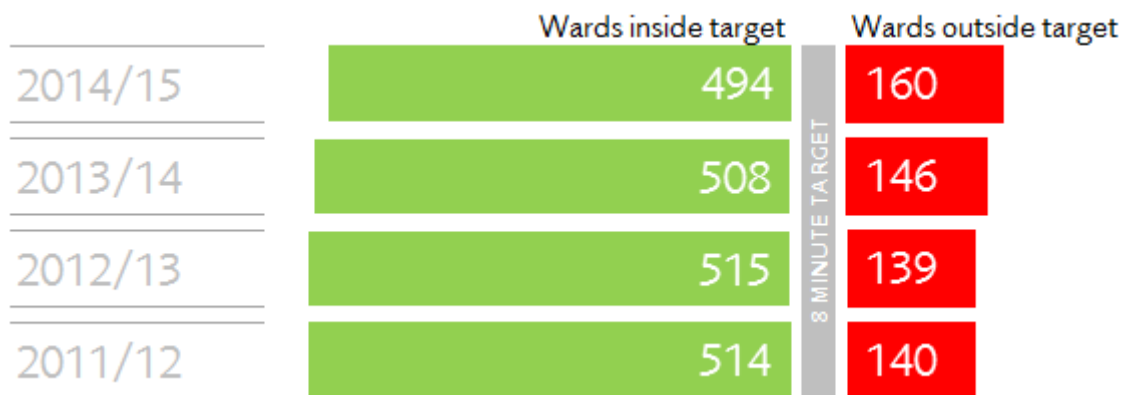

36. As outlined above, it is appropriate to consider performance in 2014/15 against two base years which have no LSP5 changes and no EFCC removals; i.e. 2011/12 and 2012/13. The change in the number of wards in 2014/15 that fell outside the 6 minute first appliance target compared to 2011/12 and 2012/13 shows:

- 12 fewer wards within target comparing 2014/15 with 2012/13
- 23 fewer wards within target comparing 2014/15 with 2011/12

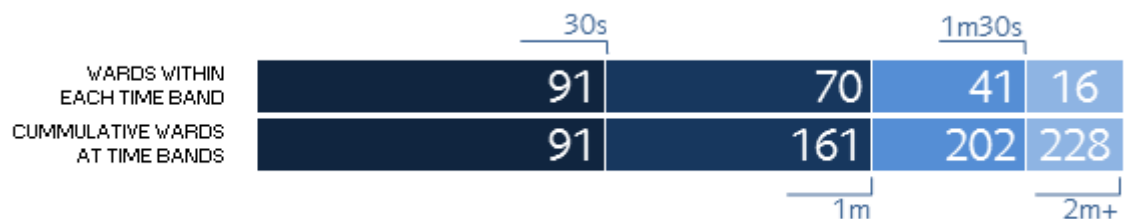

37. Similarly, performance for second appliance comparing 2014/15 performance against the two earlier 'base' years shows:

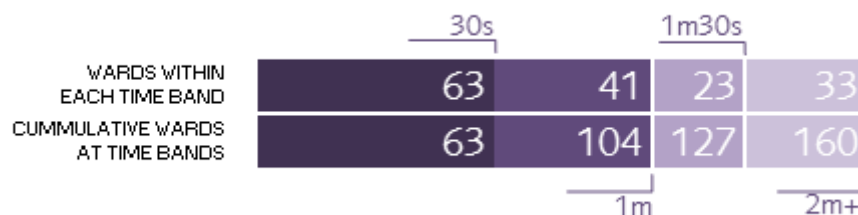

- 21 fewer wards within target comparing 2014/15 with 2012/13
- 20 fewer wards within target comparing 2014/15 with 2011/12

38. Of the 228 wards outside the first appliance 6 minute target, some are only a few seconds outside target. The extent to which wards are outside targets (number of seconds) is shown in the charts below. For first appliance, 91 wards are within 30 seconds of the target, with 33 wards within 10 seconds of the target. The chart shows wards within the four time bands and cumulative number of wards at each time band.

39. Of the 160 wards outside the second appliance eight minute target in 2014/15, 63 wards are within 30 seconds of the target, with 29 wards within 10 seconds of the target. The chart shows wards within the four time bands and cumulative number of wards at each time band.

Slowest ward times

40. For the 20 wards with the slowest **first appliance** performance:

- Performance ranges between 09:23 (Harefield in Hillingdon) to 07:40 (Shirley in Croydon).
- Three of these wards are impacted by LSP5 station closures/pump removals (Clayhall in Redbridge; Royal Docks in Newham; Heston West in Hounslow).

- One ward (Royal Docks in Newham) is impacted by LSP5 changes (Silvertown closure), EFCC pump removals (Plaistow and Poplar) and a PFI pump removal (Plaistow).
- 19 wards had first appliance performance outside the 6 minute target in 2011/12 and 2012/13 (before LSP5 changes and EFCC removals).
- Only one ward is in inner London (Royal Docks in Newham); 19 out of the 20 wards are in outer London boroughs³.
- Hillingdon and Bromley have most wards in the top 20 slowest performance (three wards each).

41. For the 20 wards with the slowest **second appliance** performance:

- Performance ranges between 12:17 (Chelsfield and Pratts Bottom in Bromley) to 09:55 (Cranham in Havering).
- None of these wards are impacted by LSP5 station closures/pump removals.
- All wards had second appliance performance outside the 8 minute target in 2012/13 (i.e. before LSP5 changes and EFCC removals).
- None of the wards are in inner London².
- Bromley has most wards in the top 20 slowest (five wards).

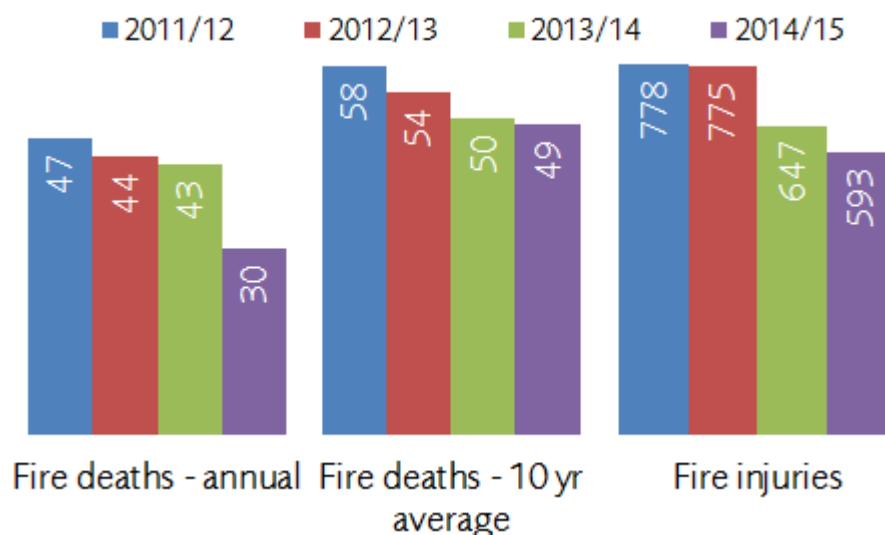

42. Data for **third appliance response times** is provided by ward (in appendix 3A). Members will know that there is no target attendance time for third appliance. It will be noted that there are some instances where the third appliance response appears to be faster than the second appliance response. This is a function of maths. Take an example of six incidents in one ward. For each incident, the times are consistent with first faster than second and second faster than third. But when they are averaged, you get a third average time faster than second, as follows:

	First	Second	Third
Incident 1	05:02	07:54	
Incident 2	06:32	07:21	
Incident 3	04:45	06:23	07:04
Incident 4	05:22		
Incident 5	03:13	06:48	06:57
Incident 6	05:37	10:02	
Average	05:05	07:41	07:00

Outcomes – fire casualties (*appendix 3b for borough, appendix 4B for ward*)

43. Members specifically asked for data about fire casualties (deaths and injuries by borough and ward) and this is available in appendices 3B and 4B. The chart below shows the numbers of fire casualties (fatal and non-fatal) for the four year period. The data shows a downward trend for all types of casualties over the four year period, and confirm that the LSP5 changes have not impacted on these critical measures of safety from fire in London.

³ The Office of National Statistics (ONS) define inner London as Camden, City, Hackney, Hammersmith and Fulham, Haringey, Islington, Kensington and Chelsea, Lambeth, Lewisham, Newham, Southwark, Tower Hamlets, Wandsworth, and Westminster. The other boroughs comprise outer London.

44. Borough and ward data for **fire deaths** is set out in Appendices 3b (borough) and 4b (ward). As Members will know, the number of fire deaths is generally low and so there are always limitations on the statistical conclusions that reliably can be drawn. Data for annual numbers and the ten year average is shown above (annual data only is available at borough and ward level).

45. There is an interest in whether changes to response times increases the prevalence of deaths and the chart below looks at the estimated delay between ignition of the fire and calling the brigade. For the 8 deaths for which data is available, it can be seen that in over three-quarters of cases there was a delay of 10 minutes or more in calling the Brigade.

Estimated delay between fire ignition and call to the Brigade for fire fatalities, 2014/15

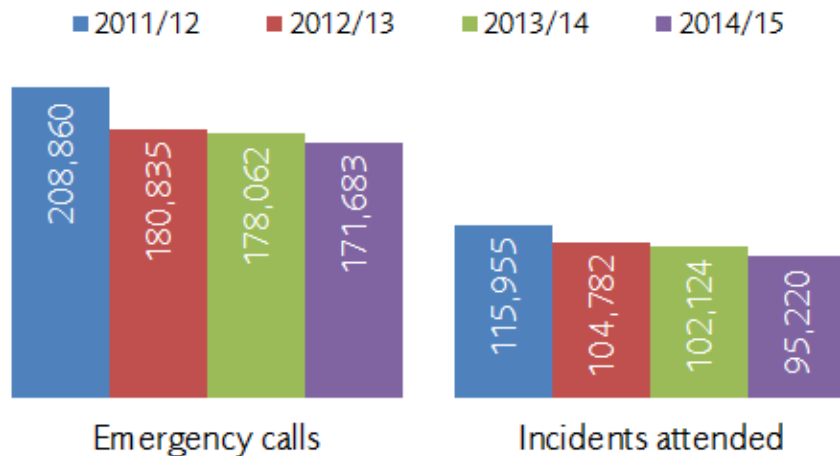

Note: This data is not available for eight fire deaths.

46. Officers have examined the data and wider information carefully, because it is accepted that there have been very real concerns about public safety. On the face of it, there is no relationship between LSP5 changes and fire deaths in 2014/15. Fire deaths appear to be as randomly occurring as they ever have been. The Committee, as part of its regular performance report, received an account of every fire death in 2014/15 at the July meeting (FEP2476).

47. Even though the number of **serious fire injuries** have fallen by 17 per cent since 2010/11 and 17 per cent since 2012/13, the actual number of fire injuries annually are such that there are limitations to the reliability of statistical conclusions. As with fire deaths, the LSP5 reductions do not appear to have had an adverse impact on the volume of serious fire injuries.

Outcomes – emergency calls and incidents (*appendix 3b for borough, appendix 4B for ward*)

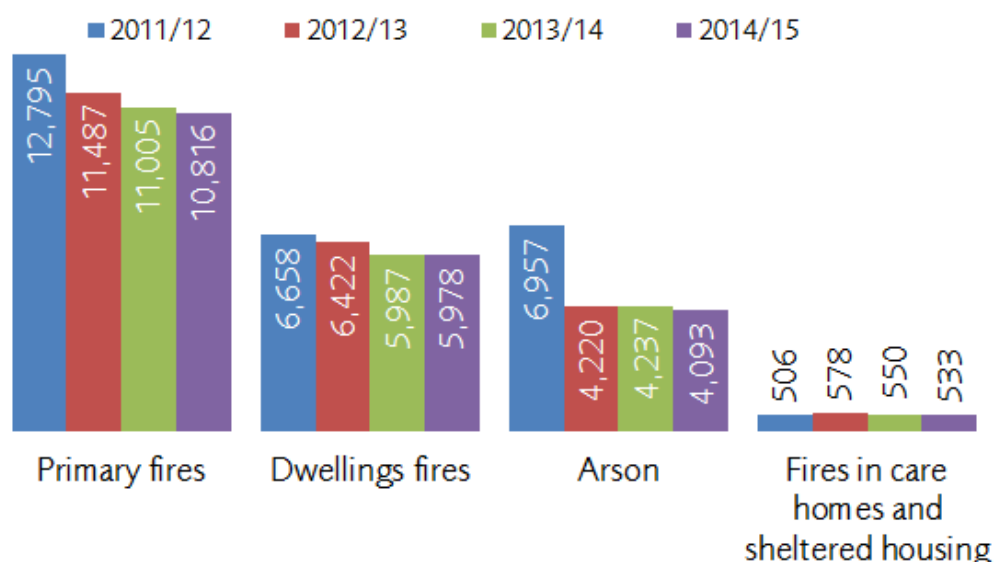

48. Members specifically asked for data about emergency (999) calls and this, together with data for all incidents attended (borough and ward) is available in appendices 3 and 4. The chart below shows the numbers of emergency calls received by the Brigade together with the total numbers of incidents attended over the four years to 2014/15.

49. Members requested data for **emergency calls**. This data is not available at ward or borough level as the borough/ward location of a caller is not captured. The data above shows that emergency calls handled by Control fell by over 31,000 over the four years to 2014/15 (18 per cent reduction), and 9,000 since 2012/13 (5 per cent). At borough level, all but four boroughs showed a reduction in the number of incidents between 2012/13 and 2014/15; there was a small rise in incidents in Bexley, Bromley, Havering and Sutton, with Havering showing the largest increase (50 more incidents in 2014/15 compared to 2012/13). The largest reductions were in Camden and Westminster, slightly above and below 700 incidents (respectively) and this is due to the Authority's policy to reduce repeated attendances to false alarms due to automatic fire alarms (AFAs).
50. London-wide, the number of **incidents attended** by the Brigade continues to decline and that pattern was maintained in 2014/15, after the implementation of LSP5 changes. There were over 20,000 fewer incidents attended in 2014/15 compared to four years earlier.

Outcomes – fire incidents (*appendix 3b for borough, appendix 4B for ward*)

51. Members asked for deliberate fires (arson) and for fires in care homes and sheltered housing. This data is in appendices 3 and 4, together with data for all fires, primary (more serious) fires, dwellings fires, and fire size. The London totals are in the chart below.

52. London-wide, the number of **primary fires** and **dwelling fires** continue to fall and that pattern is maintained in the period since the implementation of LSP5.
53. In the period since LSP5 was implemented, **arson** incidents have declined compared with previous years.
54. In LSP5 we said that we were concerned by the number of older people who are still harmed or killed by fire in places where they should be safe. For this reason we introduced a new headline target focusing on the **fires in care homes and sheltered housing**. LSP5 said that, by March 2016, we would work to reduce fires in care homes and sheltered housing by three per cent (without stretch) and nine per cent with stretch.
55. The Brigade uses a methodology to assess **fire size** of primary fires based on the resources necessary to deal with it. In 2014/15 the proportion of fires which could be described as medium or large in size, based on the resources deployed to them, represent about 9 per cent of all primary fires, and that proportion has remained consistent across the four year period. There does not seem to be any increase in the size of fires due to slightly increased response times for appliances.

Outcomes – fire safety regulation *(appendix 3C for borough)*

56. Members asked to receive data on **fire safety inspections/audits to premises not previously visited** and for **inspection/audits to high-risk premises** and this data is provided at borough level. There is no relationship between the reduction in LSP5 operational resources and the volume of audits undertaken; audits are performed by a separate workforce. As the Committee will know, the numbers of inspections has fluctuated over the last few years with a decline shown in 2014/15. The Committee monitor the numbers of inspection closely and there is evidence, after Q1 2015/16 that the numbers are beginning to rise in line with targets.

Outcomes – community safety *(appendix 3C for borough data)*

57. Members (at GPAC) routinely receive performance reports which contain details of the proportion of **time spent on community safety by station based staff** (LI7). A decade ago, this figure was recorded as 7.4 per cent annually, since which time it has steadily risen and is now recorded at just over 14 per cent. The indicator is expressed as a proportion of available

time by the crews of pumping appliances. Borough data has been provided, as requested, but officers would put a health warning on how it can be interpreted because it is a measure of the proportion of time spent on community safety (so smaller time for a smaller workforce might not show a reduction).

58. Members (at GPAC) also routinely receive performance reports which contain details of the numbers of **home fire safety visits** (HFSVs) carried out mainly by station staff (LI6i). In 2011/12, the Brigade carried out 77,478 visits and in the last performance year (2014/15) nearly 87,000 visits were undertaken. This continues to represent a significant increase and improvement even over performance for the 2013/14 outturn (83,948), despite the continued FBU industrial action short of strike and the reduction in the number of crew as a result of the LSP5 closure of fire stations, and removal of appliances.

Outcomes – comparison with performance for England overall

59. A key comparator for London performance in terms of safety outcomes, is overall performance of all Brigades in England in 2014/15. DCLG published its Fire Statistics Monitor for 2014/15⁴ on 20 August 2015 and a comparison with performance in London has been made against the headline figures published by DCLG, in the table below. The key highlights, which show that London has performed well in 2014/15 compared to the overall performance in England, are:

	Change comparison 2014/15 with 2013/14 (last year)		Change comparison 2014/15 with 2005/06 (ten years)	
	England	London	England	London
Incidents attended	- 6%	- 7%	- 42%	- 39%
Fires attended	- 10%	- 6%	- 54%	- 50%
Fire fatalities	- 6%	-20%	- 30%	- 60%
Fatalities in accidental dwelling fires	-10%	-23%	- 30%	- 51%
Fire injuries	- 6%	- 8%	- 55%	- 54%
Special services (non-fire incidents)	- 5%	- 8%	- 20%	- 30%
Fire false alarms	+ 1%	- 7%	- 39%	- 38%

60. Comparative performance for London and the other metropolitan brigades⁵ was reported to the Committee at the July 2015 meeting (report FEP2476, appendix 4). The data shows that London has the lowest proportion of fires per 100,000 population of all the metropolitan Brigades, but has the highest proportion of special services and second highest proportion of false alarms (Tyne and Wear have a higher proportion). London had the second lowest proportion of fire related fatalities per 100,000 population (Tyne and Wear had a lower rate).

Conclusion

61. The performance highlights of 2014/15, compared to 2011/12, are:
- Pumping appliance attendance times are slightly slower over the three years from 2011/12 compared to 2014/15; nine seconds slower for first appliance, 22 seconds slower for second appliance, but performance for both first and second appliance remain

⁴ <https://www.gov.uk/government/statistics/fire-statistics-monitor-april-2014-to-march-2015>

⁵ South Yorkshire, West Yorkshire, Tyne and Wear, West Midlands, Greater Manchester and Merseyside

well within the agreed standards; third appliance attendance is 34 seconds slower compared to 2011/12 (there is no standard for third appliance).

- Fire deaths are significantly lower at 30 in 2014/15 compared to 47 in 2011/12. The Authority uses the ten year average to monitor the long term trend in fire deaths, and this is down from 58 to 49 between 2011/12 and 2014/15.
- Incident demand continues to fall; total incidents attended are down by nearly 21,000 over the four year period (an 18 per cent fall compared to 2011/12).
- All types of fire are down by over 7,000 over the four years, with the number falling below 20,000 (19,760) for the first time since Greater London statistics have been compiled. Fires in the home have fallen by over 600 over the four years (10 per cent down). This is against the backdrop of a steadily rising population in London over the last few years.
- Community safety work, as measured by the number of home fire safety visits carried out are up by 10,000 over the four year period and there was an increase in 2014/15 compared to 2013/14 despite fewer appliance crews and stations.
- Slightly longer attendance times has not resulted in larger fires with the proportion of medium to larger fires in 2014/5 at the same level as the previous years.
- London performed strongly in 2014/15 when compared to figures for the all brigades in England published by DCLG in August 2015.

62. Overall, the data for 2014/15 – the SoA year – suggests good safety outcomes for Londoners. As in 2013/14, the work undertaken locally, by Borough Commanders, fire safety regulation staff and by station based staff in 2014/15, shines through as having made a very positive impact on these outcomes. On the basis of the performance in 2014/15 and other matters highlighted in the Statement of Assurance 2014/15, Members are recommended to approve the Statement.

Head of Legal and Democratic Services comments

63. The Fire and Rescue National Framework prepared by the Secretary of State under section 21 of the Fire and Rescue Services Act 2004 says that *'fire and rescue authorities must publish an annual Statement of Assurance'* and that *'each fire and rescue authority is expected to sign off their statement'*.
64. Section 21 of the 2004 Act says, *'Fire and rescue authorities must have regard to the Framework in carrying out their functions'*. The Authority has previously been advised by leading counsel in a different context that the requirement to have regard to the Framework means, in essence, that the Authority is obliged to follow it unless there is good reason for departing from it, and even if there is good reason, it is not open to the Authority to follow a course that is substantially different from that put forward by the Secretary of State. This advice is substantiated by case law and is recommended by the Head of Legal and Democratic Services to the Authority.
65. The Framework makes clear the expectation that the Statement of Assurance must be published annually. The last Statement of Assurance was published in January 2015 (in respect of the year 2013/14). It would be a reasonable expectation under the Framework that the Statement of Assurance in respect of the year 2014/15 should be published by the end of the 2015 calendar year.

Director of Finance and Contractual Services comments

66. The Director of Finance and Contractual Services has reviewed this report and has no comments.

Sustainable Development Implications

67. The assurance gathering process underlying production of the statement should identify any weaknesses in our governance arrangements which may affect our ability to deliver our sustainability objectives. Should any significant shortcomings be identified, the actions necessary to address them will be added to the action plan contained in the Annual Governance Statement so that governance improvement actions are not duplicated.

Staff Side Consultations Undertaken

68. The Statement includes matters which have been the subject of consultation with the staff side, but no staff side consultation has been undertaken on this report.

Equalities Implications

69. Any significant shortcomings in our governance arrangements which impact on our ability to meet our equalities objectives will be added to the action plan contained in the Annual Governance Statement so that governance improvement actions are not duplicated.

How the Statement of Assurance meets DCLG guidance

	Section in the Statement of Assurance			
	Declaration	Finance	Governance	Operations
Statements of assurance must...				
...provide annual assurance on <u>financial</u> , <u>governance</u> and <u>operational</u> matters		x	x	x
...show how they have had due regard to the expectations set out in their integrated risk management plan				x
...show how they have had due regard to the requirements included in the Framework	See Annex to the Statement			
Statements of assurance should...				
...assess (their) performance across number of key areas				x
...be signed off by elected member of the relevant authority who is able to take responsibility for its contents.	x			
...be published annually.	On LFB web site after approval			
...include details of consultations on these (integrated risk management) plans and confirm that appropriate information was provided to enable active and informed participation.				x
...clearly state that the Authority fulfils the Framework requirements	x			
Statements of assurance may...				
...briefly set out what assessment procedures are in place with regard to the authorities' statement of accounts		x		
...set out what work authorities have undertaken to review the effectiveness of the governance framework, including the system of internal control.			x	
...consider principles of transparency.			x	
...also indicate where fire and rescue authorities have entered into agreements and/or mutual aid agreements with other relevant bodies.				x
...raise issues of issues of operational competence or delivery (for example, when advice received under health and safety or other legislation)				x
...consider making a simple declaration that the Framework requirements have been met.	x			
... include any potential improvements they have identified across their accounting, governance or operational responsibilities to communities.			x	

London Fire and Emergency Planning Authority

STATEMENT OF ASSURANCE 2014/15

Introduction

1. The Fire and Rescue National Framework for England (2012) sets out a requirement for fire and rescue authorities to provide an annual Statement of Assurance, providing assurance to communities and government on financial, governance and operational matters. In addition, the framework says that Authorities should say how they have had due regard to the:
 - expectations set out in their Integrated Risk Management Plan (IRMP). For the London Fire and Emergency Planning Authority, this is the London Safety Plan; and
 - requirements included in the Framework.
2. The purpose of this statement is to satisfy the requirement to produce an annual statement under the National Framework. The statement also provides assurance against the Framework, and to the community of London and government, with respect to the areas highlighted above for the 2014/15 year (1 April 2014 to 31 March 2015).
3. The preparation of this Statement of Assurance follows guidance provided by the Department for Communities and Local Government (DCLG). This guidance can be found [here](#).

Assurance on Finance

4. All local authority accounts are required to adopt 'proper accounting practice' based on either statutory requirements or the Code of Practice on Local Authority Accounting in the UK (the Code) as published by the Chartered Institute of Public Finance and Accountancy (CIPFA). These specify the principles and practices of accounting required to prepare a Statement of Accounts that 'present a true and fair view'.
5. The Director of Financial and Contractual Services and the Chairman of the Governance, Performance and Audit Committee provide an annual statement summarising and supporting the annual accounts, these summaries and a copy of the accounts are approved and signed off by the Committee in September each year and are publically available.
6. An independent audit of the accounts is undertaken by an external audit provider. For the year 2014/15, this work was undertaken by Ernst and Young LLP.
7. The external audit provider undertakes a review of the accounts and forms an overall opinion which is published by 30 September of each year.
8. A copy of the statement of accounts report for 2014/15, along with the external auditors opinion can be found [here](#).

Assurance on Governance

9. The Authority's governance framework comprises the systems and processes, and culture and values, by which the Authority is directed and controlled and the activities through which it accounts to, engages with and leads the community. It enables the Authority to monitor the achievement of its strategic objectives and to consider whether those objectives have led to the delivery of appropriate, cost-effective services.

10. The governance framework is underpinned by our Corporate Code of Governance which sets out how the Authority discharges its governance responsibilities based on the six core principles defined in the CIPFA/SOLACE Delivering Good Governance in Local Government guidance which was updated with an addendum during 2012/13. This includes defining our scrutiny arrangements; maintaining effective policies and procedures on whistleblowing and complaint handling (on the London Fire website); and engaging with all sections of the local community through our community safety strategies and partnerships to ensure accountability. The Corporate Code of Governance was last updated and approved by the Authority on 27 September 2012.
11. The London Fire and Emergency Planning Authority (LFEPA) holds the London Fire Brigade (LFB) to account and is assisted by four committees. Decision making arrangements were confirmed for 2014/15 following reconstitution of the Authority at the annual meeting in June 2014 (FEP2249). The reconstitution confirmed the roles and duties of the following Committees:
 - Resources Committee - with responsibilities for money, people and property and performance related to those responsibilities;
 - Strategy Committee - with responsibilities for policy and strategy for the service delivery functions of emergency response, prevention and protection, including responsibility for community engagement;
 - Governance, Performance and Audit Committee - with responsibilities for service delivery performance (excluding performance related specifically to the functions of the Resources Committee) and for all audit and governance matters; and
 - Appointments and Urgency Committee - to meet on an ad hoc basis as and when urgent matters or appointments dictate.
12. The current terms of reference and delegated powers for these committees can be found [here](#).
13. The Mayor of London has powers to direct the Authority to take (or not to take) action. Mayoral directions were received on three matters during 2014/15:
 - Disposal of 8 Albert Embankment
 - Disposal of fire stations closed under LSP5; and
 - Partial performance in terms of industrial action and related matters
14. The system of internal control is also a significant part of the Authority's governance framework and is designed to manage risk to a reasonable level. It cannot eliminate all risk of failure to achieve policies, aims and objectives; it can therefore only provide reasonable and not absolute assurance of effectiveness.
15. The system of internal control is based on an ongoing process designed to identify and prioritise the risks to the achievement of the Authority's policies, aims and objectives, to evaluate the likelihood of those risks being realised and the impact should they be realised, and to manage them efficiently, effectively and economically.
16. The preparation of an Annual Governance Statement to support the Annual Statement of Accounts is a statutory requirement for local authorities. Its purpose is to demonstrate and evidence that there is a continuous review of the effectiveness of the Authority's internal control, performance and risk management systems. The Annual Governance Statement is signed by the Commissioner and the Chairman of the Governance, Performance and Audit Committee on

behalf of the Authority. This statement also includes actions to improve governance across the Authority.

17. The governance framework has been in place at the Authority for the year ended 31 March 2015 and supports the annual budget report and statement of accounts.
18. The system of internal control comprises a network of policies, procedures, systems, reports, processes and meetings. These arrangements are in place to verify the Authority's objectives, risk management arrangements, performance management processes and financial controls. These controls are in place to:
 - establish and monitor the achievement of the Authority's objectives through quarterly monitoring reports to members;
 - facilitate policy and decision making via , for example Standing Orders, and the service planning process;
 - ensure compliance with established policies, procedures, processes, laws and regulations, as underpinned by regular reviews carried out by internal and external auditors;
 - ensure the delivery of high quality services in an efficient and effective manner through established policies and procedures and the monitoring of performance through Directorate Management Boards, the Commissioner's Corporate Management Board, the Governance, Performance and Audit Committee, the Resources Committee and the Strategy Committee;
 - identify, assess and manage the risks to the Authority's objectives including risk management;
 - ensure the economical, effective and efficient use of resources, and for securing continuous improvement in the way in which the Authority's functions are exercised, through the Authority's medium term financial forecasting and budget processes, strategic and annual internal audit plans, and the budget review process;
 - provide appropriate financial management of the Authority and the reporting of financial management to the Resources Committee;
 - provide adherence to the Authority's values and ethical standards through the application of the leadership model and equality framework; and
 - ensure proper performance management of the Authority and the reporting of performance management through the Governance, Performance and Audit Committee, the Resources Committee and the Strategy Committee.
19. The Authority has a statutory duty to "*conduct a review at least once a year of the effectiveness of its systems of internal control*" to meet the statutory requirement set out in Regulation 4(2) of the Accounts and Audit (England) Regulations 2011. Internal audit provided independent assurance on risk management internal controls and governance arrangements within the Authority. From the work undertaken during the year, internal audit has concluded that the internal control framework was adequate, with controls to mitigate key risks, generally operating effectively. For 2014/15, external auditors have concluded that they can continue to place reliance on the work carried out by the Authority's internal audit function in reviewing key financial controls.
20. The Authority was meeting the voluntary DCLG Code of Recommended Practice on Data Transparency published in September 2011. The Code was updated in October 2014 (and again in February 2015 although this didn't directly impact on the Authority) to make mandate the publication of certain information. The Code gave some very demanding timescales for mandatory publication and the Authority was broadly compliant at those due dates. We have a dedicated transparency page on the LFB web site [here](#) as well as a number of data sets on the

[London Data Store](#), including data for all incidents attended and resources mobilised to those incidents since 2009 (and updated monthly). Our web mapping tool ([here](#)) allows users to see the numbers of different types of incidents as well as attendance times for first and second fire engines down to ward level, and is updated monthly.

21. During 2014/15, the Head of Legal and Democratic Services was the Authority's Monitoring Officer and the duties of this role were discharged in line with the Monitoring Officer Protocol agreed by the Authority on 26 March 2009 (FEP1339).

Assurance on Operations

22. The National Framework outlines the requirements for fire and rescue authorities to provide assurance on operational matters.
23. Fire and rescue authorities function within a clearly defined statutory and policy framework. The key documents defining operational responsibilities for LFEPA are:
- The Fire and Rescue Services Act 2004
 - The Civil Contingencies Act 2004
 - The Regulatory Reform (Fire Safety) Order 2005
 - The Fire and Rescue Services (Emergencies) (England) Order 2007
 - The Localism Act 2011
 - The Fire and Rescue National Framework for England.
24. The purpose of this section is to provide assurance that our service is delivered in line with our statutory responsibilities and in consideration of our Integrated Risk Management Plans and local strategies, including cross-border, multi-agency and national arrangements.

Integrated Risk Management Plan (London Safety Plan)

25. The Fire and Rescue National Framework sets out the requirement that each fire and rescue authority must produce an Integrated Risk Management Plan (IRMP) that identifies and assesses all foreseeable fire and rescue related risks that could affect its community, including those of a cross-border, multi-authority and/or national nature. The plan must have regard to the Community Risk Registers produced by Local Resilience Forums and any other local risk analyses as appropriate.
26. The Authority's Fifth London Safety Plan 2013-2016 (LSP5) – which is the Authority's corporate plan and its Integrated Risk Management Plan – sets out for 2014/15 the Authority's identification and assessment of all foreseeable fire and rescue related risks that could affect its community and demonstrate how prevention, protection and response activities will best be used to mitigate the impact of risk on communities in a cost effective way. LSP5 was approved by the Authority on 12 September 2013 (FEP2143).
27. The LSP5 with key supporting documents is available on our website [here](#). The report to the Authority on the draft (pre-consultation) Plan in January 2013, specified the need for the Plan to comply with the National Framework (FEP2021).

Our risk based approach

28. Our London Safety Plan is supported by a risk based approach in order to plan our emergency cover. Our approach can be found using this link, [targeting those at risk](#), as well as [fire service modelling](#), which details how the Authority uses risk modelling.
29. LSP5 made a number of operational changes as follows:

- Closure of 10 fire stations at: Belsize, Bow, Clerkenwell, Downham, Kingsland, Knightsbridge, Silvertown, Southwark, Westminster and Woolwich;
- Removal of the second fire engine from 7 fire stations at: Chingford, Clapham, Hayes, Leyton, Leytonstone, Peckham and Whitechapel;
- Addition of a second fire engine to fire stations at: East Greenwich, Hendon, Orpington, Stanmore and Twickenham;
- Removal of the fire rescue unit from two fire stations at: Hornchurch and Millwall;
- Reducing the minimum crewing level on remaining 14 fire rescue units from five to four;
- Introducing alternate crewing for our urban search and rescue modules, our scientific support units, and the remaining two incident response vehicles.

30. These operational changes were implemented on 9 January 2014. Analysis of performance during 2014/15 using a full year of data after the LSP5 changes were implemented, shows that the effect of the operational changes on performance has been in line with the expectations set out by the Commissioner when reporting the Plan for approval to the Authority in July 2013 (FEP2091). The operational changes have been made whilst there have also been improved safety outcomes for Londoners across a broad range of measures as set out below.

31. The Brigade's activities to mitigate and deal with the risks identified, and presented, in 2014/15 can be summarised as follows:

- The speed of attendance of fire engines to emergency to incidents remained well within the annual performance targets in 2014/15, as clearly set out in the LSP5. On average, a first fire engine arrived at an incident within an average 5 minutes 32 seconds and a second within an average of 6 minutes 54 seconds across London. As predicted in LSP5, attendance times would worsen slightly because of the impact of operational changes. However, in 2014/15 attendance times have been impacted by the continued temporary removal of 13 appliances to provide a contingency resource in the event of strike action by the Fire Brigades Union, and temporary station closures due to our programme of station rebuilds. The combined impact was 13 seconds slower for a first fire engine, and 25 seconds slower for a second fire engine compared to 2012/13 (the last full year before any changes to resources were made).
- Despite fewer appliances and crew, the time spent on community safety (CS) activity by fire station staff was 14 per cent of available time in 2014/15 represents a solid performance slightly above 2013/14 and above our target (13 per cent).
- Similarly, the number of home fire safety visits (HFSVs) for 2014/15 at 86,961 was greater than in 2013/14 (and any other earlier year), and the annual target was more than achieved. The Brigade aimed to deliver nearly 58,400 visits to high risk households in 2014/15 and achieved at just under 70,000 well in excess of this target.
- Although our regulatory fire safety activity was not affected by LSP5 changes, the number of fire safety inspections/audits in 2014/15 (11,820) fell compared to the previous year (16,639 in 2013/14) but recent performance indicates that this is beginning to improve again. There are a range of factors to explain this which were reported to the Governance Performance and Audit Committee on 20 July 2015 (FEP2476).

Safety outcomes in 2014/15

32. Key performance indicators and targets were agreed as part of the LSP5 and are reviewed on an annual basis. All key LSP targets and commitments, as well as key projects, are subject to close

scrutiny and monitoring by the Resources, Strategy, and Governance, Performance and Audit Committees.

33. Despite slightly slower attendance time performance, the Authority has continued to perform strongly against its targets for 2014/15, and safety outcomes in 2014/15 were an improvement on earlier years. This information is available on the LFB web site in [Our performance 2014/15](#). Detailed commentaries against performance can also be found in the end of year performance reports to the Governance, Performance and Audit Committee (FEP2476) and the Resources Committee (FEP2457).
34. Overall, performance, and safety outcomes for Londoners, for 2014/15 was good, with the majority of indicators set as part of the LSP5 showing achievement and a number achieving/exceeding the annual performance target. The key highlights are:
- Total incidents attended by the London Fire Brigade in 2014/15 (95,219) fell by 7 per cent compared to the previous year (2013/14), and down by 22 per cent compared to five years earlier (2010/11).
 - The number of primary fires attended (10,815) fell by 2 per cent compared to the previous year (2013/14), and down by 19 per cent compared to five years earlier (2010/11),
 - The number of **dwelling fires** (5,989) stabilised in 2014/15 at about the same level as the year before (5,993 in 2013/14), and whilst this is disappointing, the numbers are still 11 per cent lower than five years earlier (2010/11). Both normal and stretch LSP5 targets for 2014/15 were achieved, against a background of London's increasing population and the number of homes.
 - The number of **arson incidents** (i.e. all fires of deliberate motive) (4,090) fell by 3 per cent compared to the previous year (2013/14) and represents a long term trend achievement with current performance a 39 per cent improvement over the last five years (6,691 in April 2010). The stretch target was comfortably achieved.
 - The total number of **fire fatalities** for 2014/15 based on the 10 year rolling average (LI1i) was 49; this is the first time the average has fallen below 50 and is an achievement of the target for the year. The longer term trend remains one of substantial improvement with fire fatalities over 22 per cent lower (based on the 10 year average) compared to the high point of the last five years (63 for the 12 months to end April 2010). Although annual numbers of fire deaths do fluctuate, the 30 fire deaths in 2014/15 is the lowest number since data for Greater London have been compiled.
 - The number of **injuries arising from primary fires** (593) for 2014/15 also marks a significant achievement with performance representing a 23 per cent improvement over the last five years; the normal and stretch targets were achieved. This is an area of performance where it has been difficult to achieve a step change in performance and so the continuing improvement in this year, building on the positive trend from the previous year, is very welcome.
 - Our indicator for **primary fires in non-domestic properties** (LI 8) focusses on those property types covered by the Regulatory Reform (Fire Safety) Order 2005 (RRO). There were 2,049 fires in these types of building in 2014/15 which is a fall of seven per cent over previous year (2013/14); both the normal and stretch targets were achieved for 2014/15.
 - The number of unwanted calls (**false alarms**) caused by automatic fire alarms (AFAs) in **non-domestic buildings** continues to fall because of our work with building owners/occupiers and our charging arrangements for repeated attendances; there were

20,659 in 2014/15 which represents a reduction of eight per cent over 2013/14 (largely before charging was introduced) and of 32 per cent over the last five years (2010/11).

- The number of **shut in lift calls attended** has reduced by 61 per cent over the last five years, due to changes in the Authority's policies. The number of incidents attended for 2014/15 (4,715) is another significant improvement over the previous year, and the annual target has been achieved.

35. London performed strongly when compared to all Brigades in England in 2014/15 using data published by the DCLG⁶. In particular, fire casualties (fatal and non-fatal) fell by a larger percentage than for England as a whole. There were 16 fewer fire fatalities in England in 2014/15 and 13 in London alone; London therefore accounted for over 80 per cent of the national reduction in fire deaths. The number of all incidents attended, special service (non-fire) and false alarms incidents in London all fell by a greater percentage than England as a whole; the number of fires in London also fell but by a slightly smaller margin than in England overall.

Operational competence

36. The Authority has a statutory duty to ensure that all operational staff are trained to undertake their role effectively and safely. Training requirements for operational staff include a number of generic core risk critical skills that all staff must develop and maintain to work effectively. These core skills are set out in a formal Brigade policy - "The development and maintenance of operational professionalism" (DaMOP).

37. Training within the London Fire Brigade (LFB) is divided into two main areas:

- *Acquisition of skills training* – The initial learning phase. The Authority's external training provider is responsible for acquisition of skills training. This includes the training of newly appointed firefighters as well as the development of new skills for more experienced staff undertaking new or modified roles.
- *Maintenance of skills training* - Once the initial acquisition of skills training has taken place, it will be necessary for staff to practise their skills, knowledge and understanding, in conjunction with, and in addition to, their existing skills, knowledge and understanding. This 'practice' is what is referred to as maintenance of skills training.

38. The Brigade's dynamic and intelligent operational training (DIOT) process has been in place for a number of years to support the maintenance of operational competence. The DIOT process enables the effective identification and response to risk critical issues that have the potential to effect operational performance (and staff). The process monitors operational and training performance, identifying positive and developmental trends and provides mechanisms, including the implementation of training interventions to support the maintenance of competence for all operational staff.

39. At the heart of the process is effective information gathering which allows crews, monitoring officers and specialist officers, to record and identify both positive and developmental trends arising from incidents and training events. Information is recorded that describes individual and team performance and captures the issues related to training, equipment and procedures. The Operational Directorates Coordination Board, chaired by the Director of Operations receives regular reports summarising the information gathered, and makes decisions about changes to and new training interventions, as well as communication/awareness via the Operational News internal publication.

⁶ <https://www.gov.uk/government/statistics/fire-statistics-monitor-april-2014-to-march-2015>

40. The DIOT process is linked to DaMOP which sets out what is required to enable staff at stations to maintain their professionalism and competence by continually developing their skills, knowledge and understanding. The DIOT process is closely aligned to the requirements of "HSG 65 - Successful Health and Safety Management" produced by the Health and Safety Executive.
41. Matters of operational competence are reported regularly to the Resources Committee through standard performance reports. This includes trend reporting on health and safety events (RIDDORs), and training performance. An annual health and safety report is also provided to the Committee in July providing a full overview of performance against key health and safety indicators. This includes preventative initiatives and interventions, premises audits, occupational health, workforce liaison, and compliance and liaison with the Health and Safety Executive (HSE).
42. The number of **Safety events reported under RIDDOR** rose during 2014/15. These events are those more serious events required to be reported to the Health and Safety Executive (HSE), under the Reporting of Injuries, Diseases, and Dangerous Occurrences Regulations (RIDDOR) 2013. The figure of 133 RIDDOR reportable injuries for 2014/15 is an increase over the number of incidents as at the end of 2013/14 (101). Officers are able to confirm that the Brigade is not having any more serious injuries (i.e. we have very few 'specified' injuries under RIDDOR) and the incidents continue to mainly relate to slips, trips and falls and the moving and handling of operational equipment (as in previous years). The increase is due to staff appearing to be taking more time off to recuperate as a result of injury rather than the seriousness of the injury.

Mutual aid agreements

43. Fire and rescue authorities must make provision to respond to incidents such as fires, road traffic collisions and emergencies within their area, and in other areas in line with mutual aid agreements. We refer to these arrangements as 'cross border' and resources that may be requested to deploy cross-border are mobilised under mutual aid arrangements provided for under sections 13 and 16 of the Fire and Rescue Services Act 2004 (FRSA).
44. The Brigade holds mutual agreements with all its surrounding fire and rescue authority areas. Incidents where there could be resources from two or more fire and rescue services are a relatively common occurrence between the Brigade and the six surrounding fire authorities namely – Hertfordshire, Essex, Kent, Surrey, Royal Berkshire, and Buckinghamshire. Brigade resources may also be mobilised cross border to 'standby' at neighbouring FRS stations. Deployments for 2014/15 show that the Brigade mobilised to 454 cross border incidents. This is a reduction when compared to 2013/14 (531). However, the number of incidents (343) attended by neighbouring authorities for incidents in London is an increase over 2013/14 (241 – 2013/14).
45. Charging neighbouring fire and rescue authorities for the use of Brigade resources under section 13/16 of the FRSA was introduced in April 2014. This has been reciprocated by most neighbouring fire and rescue authorities who are now also charging the Brigade for the use of their resources.

National resilience

46. For the purposes of this document, national resilience is defined as the capacity and capability of fire and rescue authorities to work together and with other Category 1 and 2 responders to deliver a sustained, effective response to major incidents, emergencies and disruptive challenges, such as (but not limited to) those identified in the [National Risk Register of Civil Emergencies](#).
47. It refers to risks that need to be planned for on a strategic, national basis because their impacts and consequences would be of such scale and/or complexity that local resources would be

insufficient, even when taking into account mutual aid arrangements, pooling and reconfiguration of resources and collective action.

48. The National Framework makes clear there is a need to plan for, and occasionally respond, to incidents of such scale and/or complexity. Thus, the Government retains strategic responsibility for national resilience, though, of course, it is heavily reliant upon local fire and rescue authorities in support of this. And so, the National Framework sets out the requirement of Fire and Rescue Authorities to work collectively but also with the Fire and Rescue Strategic Resilience Board to provide assurance to government that:
 - Risks are assessed, plans are in place and any gaps between existing capability and that needed to ensure national resilience are identified;
 - Existing specialist national resilience capabilities are fit-for-purpose and resilient; and
 - Any new capabilities that fire and rescue authorities are commissioned to deliver by Government are procured, maintained and managed in the most cost-effective manner that delivers value for money whilst ensuring capabilities are fit-for-purpose and resilient.
49. The National Resilience Programme is one part of the Department for Communities and Local Government's contribution to the Government's Civil Contingencies Capabilities Programme. The strategic aim is to continue to enhance preparedness and resilience of the fire and rescue services in England and Wales by maintaining and improving the capability of the National Assets. The programme consists of a number of distinct capabilities. These are:
 - Chemical, Biological, Radiological, Nuclear and Explosive CBRN(E);
 - Urban Search and Rescue (USAR);
 - Water and High Volume Pumping (HVP); and
 - Command and Control.
50. Twenty per cent of the National Resilience assets are located within the Brigade area reflecting the importance of the capital city to national resilience in providing these capabilities to both the London region and the rest of the country. London also hosts the Fire and Rescue Service's National Co-ordination Centre (FRSNCC) at the LOC, where all requests for national assistance at large scale incidents are dealt with.
51. The Brigade has a full USAR capability, as part of the resilience programme, for providing fire and rescue services with a national capability to respond and effectively manage large-scale structural collapses and heavy transportation type incidents. This national capability is designed to augment existing local and specialised planning arrangements within Brigades or regions. As part of this national capability, the LFB provides USAR trained personnel to respond to incidents outside of the Brigade area.
52. Following the assessment and assurance of the Brigade's USAR capability in the previous year, the National Resilience Assurance Team (NRAT) undertook an assessment of the Brigade's national resilience multi-capability in February 2015. The assurance process has been developed as a long term procedure to ensure that the fire and rescue services which have received National Resilience assets, achieve and maintain an efficient, robust and effective operational capability to respond to national and major emergencies.
53. NRAT concluded that there was clear evidence of Brigade's ability to respond using all national resilience capability hosted by the service, with mechanisms for initiating and maintaining that response in place. The Assurance Team concluded that the Brigade is well placed to discharge its statutory duties relating to national resilience capability under the Fire and Rescue Services Act 2004 and the Fire and Rescue Services (Emergencies) (England) Order 2007.

54. Brigade staff also lead the fire and rescue service nationally in terms of the sector's role in the government CONTEST strategy. This involves working collaboratively with colleagues from the other blue light agencies as well as government departments to develop multi-agency operational capabilities for responding to a wide range of terrorist related threats. London has successfully introduced the concept of inter-agency liaison officers (ILOs) to UK fire and rescue services and the National ILO coordinator is a London officer. The London Fire Commissioner is the CFOA National Resilience Lead Officer for CBRN(E) and Counter Terrorism

Business Continuity

55. There are a number of identified infrastructure and workforce related risks that are relevant to the Brigade. These can largely be divided into two categories: those risks that have the potential to place high levels of demand on the operational service (major incidents and emergencies) and those risks that have the potential to disrupt the service (business disruptions).
56. The Brigade has established business continuity arrangements in place. Since 2005 we have been undertaking a formal business continuity programme which has led to the successful identification of the activities that are critical to the organisation, enabled us to explore the dependencies that exist between them and has assisted in the development and review of business continuity plans.
57. For example, the National Risk Register identifies the threat of an influenza pandemic as one of the greatest risks to the United Kingdom. During an influenza pandemic, we would expect to see absence rates in the range of 25 per cent to 50 per cent over a period of fifteen weeks, with staff absences reaching 12 per cent to 15 per cent over the peak weeks. Undoubtedly an event like this would impact on the size of the available workforce, but given that absence rates cannot be accurately predicted in advance of a pandemic, the Brigade's influenza and business continuity plans have been designed to be flexible frameworks that can be scaled to fit any pandemic, regardless of the absence rate and overall size of the operational workforce.
58. The Brigade tested these arrangements as part of the UK government's national exercise programme, in September and October 2014, participating in Exercise Cygnus. Exercise Cygnus was a national exercise to assess the UK's preparedness and response to an influenza pandemic and was led by Public Health England (PHE). The Brigade participated in Exercise Cygnus as a member of the London Local Resilience Forum (LRF), and ran an organisational-wide exercise in parallel to test its own internal business continuity arrangements.
59. The exercise demonstrated that overall the Brigade's internal business continuity arrangements were fit-for-purpose, and provided assurance that the Brigade would be able to continue to deliver its key services in the event of an influenza pandemic. The exercise also identified some areas for improvement, and has led to all business continuity plans, as well as relevant policies, procedures, and guidance notes, being stored on a newly developed central business continuity site to facilitate accessibility, promote business continuity awareness, and improve communications and information sharing in the event of a business disruption. The Brigade's influenza pandemic policy has also been redrafted in order to provide a more flexible and comprehensive framework for effectively managing an influenza pandemic, and to ensure the Brigade's response to, and recovery from, a pandemic is coordinated with partner agencies.
60. In addition to the business continuity requirements of the Civil Contingencies Act 2004, fire and rescue authorities also have a statutory duty under Section 7 of the Fire and Rescue Services Act 2004 to "secure the provision of the personnel, services and equipment necessary to efficiently meet all normal requirements". To meet the requirements of this duty we have contingency

arrangements (emergency fire crew capability (EFCC)) to deploy emergency fire crews and fire appliances capable of delivering services within a defined concept of operations.

61. These arrangements have been tested during 2014/15 in response to the ongoing national pensions dispute between the government and the Fire Brigades Union. The internal monitoring and reporting that has taken place throughout the strike periods to date has identified that our strategic response and contingency arrangements are robust with the overall success of these arrangements being strongly attributed to the level of commitment demonstrated by all staff involved.

Assurance Declaration

62. This statement functions as the Authority's Statement of Assurance under the Fire and Rescue Service National Framework. Officers are satisfied that the Authority's system of internal control fulfils the requirements of the National Framework, and that the Authority's financial, governance and operational assurance arrangements are adequate and operating effectively.

Ron Dobson CBE FFireE QFSM

Commissioner for Fire and Emergency Planning

Maurice Heaster OBE

Chairman, Governance, Performance and Audit
Committee

Date: 14 September 2015

Annex to the Statement of Assurance – Key evidence of compliance with the National Framework

	Requirement	Compliance Evidenced by:-Source Documents/Processes
Section 1: Safer Communities		
Identify and assess	Each fire and rescue authority must produce an integrated risk management plan that identifies and assesses all foreseeable fire and rescue related risks that could affect its community, including those of a cross-border, multi-authority and/or national nature. The plan must have regard to the Community Risk Registers produced by Local Resilience Forums and any other local risk analyses as appropriate.	London Safety Plan incorporating sections on: - Risks in London - Providing resilience for London (Community Risk Registers/London LRF) - Responding effectively (working with neighbouring brigades)
Prevent and protect	Fire and rescue authorities must work with communities to identify and protect them from risk and to prevent incidents from occurring.	LSP Commitments: 5LSP1, 2, 3, 4, 5, 6, 7, 8, 10, 11, 12, 13, 15, 16, 17, 18, 21, 25, 26, 43 Home Fire Safety Guide
	- Each fire and rescue authority integrated risk management plan must: - o demonstrate how prevention, protection and response activities will best be used to mitigate the impact of risk on communities, through authorities working either individually or collectively, in a cost effective way; and - o set out its management strategy and risk based programme for enforcing the provisions of the Regulatory Reform (Fire Safety) Order 2005 in accordance with the principles of better regulation set out in the Statutory Code of Compliance for Regulators, and the Enforcement Concordat.	LSP - Sections on Changing behaviours (HFSV, target groups, social media, false alarms, shut in lifts, visual audits, youth work), Building relationships (London boroughs, sprinklers, Fire safety intelligence, carers, road users, developers and building industry, petrol legislation) LSP - Section on Using our powers (enforcing fire safety law, heritage, PAP, complex buildings, fire investigation)
Respond	Fire and rescue authorities must make provision to respond to incidents such as fires, road traffic accidents and emergencies within their area and in other areas in line with their mutual aid agreements, and reflect this in their integrated risk management plans.	LSP - Responding effectively Section 13/16 agreements
	Fire and rescue authorities must have effective business continuity arrangements in place in accordance with their duties under the Civil Contingencies Act 2004 and to meet the full range of service delivery risks.	Corporate Business Continuity Policy Strategic Response Arrangements Capitalguard London Local Authority Coordination Centre London Local Resilience Forum

	Requirement	Compliance Evidenced by:-Source Documents/Processes
	Fire and rescue authorities must collaborate with other fire and rescue authorities to deliver intra-operability.	Cross Border agreements (section 13/16 agreements) National resilience assets National operational guidance programme JESIP (A/C Ops Resilience - board member) National Co-ordination Centre at LOC
	Fire and rescue authorities must collaborate with other fire and rescue authorities, other emergency services, wider Category 1 and 2 responders and Local Resilience Forums to ensure interoperability.	London Local Resilience Forum National Inter-agency liaison officer – LFB officer Inter-agency liaison offers (ILOs) National Co-ordination Centre at LOC
Resilience	Fire and rescue authorities need to have the necessary capability in place to manage the majority of risks that may face their areas, either individually or collectively through collaborative arrangements with other fire and rescue authorities and responders.	London Risk Register London Local Resilience Forum and partnership arrangements National resilience assets (LSP5) Cross Border agreements (section 13/16 agreements))
	Fire and rescue authorities must engage with the Fire and Rescue Strategic Resilience Board in order to support discussions and decision making in relation to national resilience.	Commissioner - member of FRSRB and CFOA National Resilience Lead for CBRN(E) and Counter Terrorism Relationship with CFOA National Resilience Director (former LFB Assistant Commissioner – Ops Resilience)
	Fire and rescue authorities' risk assessments must include an analysis of any gaps between their existing capability and that needed to ensure national resilience (as defined above).	LSP5 commitment: 5LSP53 Operational Resilience Department Special Operations Group Assessment by NRAT
	As part of their analysis, fire and rescue authorities must highlight to the Department, or the Fire and Rescue Strategic Resilience Board, any capability gaps that they believe cannot be met even when taking into account mutual aid arrangements, pooling and reconfiguration of resources and collective action.	LFB lead in CONTEST strategy
Capability building	Fire and rescue authorities must work collectively, through the Fire and Rescue Strategic Resilience Board, to agree with the Department whether and/or how to address any capability gaps identified through the gap analysis.	Commissioner – member of FRSRB
Working in partnership	In order to meet the requirements of this Framework, fire and rescue authorities must work in partnership with their communities and a wide range of partners locally and nationally.	Borough Commander - community lead Crime and disorder partnerships Youth work Adult safeguarding Primary Authority Partnerships

	Requirement	Compliance Evidenced by:-Source Documents/Processes
Communities planning their FRS	- Each fire and rescue authority integrated risk management plan must: - be easily accessible and publicly available; - reflect effective consultation throughout its development and at all review stages with the community, its workforce and representative bodies, and partners; and - cover at least a three year time span and be reviewed and revised as often as it is necessary to ensure that fire and rescue authorities are able to deliver the requirements set out in this Framework; and reflect up to date risk.	London Fire website, hardcopies on request Consultation process (LSP5 covering report – FEP2091) LSP5 - 3 year plan with annual review - Annual assessment of risk (draft)
Section 2: Accountable to Communities		
Transparent scrutiny arrangements	The fire and rescue authority must hold their Chief Fire Officer/Chief Executive to account for the delivery of the fire and rescue service.	Authority meetings Delegated authority arrangements Committee constitution/Terms of reference
	Fire and rescue authorities must have arrangements in place to ensure that their decisions are open to scrutiny.	Committee/Authority papers on London Fire Public attendance at meetings Trade unions consultation
Transparent data	Fire and rescue authorities must make their communities aware of how they can access data and information on their performance.	Data and transparency arrangements - London Fire LSP5 commitment (5LSP36) London Datastore
Section 3: Assurance		
Assurance	Fire and rescue authorities must provide assurance on financial, governance and operational matters and show how they have had due regard to the expectations set out in their integrated risk management plan and the requirements included in this Framework. To provide assurance, fire and rescue authorities must publish an annual Statement of Assurance.	Annual Governance Statement Statement of Assurance
National resilience assurance	- In addition to the assurance arrangements detailed above, fire and rescue authorities must work collectively, and with the Fire and Rescue Strategic Resilience Board, to provide assurance to Government, that: - risks are assessed, plans are in place and any gaps between existing capability and that needed to ensure national resilience are identified;	Commissioner – member of FRSRB LFB lead in CONTEST strategy National Resilience Assurance Team National resilience assets (LSP5) Exercise programme – TEAL, Cygnus, Strongtower and Unified Response

	Requirement	Compliance Evidenced by:-Source Documents/Processes
	- existing specialist national resilience capabilities are fit-for-purpose and resilient; and - any new capabilities that fire and rescue authorities are commissioned to deliver by Government are procured, maintained and managed in the most cost-effective manner that delivers value for money whilst ensuring capabilities are fit-for-purpose and resilient.	
Section 4: Context, Timescale, Scope		
Legislation	▪ Section 21 of the Fire and Rescue Services Act 2004 provides the statutory basis for the Framework and requires fire and rescue authorities to have regard to the Framework in carrying out their functions.	▪ LSP5 ▪ Annual Governance Statement ▪ Statement of Assurance
Support and intervention	▪ The expectation of the Government is that fire and rescue authorities, and their political and professional leadership, have proactive processes in place that provide support and lead improvement. In this context, improvement is delivered through peer led responses and effective partnership working.	▪ National Operational Guidance ▪ JESIP ▪ Know the Plan – high rise initiative ▪ Fires in waste recycling plants initiative ▪ Primary Authority Partnerships ▪ Free smoke and CO alarms for private landlords

Borough data

Appendix 3A – Appliance attendance times: first, second and third pumping appliances, aerial appliances, fire rescue units.

Appendix 3B – Incidents, fires, primary fires, arson (all deliberate fires), dwelling fires, fires in care homes and sheltered housing fire size, fire deaths and serious fire injuries.

Appendix 3C – Fire safety audits/inspections in premises not previously visited and in high risk premises, station time on community safety and home fire safety visits.

SoA 2014/15: Impact of LSP5 - borough data - appliance attendance times

Net pump changes				Impacts in 2014/15 - pumping appliances only	First appliance				Second appliance				Third appliance				Fire Rescue Unit				Aerial appliance				Overall incident response time (from call answer to arrival of first appliance)				Crew turnout time

Note: Red means that the borough has wards impacted by the removal of appliances/closure of stations; green means wards impacted by the addition of appliances.

Note: Figures may be for indicator LI9i and may vary from previously reported performance due to database changes since data was previously run.

Note: Figures may be for indicator LI9ii and may vary from previously reported performance due to database changes since data was previously run.

Note: Figures may be for indicator LI10i and may vary from previously reported performance due to database changes since data was previously run.

Note: These are home fire safety visits carried out by fire station crews, crew members on 'light-duty' and by non-station staff (CS practitioners). The numbers exclude any visits carried out by partners. The totals may, therefore, be different from published performance for local indicator (LI) 6.

Note: Data is for indicator LI7. The percentage of time is for the LFB management borough (i.e. Lambeth station is counted in Westminster, Surbiton in Kingston).

Ward data (originally presented in report FEP 2363)

Appendix 4A – Appliance attendance times: first, second and third pumping appliances, aerial appliances, fire rescue units.

Appendix 4B – Incidents, fires, dwelling fires, fires in care homes and sheltered housing, fire deaths and serious fire injuries.

SoA 2014/15: Impact of LSP5 - borough data - appliance attendance times

Note: Red means that the borough has wards impacted by the removal of appliances; green means wards impacted by the addition of an appliance.

Note: Calculation follows the counting rules as explained in Fire Facts; appliance response times, 2013.

Note: Calculation follows the counting rules as explained in Fire Facts; appliance response times, 2013.

Note: Calculation follows the counting rules as explained in Fire Facts; appliance response times, 2013.

Note: Calculation follows similar counting rules as pumping appliances as explained in Fire Facts; appliance response times, 2013.

Note: Calculation follows similar counting rules as pumping appliances as explained in Fire Facts; appliance response times, 2013.

Note: Calculation follows the counting rules as explained in *LFB Fire Facts; appliance response times, 2013* (June 2014). This measure is from the time the call is answered in Control to arrival of the first appliance; see section 6 of Fire Facts document.

SoA 2014/15: Impact of LSP5 - borough data - incidents and fire casualties

Borough	Ward	Impacts in 2014/15 - pumping appliances only					Incidents				Primary fires				Arson				Dwelling fires				Fires in care homes and sheltered housing				Fire deaths				Fire serious injuries

		Note: Red means that the borough has wards impacted by the removal of appliances; green means wards impacted by the addition of appliances.	Note: All incidents attended in London.				Note: A primary fire in a dwelling (including late call). A dwelling is a flat, maisonette or house/bugalow. Dwellings do not include non-self contained sheltered housing, or care/residential homes, hostels, etc.				Note: Local indicator LI5. Data includes care and residential homes, and sheltered housing (both self-contained and non self-contained),				Note: All deaths at fires where the cause was the fire or smoke, i.e. Indicator LI1i (annual figures).				Note: serious injuries at fires that required medical attention or attendance at hospital (other than for precautionary checks), i.e. indicator LI1ii.
